The Institute is pioneering the development of an Artificial Heart in Collaboration with SHARE India / Pittsburgh University and Cornell University, USA. CBIT(A) has been standing as a temple of learning for the past 42 years. UGC has granted Autonomous status from the Academic Year 2011-14 onwards. The Faculty and Students have successfully executed Sponsored Research and Consultancy Projects, from various funding Agencies such as DRDO, ISRO, DST, AICTE and UGC. MHRD - Institute Innovation Cell (IIC), MSME - Business Incubation (BI), Hexagon 3D Innovation Lab, Cognizant Innovation Lab and Robotic Process Automation Lab have been established in the Research and Entrepreneurship Department, for the Students and Faculty to pursue their Research interests.

About CSE Department: The Department of CSE was started in the year 1985 with an intake of 20. The intake was gradually increased to 180 with three sections. M.Tech programme was started in the year 2002 with an intake of 18 and increased to 36 in 2011. CSE department is a recognized research center under Osmania University. The department comprises of committed and well qualified staff. The intellectual ambiance in CSE Department is conducive to the overall development of the students and the discipline of Computer Science and Engineering as a whole. During the year 2020-21 sanction is accorded for two new programmes in emerging technologies: B.E (CSE with AI and ML) and B.E (CSE with IoT, Cyber Security with Blockchain) thus enhancing the intake of students from 180 to 300. The vision of CSE Department is to become a centre of excellence in the field of Computer Science and Engineering that produces innovative, skillful, socially responsible and ethical professionals.

About Workshop: In this Five-Day International e-workshop on "Building Data-Driven Solutions Using Data Analytics with ML and DL Algorithms", the topics included are challenging areas with potential for excellent research. The takeaways from this workshop will add immense value to the knowledge base for each of the participants. This workshop will be based upon hands-on approach. Topics included in this workshop are NLP, Data science (Data preprocessing, EDA, Model Building, Model accuracy and model deployment) and computer vision.

" Humans can typically create one or two good models a week. Machine learning can create thousands of models a week." - Thomas H Davenport, Analytics thought Leader

Objectives of the Workshop:

>To create awareness on Data Analytics and EDL using AI Algorithms.
>To provide instructor-led hands-on live manipulation of Data.
>To provide hands-on experience over Data Analytics using ML and DL.
>To acquaint the participants with Research Opportunities in Data Science and Computer Vision.

Expected Outcomes:

Upon successful completion

- The participants will be acquire the concepts of data analytics and various tools related to data manipulation.
- Use the EDA to represent the data after preprocessing and analysis of data.
- Formulate the Research problems in Data Science, NLP and Computer Vision.

Guidelines for Participants:

Web Links are updated on WhatsApp Group.

E-Certificate will be issued to all the Participants, after successful completion of the e-Workshop.

Participants need to mark their attendance in the google form that will be circulated during the Session.

CHAITANYA BHARATHI INSTITUTE OF TECHNOLOGY(A)

CBIT, established in the Year 1979, has developed in Four Decades of its journey, as one of the Premier Engineering Institute in INDIA, in Telangana State. The Institute offers Eleven UG and Eleven PG Programs into which Brilliant and Meritorious Candidates with good EAMCET Rank are seeking admissions at CBIT. CBIT Students are prepared and perfected holistically to secure Placements in reputed National and Multi-National Industries. Alumni, nearly 25,000 Graduate Engineers, are successfully placed in their Careers and as Entrepreneurs Globally. The Institute has been granted Autonomous Status from the Academic Year 2013-14 onwards.

ABOUT THE DEPARTMENT

The Department of Mathematics, currently has 12 faculty members who have vast research interest in different domains of their respective fields such as Fluid Mechanics, Number theory, Fixed Point Theory, Applied Regression Analysis, Numerical Methods, Reliability Theory and Operations Research, Graph Theory, Number theory, Decision making and Stochastic process

ABOUT THE FDP

The objective of ATAL scheme is "To plan and help in imparting quality technical education in the country and to support technical institutions in fostering research, innovation and entrepreneurship through training in various emerging fields"

The current FDP is highly interdisciplinary by nature, encompassing aspects of different Engineering fields like Materials science. It is known that traditional computer software is designed for serial computers, meaning that a particular process must be completed before another process is taken up. To some extent we are using parallel computer to solve a particular problem in same time with integrated results.

In a quantum computer the same processor performs operations on multiple inputs simultaneously (qubits and multiple qubits) and super position of different quantum states exists. The quantum computer offers the possibility of technology exponentially more powerful than current systems. The applications of quantum computing will benefit large section of society in the form of education, training, business as well as output of the industry requirements for the future generation socioeconomically and also industrial exposure in Quantum computing area to train the students in an innovative direction for the future generation.

TOPICS TO BE COVERED IN FDP

The topics include introductory concepts and advanced topics with practical demonstrations in the field of Blockchain. The following topics will be covered but are not limited to:

- Introduction to Quantum Computing with background of quantum mechanics
- Linear Algebra & Hilbert spaces
- Quantum single/Multiple qubit gates
- Bell State
- Teleportation
- Introduction to (QISKIT)
- Quantum Fourier Transform
- Introduction to Quantum Algorithm
- Hands on session Simon algorithm
- Quantum phase Estimation
- Grover's algorithm
- Shore's algorithm

RESOURCE PERSONS

Resource Persons will be from Renowned Institutions such as IIT's/NIT's, Industries and host Institution.

A Report on 5 day e-FDP on "Artificial Intelligence"

organized

from 22nd to 26th May 2020

A 5 day e-FDP on **"Artificial Intelligence"** was organized from 22nd to 26th May 2020 by Chaitanya Bharathi Institute of Technology (Departments of CSE, IT & MCA) in collaboration with Brain-O-Vision Solutions India Pvt. Ltd., through online mode (without any registration fee). As many as **625** participants joined us for the e-FDP from various organizations within and around Telangana state. The sessions were delivered through you tube links and also a separate link was provided for every organization for the convenience of participants.

The FDP sessions covered various aspects of Artificial Intelligence(AI), Machine Learning(ML) and deep learning(DL). The speakers enlightened the participants about the major drivers for the growth of AI in verticals such as automotive, finance and advertisement; implementation of AI models in real time and introduction to an AI framework-Scikit-Learn and its implementation in Python. The sessions proved to be truly insightful as we received positive feedback from the participants.

The event could not have been possible without the support of Dr.M.Swamy Das, Head of the Department, CSE; Dr.Suresh Pabboju, Head of the Department, IT & Dr.Lakshmi Srinivasa Reddy, Head of the Department, MCA.

We thank the Principal, Dr.P.Ravinder Reddy, for his instant response to proceed ahead with the event and his support and encouragement throughout the event, even through online mode.

We thank the management of Chaitanya Bharathi Institute of Technology, whose constant support and motivation, paved a path for the successful completion of the event.
