**About CBIT(A):** Chaitanya Bharathi Institute of Technology (Autonomous) has an ecosystem which caters to Research, Consultancy, Start-Ups, Incubations, Strategic Collaborative Association with Industries and Foreign Universities. The Institute is pioneering the development of an Artificial Heart in Collaboration with SHARE India / Pittsburgh University and Cornell University, USA. CBIT(A) has been standing as a temple of learning for the past 42 years. UGC has granted Autonomous status from the Academic Year 2011-14 onwards. The Faculty and Students have successfully executed Sponsored Research and Consultancy Projects, from various funding Agencies such as DRDO, ISRO, DST, AICTE and IIGC. MHRD - Institute Innovation Cell (IIC), MSME - Business Incubation (BI), Hexagon 3D Innovation Lab, Cognate Innovation Lab and Robotic Process Automation Lab have been established in the Research and Entrepreneurship Department, for the Students and Faculty to pursue their Research interests.

**About CSE Department:** The Department of CSE was started in the year 1983 with an intake of 20. The intake was gradually increased to 180 with three sections. M.Tech programme was started in the year 2002 with an intake of 18 and increased to 36 in 2011. CSE department is a recognized research center under Osmania University. The department comprises of committed and well qualified staff. The intellectual ambience in CSE Department is conducive to the overall development of the students and the discipline of Computer Science and Engineering as a whole. During the year 2020-21 sanction is accorded for two new programmes in emerging technologies: B.E (CSE with AI and ML) and B.E (CSE with IoT, Cyber Security with Blockchain) thus enhancing the intake of students from 180 to 300. The vision of CSE Department is to become a centre of excellence in the field of Computer Science and Engineering that produces innovative, skillful, socially responsible and ethical professionals.

**About Workshops in this Five-Day International e-workshop on "Building Data-Driven Solutions Using Data Analytics with ML and DL Algorithms",** the topics included are challenging areas with potential for excellent research. The takeaways from this workshop will add immense value to the knowledge base for each of the participants. This workshop will be based upon hands-on approach. Topics included in this workshop are NLP, Data science (Data preprocessing, EDA, Model Building, Model accuracy and model deployment) and computer vision.

"Humans can typically create one or two good models a week. Machine learning can create thousands of models a week." - Thomas H Davenport, Analytics thought Leader

**Objectives of the Workshops**

- >To create awareness on Data Analytics and EDL using AI Algorithms.
- >To provide instructor-led hands-on live manipulation of Data.
- >To provide hands-on experience over Data Analytics using ML and DL.
- >To acquaint the participants with Research Opportunities in Data Science and Computer Vision.

**Expected Outcomes**

- Upon successful completion
  - The participants will be acquire the concepts of data analytics and various tools related to data manipulation.
  - Use the EDA to represent the data after preprocessing and analysis of data.
  - Formulate the Research problems in Data Science, NLP and Computer Vision.

**Guidelines for Participants**

RE: Naganjan Malladi is presenting

### Words of wisdom...to set the context

*Bitcoin is a remarkable cryptographic achievement, and the ability to create something that is not duplicable in the digital world has enormous value.*  
Eric Schmidt, CEO of Google (2001-2011)

*Whereas most technologies tend to automate workers on the periphery doing menial tasks, Blockchain automates away the center. Instead of putting the taxi driver out of a job, Blockchain puts Uber out of a job and lets the taxi drivers work with the customer directly.*  
Vitalik Buterin, Co-Founder of Ethereum

*Anything that can be conceived of as a supply chain, Blockchain can vastly improve its efficiency- it doesn't matter if its people, numbers, data, money.*  
Ginni Rometty, CEO IBM (2012-2020)

