# **CBIT HACKTOBERFEST HACKATHON 2021**

## **WHAT IS HACKTOBERFEST?**

Hacktoberfest 2021 presented by DigitalOcean, Appwrite, Intel, and Deepsource is the largest virtual festival for the open-source community. It is a month-long event held during October and this is its 8th year of celebrating and encouraging open-source software enthusiasts, beginners, and the developer community to contribute to open-source projects.

Through this event, students are introduced to the idea of open-source and they can develop and share their projects for collaboration, suggest changes to existing projects via pull requests and donate directly to open-source projects.

## **HACKTOBERFEST 24-HOUR HACKATHON**

A hackathon provides a platform for students to put forth innovative ideas which can help solve real-world problems using various technologies. A 24hour hackathon imposes a time constraint which helps students to develop quick thinking and fast analysis. One should also keep in mind that the proposed solution must be simple, practical, efficient, and easily accessible.

The problem statements have been identified in various sectors of life such as health, education, and sports among others. As it's an online team event, members have to co-operate remotely and the best way to achieve this would be to learn open-source concepts and version control.

**Event Dates:** 29<sup>th</sup> and 30<sup>th</sup> October 2021

**Event Website:** <https://cosc.cbit.ac.in/hacktoberfest21/>

## **SPONSORS**

### **Smart Interviews**

Smart Interviews was founded in early 2016 by Amit Bansal, an alumnus of IIT-Hyderabad, with the vision of bridging the technical skill gap between the existing talent pool and industry expectations. Today, they mentor multiple batches with each batch size of over 100 students. Smart Interviews provides us with the perfect blend of both hard and smart work to let you become a top-notch coder. It is a one-stop place for learning the smart way to crack the coding interviews of top-notch product-based companies.

## SCHEDULE

<b>Date</b>	<b>Event</b>	<b>Time</b>
Day-01 29 <sup>th</sup> Oct	Inaugural Ceremony	7:00 PM- 8:00 PM
Day-01 29 <sup>th</sup> Oct	Git Workshop by SkillVertex	8:00 PM - 9:00 PM
Day-01 29 <sup>th</sup> Oct	Problem Statements Release	9:00PM
Day-01 29 <sup>th</sup> Oct	Problem Statements Selection	9:15 PM
Day-01 29 <sup>th</sup> Oct	Coding Starts	9:45 PM
Day-02 30 <sup>th</sup> Oct	Icebreaker	2:30 AM
Day-02 30 <sup>th</sup> Oct	Coding Ends	12:00 PM
Day-02 30 <sup>th</sup> Oct	DSA Session by Smart Interviews	12:15 - 1:15 PM
Day-02 30 <sup>th</sup> Oct	Presentations	2:30 - 5:30 PM
Day-02 30 <sup>th</sup> Oct	Closing Ceremony	6:00 PM - 7:00 PM

# **ORGANIZERS**

**Organized By CBIT Open Source Community**

## **Faculty Coordinators**

Mr. R. Srikanth

Mrs. T. Prathima

## **Core Committee**

Rikhila Annem - President

Sravan Sai Lanka - Vice President

Pranathi Kodicherla - Secretary

Vikas Bhatti - Secretary

Charan Bhavaraju - Joint Secretary

Sai Charan Koppula - Joint Secretary

Afrah Minhaj - Joint Secretary

## **DEMOGRAPHICS**

We saw a total of 54 teams with over 250 registrations in the hackathon. Apart from students participating from CBIT, we witnessed students from ACE Engineering College, BVRIT, CMR Institute of Technology, Osmania University (College of Engineering), GNITS, GRRR, IEST Shibpur, IIIT Sricity, Malla Reddy Engineering College, Neil Gogte Institute of Technology, Sreenidhi Institute of Science and Technology and many other colleges.

## **PROJECTS & WINNERS**

The participants were actively involved in the discussion held, followed by a session on GITHUB. The mentors were elated to see the dedicated participants work on their projects. A few of the project ideas include:

### Placement Drive

A portal that consolidates company eligibility, ongoing placement updates, and status and displays previous year placement statistics. Students can log in to their dashboard and keep track of upcoming interviews, submitted applications, and view company-wise eligibility. Admins upload upcoming placement drives, company eligibility, control applications, and student databases.

### Online Auction System

In an online auction, buyers and sellers engage in transactional business, where buyers purchase items through price bidding. Here, the bids have a starting price and an ending time. Potential buyers who place the highest bidding price for an item are declared the winners and owners of particular items. We must ensure that the process is secure and no fraud can happen.

## Class Performance Dashboard

Analyzing student performance plays an important role in enhancing students' abilities. This is a portal to illustrate student performances in order to provide better performance insights. Their performance can be in terms of academics, extracurricular activities. This can also be extended to predict their performance in future examinations and placement activity. Teaching staff and higher faculty should have access to all the student data and should be able to extract instant feedback.

## Assignments Tracker (LMS)

Students take multiple subjects in each semester and keeping track of all pending submissions and grades can be cumbersome. Design a solution where a teacher can upload the assignment and all the students of a class can access the assignments.

