About Workshops in the Five-Day international e-workshop on "Building Data-Driven Solutions Using Data Analytics with ML and DL Algorithms", the topics included are challenging areas with particulal for excilent research. The Estabaways from this workshop will add immense value to the knowledge base for each of the particupants. This workshop will be hared upon hands on approach. Topics included in this workshop are NLP, Data reviews (Data preprincessing, EDA, Mudle Bindding, Med-el accuracy and model deployment) and computer vision.

Humans can typically create one or two good mod-ls a week. Machine learning can create thousands of models a week." - Thomas H Davenport, Analytics thought Leader

Objectives of the Workshop: >To create awaraness on Data Analytics and EDL using AI

Algustims.

To provide instructor-led hands on live manipulation of Data.

To provide hands on experience over Data Analytics using ML and DL.

Upon successful completion

The participants will be acquire the concepts of data ana-lytics and various tools related to data manipulation.

Use the EDA to represent the data after propro analysis of data.
