OFFICE AUTOMATION AWARENESS

Department of IT in association with NSS CBIT has organized **"Office automation awareness"** on **07-12-2018**. There were around 42 students who participated in the Office automation awareness.

Office automation (OA) is the collective term for the hardware, software, and operational procedures that allow for the automation of information processing and communication functions within an organization.

The Office Automation Awareness program's goal was to give participants a basic understanding of computers and the most utilized office software. Students were able to master office automation with the aid of this training.

ROAD SAFETY CAMP

Department of IT in association with NSS CBIT has organized **"Road Safety Camp"** on **08-02-2019**. There were around 30 students who participated in the **Road Safety Camp.**

Road Safety Camp was a concerted effort to educate, convince, and inspire a population to change their attitudes and/or behaviors in order to promote road safety. It used organized messaging using particular media channels within a set time frame.

 Our goal was to educate people about road safety so that they will drive more safely both now and in the future. This will help to lower the annual number of people killed and injured on our roads.

SAMPURNA E-VIDYA APP

2.1   Project Description

Project Goals and Strategy:

The main goal of the project is to ensure that the e-learning centers established by EWB-Hyderabad chapter in and around Hyderabad are being maintained and used efficiently. EWB Hyderabad chapter has installed many E-learning centers in various government school so as to provide students quality education and make learning process much easier. As a matter of fact anything that is installed would need proper maintenance for it to work on a longer run. The project aims at reducing the time taken to repair and proficiently use the E-learning centers which would in turn fulfill the mission of EWB-India. Additionally, we also aim at providing E-learning study material in the form of lecture and animation videos which will be beneficial for the students.

2.1.1   <u>Project Title</u>: **"Sampurna E-Vidya App"**

2.1.2   <u>Project Summary</u>:

In order to ensure that these e-learning centers are maintained and they are working properly we propose to develop an app.

- The app would consist of an admin login ID, a school representative login ID, and a professional chapter login ID.

- If there is any problem, the school headmaster can raise a complaint by logging into the app. This could also be done by the faculty who is dutifully responsible for the maintenance of the E-learning center.

- Initially, while registering into the app the details of the e-learning centers would be collected and a database of all required IDs will be created and maintained simultaneously so that a detailed record of the school would be available when a complaint is raised.

- Once a complaint is received, the school would be personally contacted and a mail about the same would be sent to the Hyderabad chapter.

- The location of the school would be identified and the nearest EWB-student chapter would look into visiting the school and solving the problem faced by them with the help of a professional chapter member within a week.

The schools would have to give an update on the current status of the e-learning center once in a month. In this process a complaint can be raised by the head master at any point of time regarding anything related to the E-learning center. If we do not get an update for 6 months, a field visit would be planned in order to know the reason behind it. Emphasis would be made on the need for using the e-learning centers.

- Through this app, we would also provide E-learning study material such as lecture videosand animations which are easily accessible and can be downloaded by the schools.

2.1.3   Needs to be addressed:
Check the specific services or needs addressed by this project.
- **Information Systems**
    - **- Computer service**

2.2   Project Impacts:
Many E-learning centers have been installed in past few years. These can be used to the fullest extent only when there is a proper maintenance of them. This project is a step towards digitalization of the available data which would give easy access to the current status of any E-learning center. This would have a huge impact on the time taken to rectify a certain problem and thus increase the efficiency of it. In addition to this, the study of the received data would help find the unseen flaws in the procedure and thus resolve them.

FUTURE SCOPE:
If this project runs successfully, we look forward to extend it in terms of 2 aspects.
- This project could be extended to the areas such as sanitation, health and water needs of these schools.
- It could also be extended to the E-learning centers installed under other professional chapters in India.

2.3   Beneficiary Group(s) Information for Project:

2.3.1   Primary beneficiary of project:
Students studying at the schools in which E-learning centers have been established are primarily benefitted by this project.

2.3.2   Beneficiary Information:
Language Spoken- Telugu, Hindi & English.
Culture- Multi cultural
Religion- Hindu (Majority), Muslims and Christians

2.3.3   Project Ownership:
a. Who is expected to own this proposed project?
EWB - Chaitanya Bharathi Institute of Technology and EWB-Hyderabad chapter.

b. Will a committee be established?
Yes.

c. Who will manage and be responsible for the maintenance & repairs?

 All the technical aspects such as developing and maintenance of the app and database management would be done by EWB-CBIT with financial aspects being taken care by EWB-Hyderabad professional chapter.

2.3.4   Project Accessibility:

a. Will the proposed project be freely accessible to all persons in the local area, or will it be restricted for use by certain groups?

