ABOUT COLLEGE

CBIT is one of the premier Engineering Institutes in India, a pioneer in technical education in the state of Telangana. It is located in idyllic surroundings of Gandipet lake, Hyderabad offering a conducive learning environment. The college offers 9 UG and 11 PG programs. It has been standing as a temple of knowledge for the past 41 years and produced eminent and skillful engineers, spread all over the globe. CBIT is an autonomous institution under UGC from 2013 and accredited by NBA-AICTE and NAAC-UGC. The institute has received research grants to the tune of Rs. 2.5 Crores from various funding agencies such as AICTE/UGC/DST. Brilliant and meritorious candidates with good EAMCET ranks seek admissions at CBIT. The students are prepared and perfected to secure placements in MNCs through college Career Development Center.

ABOUT THE DEPARTMENT

The Department of Civil Engineering was established in the year 1979 with the inception of the institute. The department offers a four year Bachelor's Degree program in Civil Engineering and two year Master's Degree program in Structural Engineering.

In total there are about 500 students pursuing Bachelor's degree and 50 students pursuing Master's Degree in the Department. Many of the faculty members hold higher degrees from reputed institutions from India like IITs, NITs, IIITH and State Universities and abroad. The department of Civil Engineering has three missions such as excellence in teaching and research; relevance to industry and society; contribution to sustainable development. The department is well equipped with state of the art laboratories to cater the needs of teaching, R&D and consultancy. The faculty of the department strive hard to impart the latest technical knowledge to the students and conduct quality research. The faculty offer technical services on live engineering problems to various Government and Private organizations.

OBJECTIVE OF THE WEBINAR

Engineers can play an important role in sustainable development by designing and planning and constructing projects that preserve natural resources, are cost-efficient and support human and natural environments. A closed-loop human ecosystem can be used to illustrate the many activities of engineers that support sustainable development including repair and maintenance expenditure for an infrastructure project can be optimized with durable materials and construction methodologies. Sustainable designs are made in buildings to reduce heating and cooling costs by using less energy, which in turn helps the environment. Engineering new ways to build infrastructure can help reduce the impact on the environment. There are many ways to use sustainable design in civil engineering. The use of sustainable material will help in energy conservation and achieving infrastructure more eco-friendly.

The intention of this webinar is to provide a forum for civil engineering professional community to share and acquire knowledge in the areas of sustainable development in the construction industry, sustainable concrete materials, composites, technologies, and innovations.

"A Lister" Student Program

Agenda

All about an A Lister

Recruitment Process do?

Onboarding A Lister and Path

Values to Automation Anywhere

Who is an A Lister ?

What does an A Lister do?

Acts as a liaison between Automation Anywhere, the student community and the university

Organizes and promotes programs and events

Creates awareness for Automation Anywhere products and brand on campus and social media

