Dear Bharani,

It gives us great pleasure to extend you an offer to join Temperate Technologies! We would like you to join in the role of Mechanical Engineer. You are an impressive candidate, and we would be fortunate to have you on our team. Your strong problem solving and analytical ability, combined with your passion for working with sustainability-related issues, would make you an excellent fit for this position.

This letter contains relevant information regarding your offer.

**1. Term:** As with all our employees, you will start on a 6-month probation period with the expectation that it will extend into the permanent role if these months are successful. The probation period allows both the organization and the candidate to ensure that we have found a good fit. It does not, in any way, reflect a lack of confidence in your abilities. This probation period does not impact your compensation or responsibilities.

During the probation period, either party can terminate the contract without any notice. After the probation period, either party will provide two-month notice unless mutually agreed upon to extend or shorten the notice period. As we are a start-up and each employee possesses knowledge that is difficult to replace, we expect you to spend at least 36 months with the company.

**2. Responsibilities:** As a Mechanical Engineer, you will get technical projects relevant to your skills and training. These projects will involve prototype development, test setup development, manufacturing process development, analytical or numerical model development. Also, you will be expected to engage with potential customers, investors and other partners.

Beyond the specific core responsibilities as mentioned above, we expect that you will:

- Be an active contributor to company culture
- Work with management on financial reports
- Collaborate closely with other team members
- Provide support in varied areas beyond the job description, as needed

**3. Location:** The role is based in Hyderabad, with some local travel in and around Hyderabad in the beginning and potential travel pan-India on a need basis.

**4. Compensation:** We are pleased to offer you the following benefits, including:

- Salary: you will receive a base salary of INR 25,000 per month.
- Insurance coverage stipend: you will receive up to INR 5,000 per annum as reimbursement toward your choice of insurance (health, dental, vision) or gym/fitness membership.
- Annual bonus: the company offers a yearly bonus. The bonus is either 0%, 25%, 50%, 75% or 100% of one month's salary and depends on both individual and company performance.
- Equity: the company offers equity participation to deserving candidates who show excellent performance and commitment. Equity vesting typically starts upon completion of 12 months with the company. Details of the equity program will be shared at the time of equity grant.

Hyderabad

Dear Shravan,

It gives us great pleasure to extend you an offer to join Temperate Technologies! We would like you to join in the role of Mechanical Engineer. You are an impressive candidate, and we would be fortunate to have you on our team. Your strong problem solving and analytical ability, combined with your passion for working with sustainability-related issues, would make you an excellent fit for this position.

This letter contains relevant information regarding your offer.

**1. Term:** As with all our employees, you will start on a 6-month probation period with the expectation that it will extend into the permanent role if these months are successful. The probation period allows both the organization and the candidate to ensure that we have found a good fit. It does not, in any way, reflect a lack of confidence in your abilities. This probation period does not impact your compensation or responsibilities.

During the probation period, either party can terminate the contract without any notice. After the probation period, either party will provide two-month notice unless mutually agreed upon to extend or shorten the notice period. As we are a start-up and each employee possesses knowledge that is difficult to replace, we expect you to spend at least 36 months with the company.

**2. Responsibilities:** As a Mechanical Engineer, you will get technical projects relevant to your skills and training. These projects will involve prototype development, test setup development, manufacturing process development, analytical or numerical model development. Also, you will be expected to engage with potential customers, investors and other partners.

Beyond the specific core responsibilities as mentioned above, we expect that you will:

- Be an active contributor to company culture
- Work with management on financial reports
- Collaborate closely with other team members
- Provide support in varied areas beyond the job description, as needed

**3. Location:** The role is based in Hyderabad, with some local travel in and around Hyderabad in the beginning and potential travel pan-India on a need basis.

**4. Compensation:** We are pleased to offer you the following benefits, including:

- Salary: you will receive a base salary of INR 25,000 per month.
- Insurance coverage stipend: you will receive up to INR 5,000 per annum as reimbursement toward your choice of insurance (health, dental, vision) or gym/fitness membership.
- Annual bonus: the company offers a yearly bonus. The bonus is either 0%, 25%, 50%, 75% or 100% of one month's salary and depends on both individual and company performance.
- Equity: the company offers equity participation to deserving candidates who show excellent performance and commitment. Equity vesting typically starts upon completion of 12 months with the company. Details of the equity program will be shared at the time of equity grant.