The Institute offers Eleven UG and Eleven PG Programs into which Brilliant and Meritorious Candidates with good EAMCET Rank are seeking admissions in CBIT. CBIT Students are prepared and perfected holistically to secure Placements in reputed National and Multi-National Industries. Alumni, nearly 25,000 Graduate Engineers, are successfully placed in their Careers and as Entrepreneurs Globally. The Institute has been granted Autonomous Status from the Academic Year 2013-14 onwards.</p>  <p><b>ABOUT THE DEPARTMENT</b></p> <p>The Department of CSE was started in the year 1985 with an intake of 20. The intake was gradually increased to 160. From this academic</p>	<p>year (i.e. 2020) we have started Two new programmes in emerging technologies like B.E (CSE with AI and ML), with an intake of 60 and B.E (CSE with IoT, Cyber Security with Blockchain) with an intake of 60. Thus, increasing the intake of UG students from 180 to 300. M. Tech programme was started in the year 2002 with an intake of 18 and increased to 36 in 2011. CSE department is a recognized research center under Osmania University. It has centers of excellence in the areas of AI&amp;ML, Cyber Security, and IOT. The department is having committed and well qualified staff. The intellectual ambience in CSE Department is conducive to the overall development of the students and the discipline of Computer Science and Engineering as a whole. The vision of CSE Department is to become a Centre of Excellence in the field of Computer Science and Engineering that produces Innovative, Skillful, Socially Responsible and Ethical Professionals</p> <p><b>ABOUT THE STTP</b></p> <p>This STTP will enable the participants to acquire knowledge in the data science arena through bigdata analytics and cloud environment without the need to rely on licensed software's. It also intends to enhance the practical skills of the participants in the use of modern analytical tools to explore data science aspects with respect to bigdata. The participants will be able to upgrade their teaching-learning skills with the most up-to-date tools and techniques in the bigdata domain and they will also be able to enhance the quality of research publications by integrating their ideas with latest tools in data science via freely available open source resources.</p>	<p><b>TOPICS TO BE COVERED IN STTP</b></p> <p>It includes Introductory concepts as well as advanced topics in the field of Data Science for Bigdata Analytics in Cloud using Advanced Tools. - Getting data may include simply accessing an Excel file, scraping data from an HTML table, or using an API to access a database.
- Cleaning data may include reshaping data from a wide to long format, parsing variables, and/or transforming variables to different formats.
- Transforming data may include filtering, summarizing, and applying common/uncommon functions to data along with joining multiple datasets.
- Visualizing data may range from common static exploratory data analysis plots to dynamic, interactive data visualizations in web browsers.
- Modeling data can be descriptive, predictive, and prescriptive analytic techniques.

- Getting data may include simply accessing an Excel file, scraping data from an HTML table, or using an API to access a database.
- Cleaning data may include reshaping data from a wide to long format, parsing variables, and/or transforming variables to different formats.
- Transforming data may include filtering, summarizing, and applying common/uncommon functions to data along with joining multiple datasets.
- Visualizing data may range from common static exploratory data analysis plots to dynamic, interactive data visualizations in web browsers.
- Modeling data can be descriptive, predictive, and prescriptive analytic techniques.

The Infosys InfyTQ Certification is a technology accreditation that endorses your industry-readiness. It is an exam which tests the students knowledge in Programming and Databases. Upon clearing the exam, students get certified as Infosys Certified Software Programmer. The biggest benefit is that students get an interview opportunity for the Systems Engineer role at Infosys. Students with B.E., B. Tech, M.E., M. Tech., M.Sc., MCA students graduating in 2022 are eligible.

**InfyTQ Exam Process:** The exam consists of 3 rounds.

Round	Details on what's tested
Qualifying Round	Programming, Database Management and Aptitude.
Final Round	Upon clearing the Qualifying Round, you enter this Round. This is the final Infosys Certification, which will test your in-depth Programming and Database Management expertise through objective and hands-on questions. Scoring 65% or above means you get: 1. The Infosys Certified Software Programmer certificate 2. A direct opportunity to appear in the behavioral interview for the Systems Engineer role at Infosys
Advantage Round	Optional for those who clear the Final Round (scoring 65% or above) A test which will assess programming and other technical skills Clearing this round means an interview opportunity for Power Programmer and System Engineer Specialist roles at Infosys. You will be taken to a virtual interview to test your technical and behavioral skills.

**InfyTQ Exam Pattern: Pattern for Qualifying Round:**

sections	What's tested?	No. of questions
Section I	Java/ Python*	20
Section II	Database Management System	10
Section III	Aptitude	10

Based on the programming language selected at the time of booking a test slot for the Qualifying Round.

- Total test duration: 3 hours
- No negative marking in this round
- If students score 65% or above, you get certified as Infosys Certified Software Programmer. You will also receive an opportunity to appear in a behavioral interview for the Systems Engineer role at Infosys.