Yes. The project is accessible to all the schools in which e-learning centers are installed by EWB - Hyderabad chapter.

b. Will a fee structure be involved?

No

c. Who will decide on the amount of the fees, and who will collect the fees?

No fees is collected. So, no one is appointed to collect the fees.

2.3.5   Project Sustainability:

As the project principally includes the usage of an app, it has the potential to survive endlessly. Minor changes and apprises to the app would help us in keeping it updated.

2.3.6   Project Financials:

a. Include estimated costing towards materials, labor, administrative and other expenses.

If there is a complaint raised by schools, needed funds would have to be provided by EWB- Hyderabad chapter and few funds will be needed to install app in Play Store for accessibility.

b. How the project funds will be met including the inputs from the proposer.

For the app development initially funds would be needed and for any further changes, we will generate our own resources. Financial aid would be required from EWB Hyderabad to answer the complaints and make necessary repairs.

c. Will the beneficiaries also make a contribution in terms of money/labor etc?

The beneficiary will make their contribution in terms of labor (to some extent).

2.3.7   What is expected from EWB – India?

EWB-India is expected to look into the mails which would include the details of the complainant and the financial aid necessary to help them. It is expected to provide financial support directly or indirectly for the project.
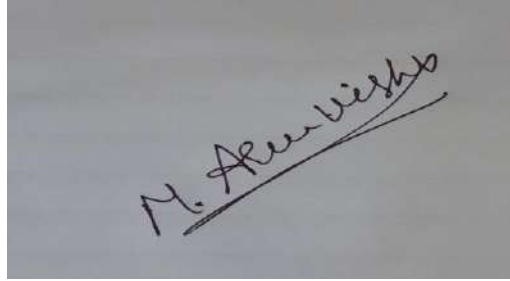

2.3.8

**Applicable only to proposals from NGO/Society/Community/
Organization (CSR).**

• Role of the Chapter getting associated with the Project (include details of persons who will be involved from the chapter, project leader from the chapter, inputs being provided by the chapter including financial, if any etc.

3.1   <u>Additional Information</u>: Please add any other information you think is relevant to this Program/project.

LETTERS SUBMITTED:

ENGINEERS
WITHOUT BORDERS
India

(Regd. No. 1379/2005 under the Andhra Pradesh Societies Registration Act, 2001)

To
District Educational Officer (DEO)

Dear Sir/Madam,

EWB Hyderabad is a Non-Profit NGO established under EWB India chapter which works in fields of providing good education, sanitation, basic needs and many more for Government schools and Trusts. This year we are working with the mission of providing good education to children through E-Learning centers and we have crossed milestone of 40 centers in Telangana and Andhrapradesh.

EWB Hyderabad chapter is organizing an event "Gnanothsav'17" in collaboration with CBIT and MJCET student chapters. This event includes science expo, quiz and many other competitions specifically for government school students of all grades.

The event is being organized to create interest to students in science and Math's in government schools. This event will provide a platform for the students to showcase their Science skills and also get some Hands-On experience on projects and knowledge they earn through classrooms.

This event will be done in 2 phases
- Phase-1:- Prelims in their own respective schools (1 week before finals) out of which top teams will be selected for finals.
- Phase-2:- Finals will be in MJCET campus on September 9th where the selected teams will compete with all other teams selected from various schools.

Participation is free to all students. Final Event is a one day event and transport will be provided from respective school common points to event place by EWB only. All the participants will be awarded with certificates and rewarded with prizes.

We request you to kindly encourage students and permit the schools that are ready in your region to use this opportunity and exhibit their best in the

ENGINEERS WITHOUT BORDERS India

(Regd.No. 1379/2005 under the Andhra Pradesh Societies Registration Act, 2001)

To
Mandal Educational Officer (MEO)

Dear Sir/Madam,

EWB Hyderabad is a Non-Profit NGO established under EWB India chapter which works in the fields of providing good education, sanitation, basic needs and many more for Government schools, Trusts and needy. This year we are working with the mission of providing good education to children through E-Learning centers and we have crossed the milestone of establishing 50 centers in Telangana and Andhrapradesh.

EWB Hyderabad chapteris organizing an event,"Gnanothsav'18" in collaboration with CBIT and MJCET student chapters. This event includes science expo, quiz, interactive sessions, junk art, think beyond and many other competitions especially for government school students of all grades excluding class 10.

The event is being organized to create interest in students in science and math. This event will provide a platform for the students to showcase their Science skills and also get some Hands-On experience on projects and knowledge they gain through classrooms.