Maintain a dashboard to display pending assignments, provide email alerts before the deadline. Provision for faculty feedback.

### Fitness Freaks

A website where fitness experts can post content and fitness enthusiasts can follow their activities. Users can maintain a record to track their fitness journey and regularly update various fitness parameters such as calories and water intake. The application can be further extended to recommend recipes and automatically provide calorie count.

### Books Barter System

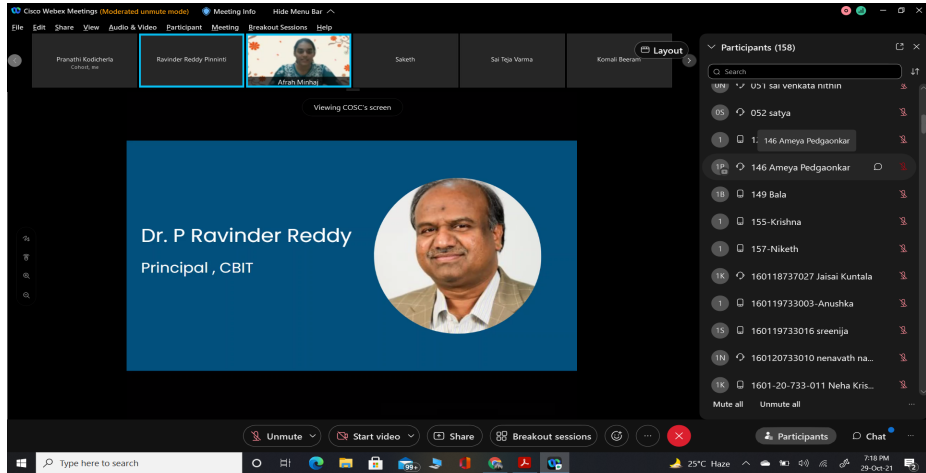

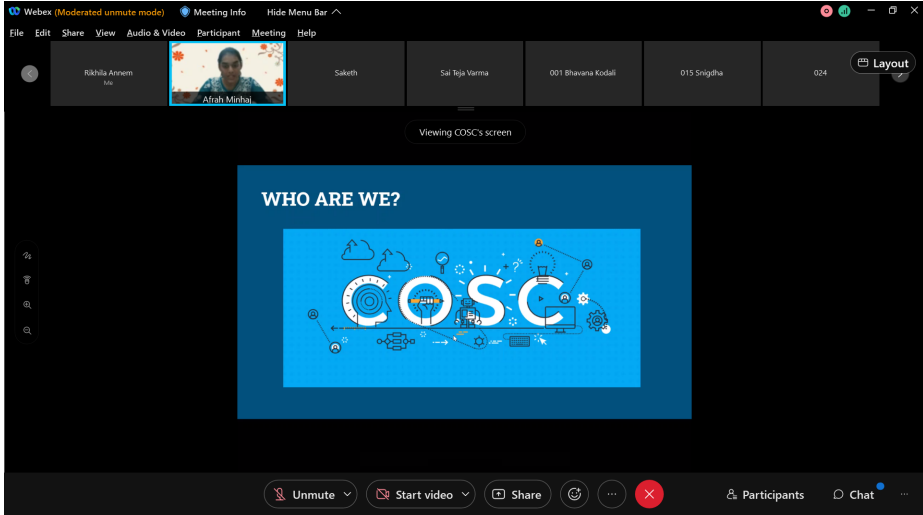

A website where users can interact and share books, novels and comics, with a person who is willing to trade one of their own, a trade can happen only if both the users agree and are interested in a trade. The application also provides its users with well monitored (spam/abuse deficient) forums for fans to discuss theories and schedule meetups.

The hackathon concluded with the judges deciding the three best, and innovative ideas. The following teams were awarded prizes:

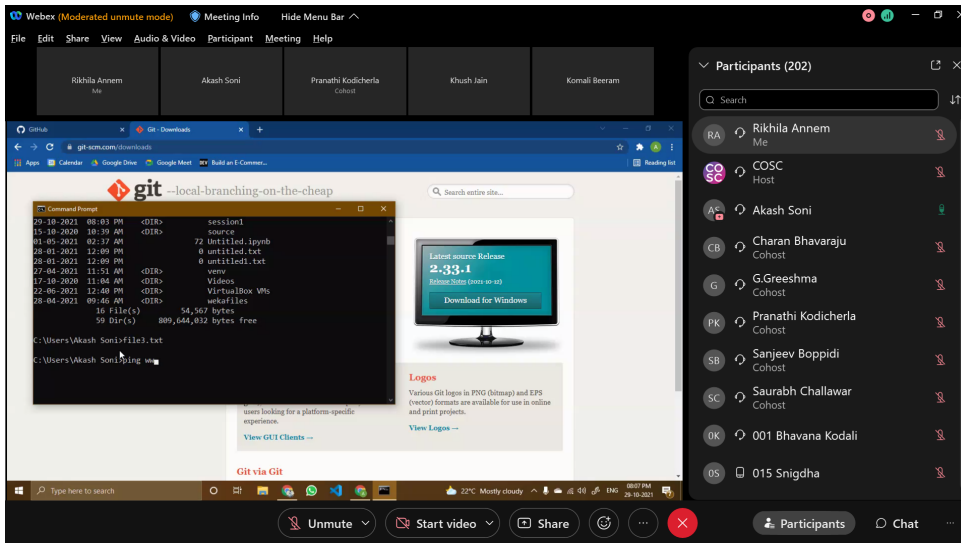

- CBIT Sports Resource Booking (team14)
- CBIT Sports Resource Booking (team30)
- Medication reminder (team44)

## **EVENT PLANNING**

We registered our event in the third week of October, at the Digital Ocean Hacktoberfest global events website. The planning began in the third week of October. We divided ourselves into groups to find sponsors, community partners, and mentors from the industry.