**Pattern for Advantage Round:**

- 3 programming questions of varying difficulty level, to be answered in 3 hours.
- Each question will have different weightage of marks
- In addition to the programming language (Java/Python) selected at the time of booking a test slot for the Qualifying Round, you will have the option to attempt this round in other languages also.
- Candidates who clear the Advantage Round will get a pre-replacement interview opportunity for either Power Programmer or Systems Engineer Specialist role based on their performance in this round. The interview for these roles will assess the technical and behavioral skills of the candidate.

## A report on Guest Lecture conducted by Department of Biotechnology CBIT on 12<sup>th</sup> February 2021

---

Department of Biotechnology organized a Guest lecture on 12<sup>th</sup> of February 2021. The program was initiated under the leadership of Dr. Y.Rajasri, Associate Prof. I/C HOD Biotechnology department, CBIT, with a motive of bringing about innovations in the field of Entrepreneurship for Biotechnologists. The event comprised of ‘an invited talk by guest speaker **Dr.Zahoorullah.S.MD**, Chief innovation officer, ATAL Incubation Centre, ALEAP Industrial estate JNTU, Kukatpally, Hyderabad.

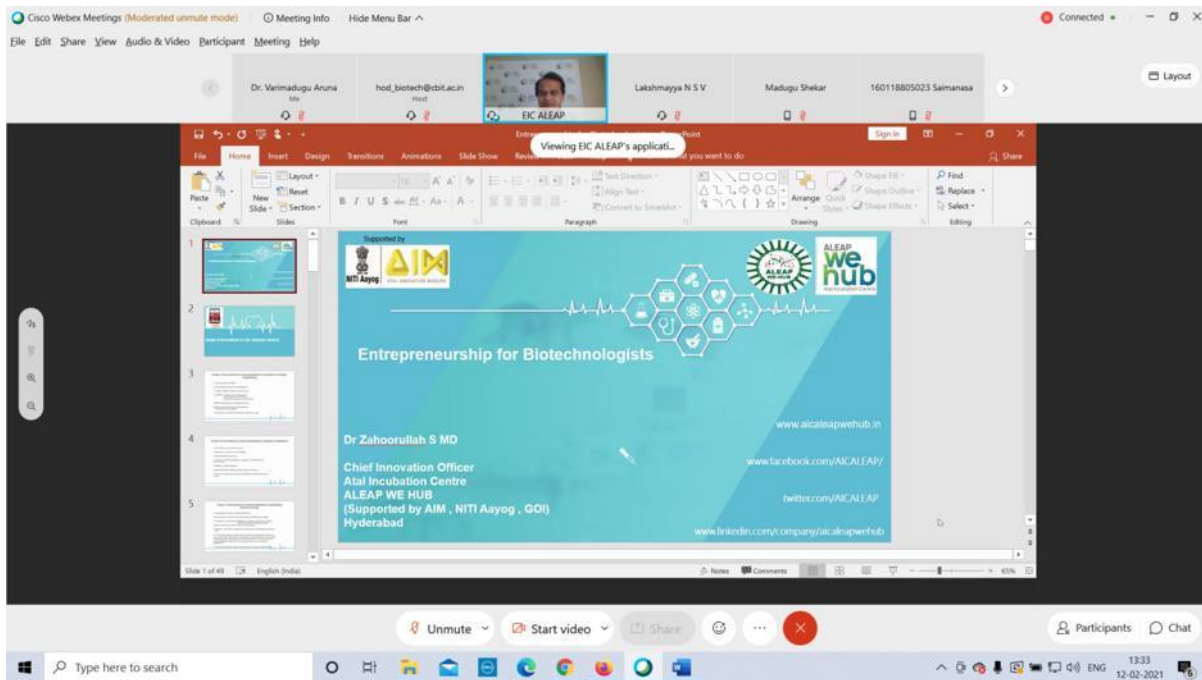

The title of the talk was “Entrepreneurship for Biotechnologists “Dr. Zahoorullah.S.MD opened his talk by questioning and describing “What is Entrepreneurship?” and “What are different opportunities for biotechnology students?”. The talk/interaction was gradually built up towards the point that ,in the present day one should learn to see possibilities everywhere. And this very mindset, many a times, serves as an answer, or more so an alibi, towards questions posed on everything starting from handling different kinds of opportunity identification and evaluation and different techniques to evaluate resource requirements.