This event will be done in 2 phases

- Phase-1:- Prelims in their respective schools (1 week before finals), out of which top teams will be selected for finals.
- Phase-2:- Finals will be in MJCET campus in the month of February, where the selected teams will compete with all other teams selected from various schools.

Participation is free to all students. Final Event is a one day event and transport will be provided from respective school common points to event place by EWB only. All the participants will be awarded with certificates and winners will be rewarded with prizes.

We request you to kindly encourage students and permit the schools that are ready in your regionto use this opportunity and exhibit their talents in the competitions. Students will get to meet and interact with highly educated professionals and college students.

Sincerely

Team EWB

<u>Young Reporter</u>

Objectives: Investigate, Propose Solutions, Report

1. **Investigate** a local problem or issue:

- Identify, define and communicate a local cleanliness related environmental problem and/or issue.
- Investigate (look up, compare, interpret, evaluate) relevant information from primary and secondary sources.
- Identify key individuals and groups and find out what their different perspectives on the issue are, their approaches to resolving it and their assumptions and goals.
- Conduct original research, such as surveys/questionnaires, and interview key individuals or groups to obtain first-hand information.
- Cover relevant historical, economic, social and/or political implications and possible consequences of the problem or issue.
- Link the local cleanliness related environmental problem and/or issue to the bigger global picture (problem).

2. **Propose solutions** to a local problem or issue:

- Identify possible solution or solutions to the problem and/or issue and evaluate its likely effectiveness, giving reasons for and against (pros and cons).
- Develop and propose a solution and justify it.

3. **Report** on a local cleanliness related environmental issue and its possible solution through a story targeting local audience:

- Identify your target audience and choose the best way to reach and communicate with them, i.e. which media do them read/watch/listen to?
- Plan how will you report the problem and/or issue (who need to be informed?

how? when?) and use the appropriate journalistic format and style to do it.

- Create an article, photograph, photographic essay of up to 4 photographs that documents the problem and/or issue; suggest a solution wherever possible.
- Take a positive approach to inspire change and find a solution.

GUIDELINES

"I keep six honest serving-men, (They taught me all I knew); their names are what and Why and When, and How and Where and who" - Rudyard Kipling

What are the Five W's and One H? They are Who, What, Why, When, Where and How. Why are the Five W's and One H important? Journalism purists will argue your story isn't complete until you answer all six questions. It's hard to argue this point, since missing any of these questions leaves a hole in your story. The concept is pretty simple, while reporting, be it a written report, audio note or video, one just has to ensure the report covers the 5 W's and 1 H about the story.

Even if you aren't a reporter, you can still use these questions to help you brainstorm for ideas and map out an outline for your content.

Below is a list of the questions and some possibilities for each. The questions provided are as general as possible in order to provide a guide that you might use for any topic. For that reason, they may seem a little strange unless you have a specific topic in mind.

Who

• Who is involved?

• Who is affected?

• Who will benefit?

• Who will be harmed?

What

• What is your topic narrowed down in a simple phrase/sentence?

• What does your topic involve? (I.e. what are the different parts in it?)

• What is it similar to / different from?

• What might be affected/changed by your topic?

When

• When does this take place? When did this take place? When will it take place? When should this take place?

• Does when this takes place affect the topic?

Where

• Where does this take place? (Where did it …. Where will it … Where should it ….?)

• Does it matter where it takes place? Is it affected by location? Why?

• Why is this topic important? Why does it matter?

• Why do certain things happen? (What are some causes and effects within the topic?)

How

• How does this topic work? How does it function? How does it do what it does?

• How did it come to be?

• How are those involved affected?

There is another question that I will throw in here: "What if?" What if is not a question a reporter would typically use, not in the lead paragraph anyway, but it's often an excellent question to ask for other types of situations.

What If

• What if everything worked as it should?

• What if everything didn't work as it should?

• What if this topic didn't exist?

Junk Art

CAPPING

- Each team must consist of a minimum of 2 members or a maximum of 3 members.
- Team members may not necessarily be from the same class.
- Time: 2 to 3 hours
- Topic : No specific theme or topic
- Place: MJCET campus

RULES AND REGULATIONS

- Participants are supposed to report to the organizer 15 minutes before the commencement of the event.
- All teams will begin work simultaneously upon the commencement of the event and will have 2 hours to complete the work.
- Junk can also be brought by the participants besides the junk provided by the organizers.
- The major junks that will be provided are - **bottles, newspapers**.
- Participants under no condition are allowed to take their work home.
- Participants should bring glue and other stationery materials required from home. Basic stationery will be provided.