The publicity team set out to publicize the event on campus as well as off-campus. The mentors and sponsors were finalized and the dates for the hackathon were fixed. Care was taken to provide the attendees with stable platforms for creating a smooth work environment. It was made sure that the event was conducted in a properly planned and organized manner.

## **NEXT STEPS**

The Hacktoberfest Hackathon was the fourth 24-hour hackathon in CBIT. The result of this hackathon was sheer innovation through collaboration. The winning projects of this hackathon were guided further for real-time implementation.

Through this hackathon, students learned to collaborate, cooperate and contribute to open source and rapidly prototype.

Based on the enthusiasm and active participation of the students, we plan to continue the overnight hackathon approach in the future to solve real-world problems. We will also continue to work closely with the developer communities and sponsors that have provided their support for this hackathon and for future events of this club.

# **CBIT SIH Internal Hackathon 2022**

**Organized By CBIT Open Source Community (COSC)**

**In Collaboration with IIC**

# **CBIT SIH INTERNAL HACKATHON 2022**

## **WHAT IS SIH?**

Smart India Hackathon 2022 is a nationwide initiative to provide students a platform to solve some of the pressing problems we face in our daily lives, and thus inculcate a culture of product innovation and a mindset of problem solving. The last edition of the hackathon saw over 5 million+ students from various colleges compete for the top prize at different locations. In SIH 2022, the students would have the opportunity to work on challenges faced within various Ministries, Departments, Industries, PSUs and NGOs to create world class solutions for some of the top organizations including industries in the world, thus helping the Private sector hire the best minds from across the nation.

## **WHY INTERNAL HACKATHON?**

The format of SIH has changed this year, hence requiring colleges to conduct internal hackathon to send in the top 10 including both software and hardware ideas with 5 waitlist ideas from both editions from each college. A hackathon aids students to apply the concepts they have learned to build practical applications, while also allowing them to explore various facets of the frameworks or programming languages they use for the same. An internal hackathon helps the students showcase their abilities and also helps the college choose the best out of all the ideas presented. It also shows the capability of the students and how effectively they can implement the idea chosen by them.

**Event Dates:** 21<sup>st</sup> March, 2022

## **MENTORS**

- Dr. Y Rama Devi, Prof, Dept of CSE
- Dr. R. Ravinder Reddy, Assoc. Prof, Dept of CSE
- Dr. Sangeetha Gupda, Assoc. Prof, Dept of CSE

## DEMOGRAPHICS

We saw active participation from students of various departments which include CSE, IT, ECE and EEE of CBIT. Over 210 students actively participated in building partial prototypes for their projects. We were thrilled to see such active participation from girls as well as boys in the internal hackathon.

## PROJECTS & WINNERS

The participants were determined to build their ideas creatively and uniquely for their teams to be a part of the top teams. The mentors were elated to see the dedicated participants work on their project. The winners (shortlisted-10 teams and Waitlist-5 teams) were declared as below:

Category: Shortlisted				
Team_id	Team_name	Ministry/Organization	PS_ID	Edition
CBIT_SW_001	cope	Defence Research and Development Organisation (DRDO), Ministry of Defence.	NR1162	Software
CBIT_SW_002	team cbit it1	Department of Empowerment of Persons	RK759	Software

		with Disabilities(Divyangjan) , Ministry of Social Justice and Empowerment

## **EVENT PLANNING**

The first four editions SIH2017, SIH2018, SIH2019 and SIH2020 proved to be extremely successful to CBIT, every year students participated with full capacity and won prizes in all the four Editions.

To motivate students and create awareness about SIH event, rules and regulations among students an awareness session was organized on 9<sup>th</sup> March, 2022.

The planning began in the first week of March. We divided ourselves into groups with the COSC (CBIT open Source Committee) team to gather necessary resources, get required permissions and find mentors and judges from the industry.

The publicity team set out to publicize the event in campus stating the importance and usefulness of participating in SIH. Volunteers were picked as an extra help to organize the event. The mentors and judges were finalized and the dates for the hackathon were fixed. Care was taken to provide the attendees with uninterrupted power and high speed internet connectivity. It was made sure that the event took place in the way we had planned it at the CBIT TPO Labs, where 210 participants turned up to showcase their ideas. Event was successfully with coordination between student participants, Volunteers, mentor and judges panel. Results of the Top-15 ideas were declared on 24<sup>th</sup> March, 2022