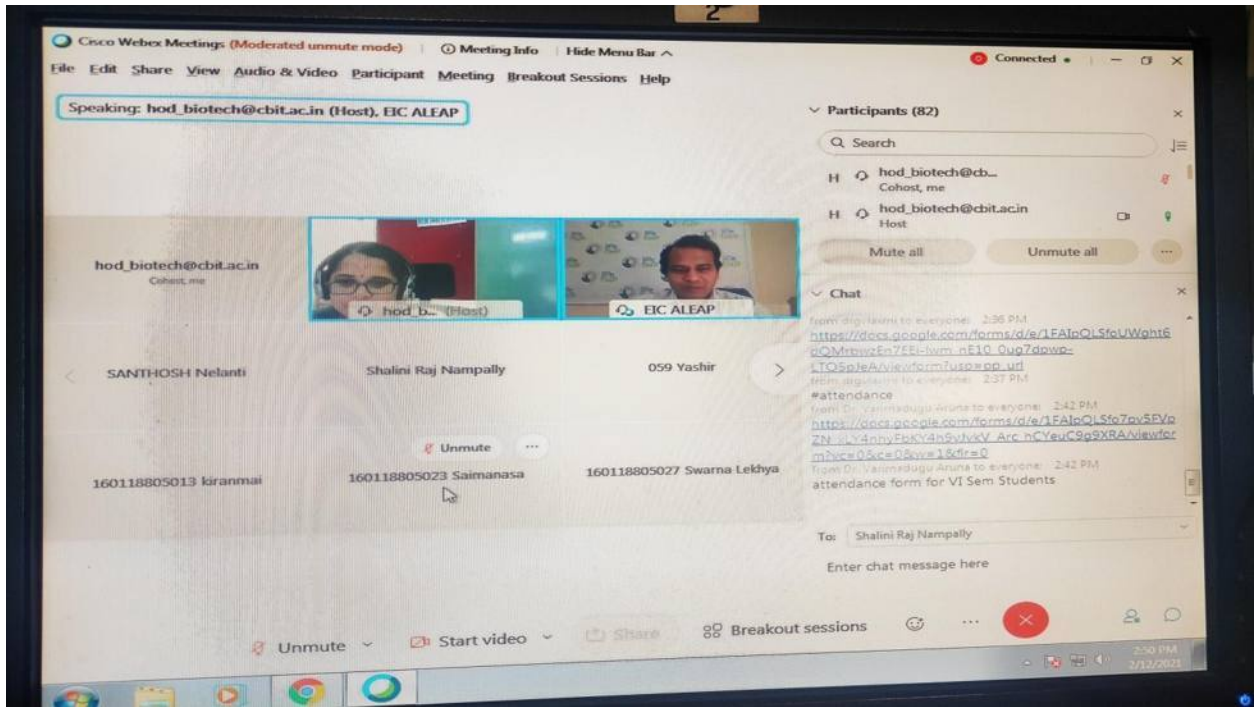

**Dr.Zahoorullah.S.MD**, put forward few humor filled instances to enlighten and then instigate the participants to reflect upon ‘why’ and ‘whether or not ‘there is need to innovate in Life sciences sector. Further, he propounded on innovations and commercialization in the field of genetic engineering and Genetics and related the possible outcomes of them. He concluded by emphasizing that using innovating technologies we can achieve targeted drug delivery in order to treat various dreadful diseases.

**Dr.Zahoorullah.S.MD**, also emphasized on the need for doing research. Each participant presented their individual views, concordant with views of one or more of the other participants and contradictory to other members. All in all, there was a pool of mixed ideas, but all participants unanimously pointed out, agreed to and urged for “THE NEED OF innovation to generate bioproducts”.

Faculties, Staffs and students (97) alike participated actively in the event. This enthusiasm hints that every section welcome and also do feel the need to talk about important issues like scope of

innovations within and outside an organization. The huge number of questions from student community was indeed impressive and subtly conveyed that the young minds are open for discussions with an honest frankness. All in all, the event went off very well, and was well appreciated by one and all. The success of this event by department of biotech invites more thought provoking sessions in upcoming times.

**roduction** Methods & Data Collection

Aluminum alloys are extensively used in very large number of applications including automobiles, aerospace and defence industries due to the concept of its high strength to low weight ratio.