NOTE:

Best models will be publicly displayed in our college permanently.

<u>Session Interaction</u>

Objectives: Interact, Ask, Analyse, Explore

A classroom without interaction is same as learning how to swim without getting into water. This session mainly focuses on how well students interact with each other.
Ideas are worthless until you get them out of your head to see what they can do.
When students have opportunities to communicate with each other, new ideas and experiences come into picture which would help them to learn something new and effectively plan for their future.
 The main objectives of the event are to:

- Have a fruitful interaction between students.
- Clarify career related doubts.
- Explore upon career options after intermediate.
- Get awareness on different branches of engineering.
- Improve confidence and reduce stage fear.
- Ask various queries.
- Learn from the experiences of senior students.
- Learn to analyse the options given to us.
- Discover innovative ideas coming from the creative minds.

Guidelines

"For good ideas and true innovation, you need human interaction, conflict, argument, debate."

Margaret Heffernan

Innovation starts with interaction. This is a platform for young minds of school to interact with enthusiastic minds of college.

The discussions may focus on:

- Understanding the role of an engineer in the society.
- To know the basic difference between having knowledge and applying it.
- Innovative ideas from the younger generations.
- Ways to tackle with failure.
- Ways to improve concentration.
- How to prepare for entrance exams.
- Main points of focus in an exam.
- Importance of co-curricular activities.
- Role of professors in student life.
- Accepting challenges.
- Increasing confidence level in students.

QUIZ

Quench your thirst for knowledge

Battle of Brains, an event formulated to bring out the hidden talent of quizzing amongst the school students.

Quiz is an inter school event. This is an opportunity for students to participate and get an exposure on various events and topics. The event is framed in a way, which gives an introduction to various areas.

The Team

This event happens in two categories.

Category 1:

Team juniors

- This team will consist of 3 participants
    - o   Participant 1: Grade 6
    - o   Participant 2: Grade 7
    - o   Participant 3: Grade 8

Team seniors

- This team will consist of 2 participants
    - Participant 1: Grade 9
    - Participant 2: Grade 10

Only registered teams can participate on the day of event. A school can produce maximum of 5 teams. Three teams from one category and two teams from the other category. Names can be enrolled to the Faculty in charge of the institution.

The Quiz Rounds

School level Prelims

Round 1:

- This will happen standard wise
- Question paper will be given to every one
- Individual event
- Top people will qualify for second round

Round 2:

- This round consists of 30 questions, written test.
- Questions shall be from general knowledge, covering almost all the topics.
- Paper and Pen will be provided.
- Questions will be explained both in English and Telugu.
- Each question will have time limit.

Top 6 teams will qualify for the finals

Round 3: The Finals

- This round consists of 10 sub rounds.

- Buzzer round, timed.
- Each question will be timed.
- Based on the scores, the winners and runners will be declared.

Science Expo

Students can show their expertise in their area of interest, can bring out various scientific projects and models, preferably non-static models. They will be given space to display their work and they shall explain the work to the judges and the guest. They will be judged based on the intensity of idea of their work on the topic that they have selected.

Additional Data

- The teams will be selected in the prelims that will happen before the final day.
- A school can be represented by 6 teams maximum.
- Three can be the maximum strength of the team.
- The students will be mentored by the members of student chapter.
- Every team will be provided with the table and other requirements on the day of event.
- Any requirement such as electricity should be informed before the event.
- Make yourself safe when working with electricity and other dangerous equipments.
- Total of 6 awards.
  - Winners
  - Runners 1
  - Runners 2
  - Creative Idea
  - Best Presentation
  - Special Award

Category 1: Class 6th, Class 7th and class 8th

Category 2: Class 9th and class 10th

Evaluation Criteria:

- The Creativity of model

- Way of explanation

- Understanding of concepts

- Presentation

Think Beyond

Think beyond is more than a competition that connects students to develop ideas to tackle the pressures on the world's **Food, Water, Energy, Waste** and **Transport** resources. It's an exciting journey of learning and discovery. Collaborate with like-minded innovators, experts and mentors to expand your horizons

Topics

- Food

- Water

- Energy

- Transport

- Waste

Eligibility

- The awards are open to any school.

- Students from Standard/Grade 6th to 10th are eligible to participate.

Participation

- Each institution can send three entries.

- Students can form teams consisting strictly of minimum 2 members and

maximum 5 members. The team will have a teacher as a coordinator/facilitator or Student mentors from EWB with primary contribution, ownership, and representation coming primarily from students.

- Teams should ideally consist of participants across classes/groups from the same school.