Inspire future generations of University students by sharing AAU experiences

A lister incentive milestone

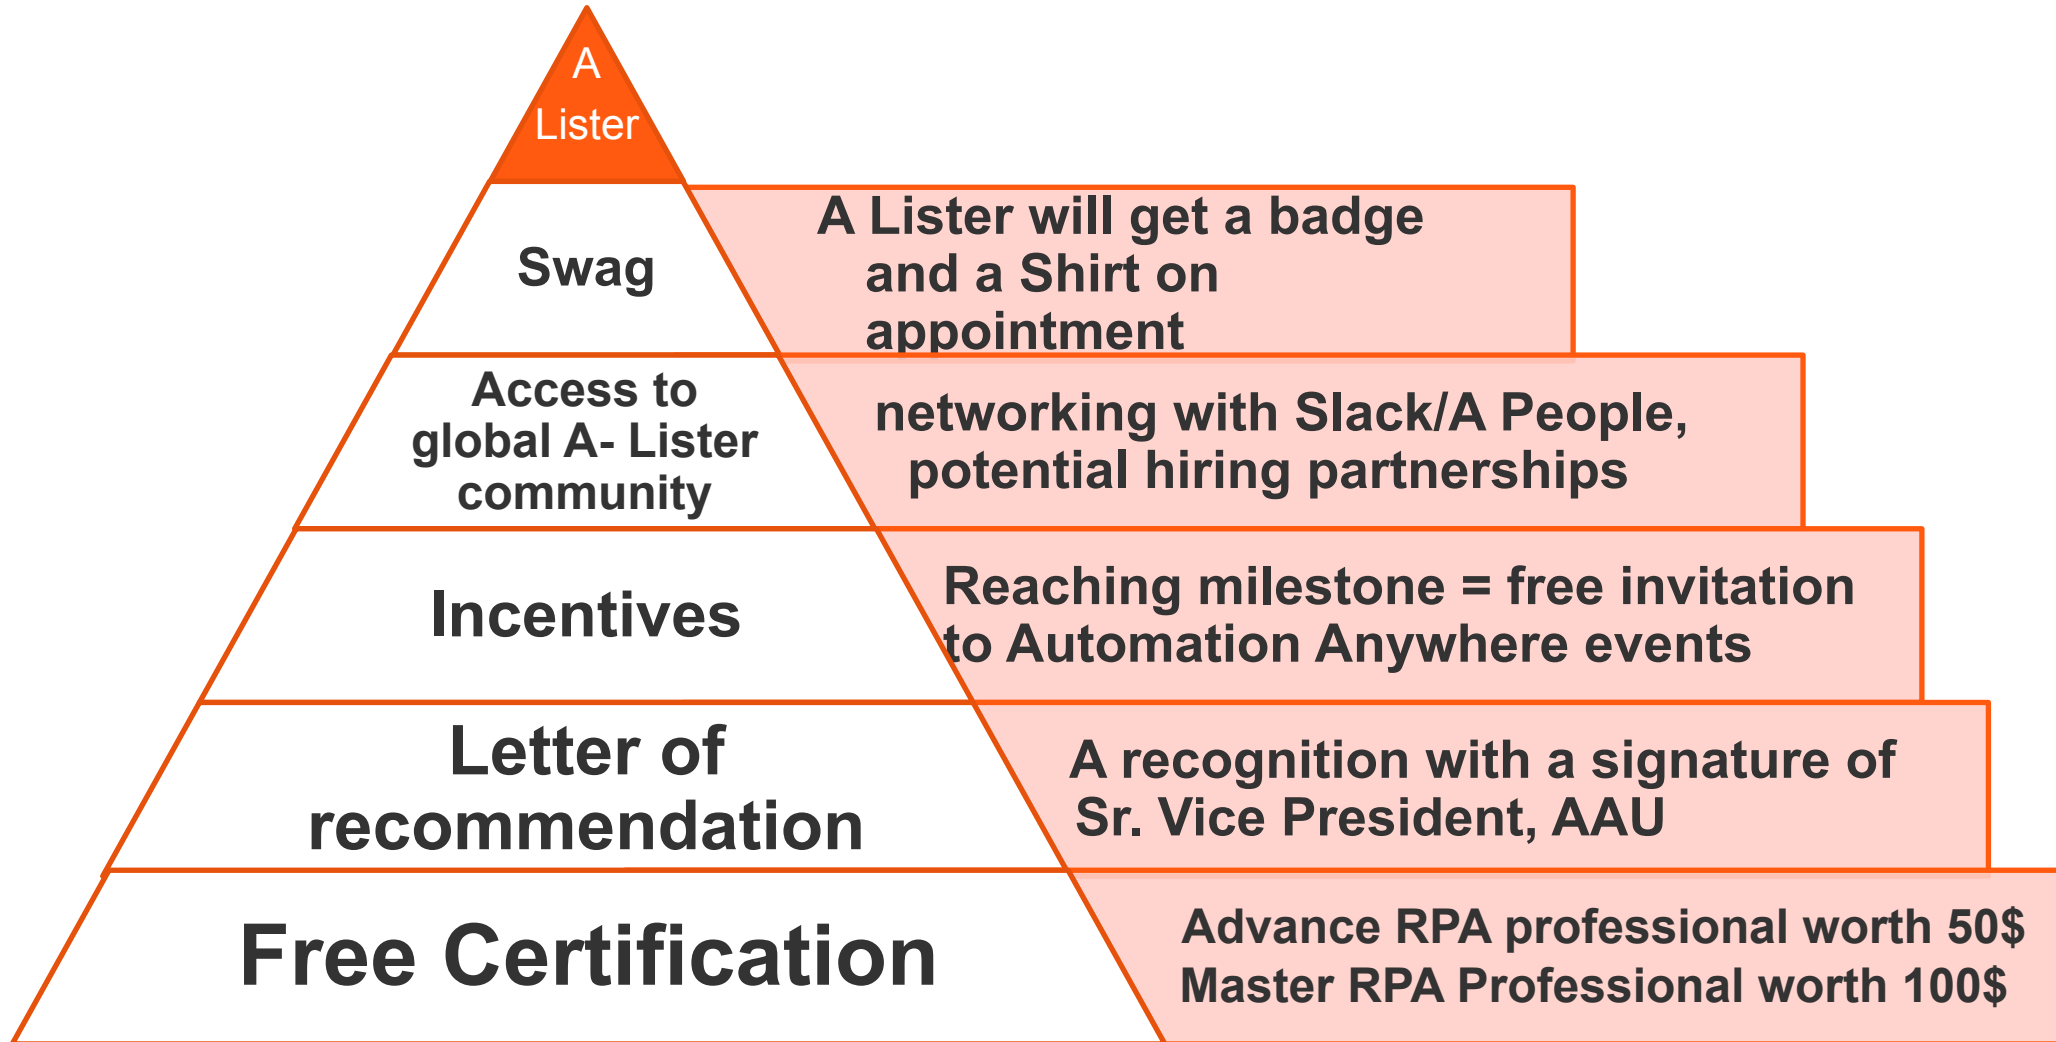

Increase adoption of
Automation Anywhere courses
in the student community

Enroll more students on
E-learning and drive class
room and virtual trainings at
campus

Build and share student
testimonials and video bits on
RPA projects on social media
via FB, Insta Etc

What an A Listers get ?

Onboarding A Lister and Path

Eligibility

- Must be a current student at an accredited post-secondary education institution
- At least one full year of studies left

Onboarding

- Onboarding webinar with AAU Team and other A Listers (or a synch AAU course)

Campus activities

- Event kits to arrange and promote a minimum of one Build-a-Bot per semester/term
- Kit to include events and activities guides and path to incentives
- Swag store access (Optional)

Abstract

Flavonoids are the secondary metabolites synthesized by microalgae and have diverse applications in various fields. The present study compares among two microalgal strains, *Chlorella vulgaris* (CV) and *Chlorella pyrenoidosa* (CP), for the production of flavonoids and lipids, which were cultivated in mixotrophic as well as autotrophic modes. This study also focuses on the role of L-phenylalanine as a supplement to enhance flavonoids. The current work establishes the relation between nitrates, external carbon, and L-phenylalanine for enhanced production of flavonoids and lipids. The extracted flavonoids were found to be

Abstract

Modern industrialization has originated a tremendous industrial growth. Discharge of industrial effluent is a critical threat to a safe environment. Removal of various pollutants from industrial wastewater is obligatory for controlling environmental pollution. Bioremediation using biotechnological interventions has attracted greater attention among the researchers in the field of control and abatement of environmental pollution. This review is