Most of the components that are used today are made up of alloys due to their improved mechanical properties.

The mostly used materials are aluminum alloys and other metal alloys depending upon the requirement. There are many applications of aluminum alloys. Aluminum alloys are most widely used in aircraft industry.

- The test material selected is an aluminum alloy. It is a 7th series aluminum alloy whose primary alloying element is zinc (5% to 6% by weight). Among all the 7th series alloys, this alloy i.e AA7075 has strength almost equal to that of steel. It has lower resistance to corrosion than many other aluminum alloys but has remarkably better corrosion resistance than the 2000 alloys.
- In this study, Aluminum alloy 7075 is chosen as specimen to examine the various mechanical properties after alloying. The aluminum metal matrix composite has been fabricated by using stir-casting technique at a temperature of 650 °C.
- The AA7075 (Aluminum Alloy 7075) is strengthened with Al2O3/Alumina and graphite particles. These particles were included into aluminum alloy to improve its properties. Two different compositions of specimens were made.
- One composition is of Al-7075 added with graphite (2.5 wt%) and 5 wt% of Al2O3. And the other with Al-7075, 5 wt% of Al2O3. With these compositions specimens of Impact Test, Hardness Test and Tensile Test were fabricated.

Al7075+Al2O3+ Graphite	202.41	61	0.12

**onclusions**

The tensile strength of AA 7075 is 220 MPa. But due to the casting voids, and coagulation of particles values are less than the base materials.

The impact strength of AA7075 is 0.13 J and the toughness is about 0.0035 J/mm3. Upon addition of Alumina, the impact strength increased by 15% compared to base material.

The hardness value of AA7075 is 60 HRB. In Rockwell Hardness test, upon the addition of Alumina, the hardness of the alloy increased by 11%.

### Experimental Study on Mechanical Properties of AA7075, Al2O3 and Graphite Metal Matrix Composite

Mr. Ch. Naveen Reddy\*, Mr. L. Sandeep Raj, Mr. Gourav Tiwari  
Assistant Professor, VNR Vignana Jyothi Institute of Engineering and Technology | MPC-122

#### Introduction

Aluminium alloys are extensively used in very large number of applications including automobiles, aerospace and defence industries due to the concept of its high strength to low weight ratio.

Most of the components that are used today are made up of alloys due to their improved mechanical properties.

The mostly used materials are aluminium alloys and other metal alloys depending upon the requirement. There are many applications of aluminium alloys. Aluminium alloys are most widely used in aircraft industry.

#### Methods & Data Collection

- The test material selected is an aluminium alloy. It is a 7th series aluminium alloy whose primary alloying element is zinc (5% to 6% by weight). Among all the 7th series alloys, this alloy i.e AA7075 has strength almost equal to that of steel. It has lower resistance to corrosion than many other aluminium alloys but has remarkably better corrosion resistance than the 2000 alloys.
- In this study, Aluminium alloy 7075 is chosen as specimen to examine the various mechanical properties after alloying. The aluminium metal matrix composite has been fabricated by using stir-casting technique at a temperature of 850 °C.
- The AA7075 (Aluminium Alloy 7075) is strengthened with Al2O3(Alumina) and graphite particles. These particles were included into aluminium alloy to improve its properties. Two different compositions of specimens were made.
- One composition is of Al-7075, added with graphite (2.5 wt%) and 5 wt% of Al2O3. And the other with Al-7075, 5 wt% of Al2O3. With these compositions specimens of Impact Test, Hardness Test and Tensile Test were fabricated.

#### Results

Composition	Tensile Strength (MPa)	Hardness	Impact Strength (J/mm <sup>2</sup> )
Al7075	220	60	0.13
Al7075+Al2O3	195.32	67	0.15
Al7075+Al2O3+ Graphite	202.41	61	0.12

#### Conclusions

The tensile strength of AA 7075 is 220 MPa. But due to the casting voids, and coagulation of particles, the values are less than the base materials.

The impact strength of AA7075 is 0.13 J and the toughness is about 0.0055 J/mm<sup>3</sup>. Upon addition of Alumina, the impact strength increased by 15% compared to base material.

The hardness value of AA7075 is 60 HRB. In Rockwell Hardness test, upon the addition of Alumina, the hardness of the alloy increased by 13%.