Judging Criteria

Our team of experts will review every idea. They need to be able to assess the strength of each idea and consider how well the submission answers the following questions. To help you, we've included some guidance of what you will need to consider.

Novel: How novel or original is the idea?

Your answer should include: What existing idea could yours be compared to and why is your idea different? Why is your idea innovative?

Do-able: How easy is it to achieve the idea?

Think about How do-able, achievable or feasible is this idea? What are the obstacles; be realistic and what would you need to deliver this.

Value: What benefits (business/social/etc.) would the idea deliver? What is the potential value of this idea?

Consider the wider value whether it's financial, political, social or technology etc.

Relevance: How relevant is the idea to the Food/Energy/Water topic?

Many of the ideas touch more than one of the topics, so please consider this in your answer. Greater the relevance, greater the impact.

Image

A picture can tell a thousand words, so this year, our reviewers have asked for the image to 'represent' your idea. You can be creative as you like, but remember, this could make or break your entry. A diagram or drawing of your idea, well-illustrated, may be a lot easier to understand than trying to explain your idea in a few hundred words.

Examples:

GREEN ROOFS

To address the growing concern of energy and water scarcity, an idea can be proposed to paint the roofs with a white paint of high quality such as Insulted so that it reduces the temperature inside the house and lowers the current costs as well as helps in accumulating the rainwater. It has been carried out successfully in certain rural parts of Tamil Nadu as part of a research with British Council & TERI and is very doable. As the solution involves saving both current (energy) as well as helps in rainwater harvesting (water), it is a very relevant and cheaper solution in the market.

TRANSPIRATIONAL CAR ROOFTOP

It's a sunny summer day. A car will become too warm after leaving it under the sun for merely half an hour. The unbearable heat would prompt to instinctively turn on the air conditioner at full blast. And, it is only when the car temperature is more endurable that journey can be started. Later many other stops may come in the way. Thinking that it won't take long, one may decide to put the car at idle to prevent it from getting warm. One good solution lies in revolutionizing the design of car cabinet. What if the cabinet can transpire and allow heat to be carried away by evaporation of water without using any fuel or electricity, very much similar to how plant cools itself?

'e-Ankuram' is an event which was celebrated on remembrance of Mahatma Gandhi on his 150th birth anniversary. This event was designed for the government school children where over 200 students are participants which is for their exposure to the inter school competitions and to improve their various skills of confidence, communication, memory.

With the funding of EWB India, EWB Hyderabad professional chapter and EWB CBIT student chapter came together to organize this remarkable event at ZPHS and Chaitanya Bharathi institute of Technology, Gandipet.

This event was conducted in three phases:
1. At schools of ZPHS
2. At CBIT
3. Final celebrations at KGNMT, Hydershakote

- **Phase 1**: On 29th December 2018, the EWB teams made into groups were set to conduct the competitions of Painting, Quiz and Essay writings at 20 ZPHS(5 students per each class from 6 to 9 grades) in Rajendra Nagar mandal. This phase was successfully completed with the enthusiasm of the students
- **Phase 2**:
  On 5th January 2019, We organized to conduct the competitions of Debate and Elocution at CBIT with the immense support of Principal-CBIT and Faculty advisors-EWB CBIT.
  There was exposure to the knowledge and skills to all the attendees of the event.
  The day started with inaugural session at 11:15am.The list of chief guests:
  1. Sreenivasa Sarma, Director of student affairs
  2. Padmavathi, Ho Telangana state KGNMT
  3. Dr. Suresh Babu, Head of the department-EEE
  4. Dr. P.V. Prasad, Faculty advisor- EWB CBIT and COE
  5. Dr. M. Koli Reddy, Head of the department-Civil
  6. Mr. Thirupathaiah, Faculty advisors-EWB CBIT

The guests addressed the gathering and there was an interactive session with the students.The inaugural session was continued till 12:30 pm, then the students of debate were sent to the lunch and elocution was held in the L Block, CBIT. And after the election, the remaining students were sent to have lunch till 2:30pm.

Competitions were held as per the schedule and lunch was arranged to everyone present.

- The Elocution for 69 students from 18 schools was conducted in 2 rounds and bilingually in English and Telugu where the students spoke excellently about the thoughts and life of Gandhiji which inspired everyone.
- The other competition of Debate for 79 students from 18 schools was conducted in which the students proved that the language is not a barrier to express the opinions and thoughts. In the final round it was extraordinary debating skills showcased by the students.
- The return gifts to the students and teachers were distributed
- The day of the event was successfully ended at 5:00pm with all the joyful faces of the students and their teachers for giving them the opportunity to participate in e-Ankuram.
