Organizing Webinar on**

**Master Class Ep 5: Guidance on the recruitment process of Google**

**Saturday, 4<sup>th</sup> September 2021**

**17.00 PM – 18.00 PM**

**Abstract / About the Programme:**

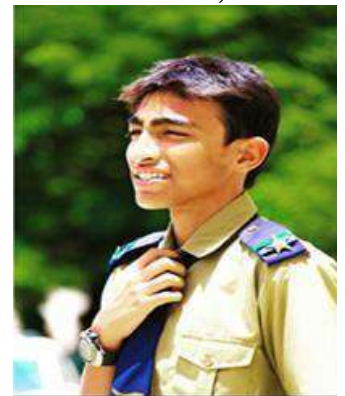

After four triumphant episodes, we are gearing up for the last episode of this series. We have one of our alumni and IT residents at Google, regarded as the global internet services leader. In this session, Speaker is going to focus on perspectives that the company expects from an individual. He is excited to share his interview experience and critical insights to crack a job offer from renowned companies. He takes utmost pleasure in illustrating the exposure of clubs, which helped him carve his personality into a dynamic one. This session will be beneficial for those undergrads whose aim is to get into leading firms.

**Name of the Speaker: Mr. Hyder Hussain**

IT Resident at Google

**About the Speaker:**

We have Hyder Hussain, a praiseworthy graduate from the Information Technology Department of CBIT who made it into the Multinational Company-Google, as our final Speaker for MasterClass 2.0. He is presently working as an IT resident at Google, which has created its standards in internet-related services. He was the External Relations Manager for CBIT Open Source Community, Charge D'Affaires of CBIT MUN, Head of events for the photography club, photographer for TED conferences. He worked as a software intern to develop a GUI for Focus solution under the guidance of the company's CEO and worked on Vue.js to build a JavaScript framework for Caravel. He accomplished ten courses ranging from designing to programming, problem-solving and has nine significant certifications for his remarkable hard work. Six of them are from Google for his technical support fundamentals, system administration, IT infrastructure, and many more. He developed several projects in which the Covid-19 tracker project is worth taking. In this session, his attention would be on the recruitment procedure of Leader of Internet Services-Google and to provide valuable suggestions on how to gain experience through the courses and projects pursued. Hence, his insights will provide a route map, which would help make our journey towards getting placed simpler.

**Event Platform / Venue: Cisco WebEx**

## A Report of MasterClass-2.0 Episode-5

### Guidance on the recruitment process of Google

**Date:** 4<sup>th</sup> September 2021

**Duration:** 1 hour

**Details of the event:**

This is an enriching meeting with Mr. Hyder Hussain is organized by IEEE-CBIT for enthusiastic students who want to be successful in their careers. The focus of this episode is to understand the hiring process of Google, one of the largest tech giants in the world. The

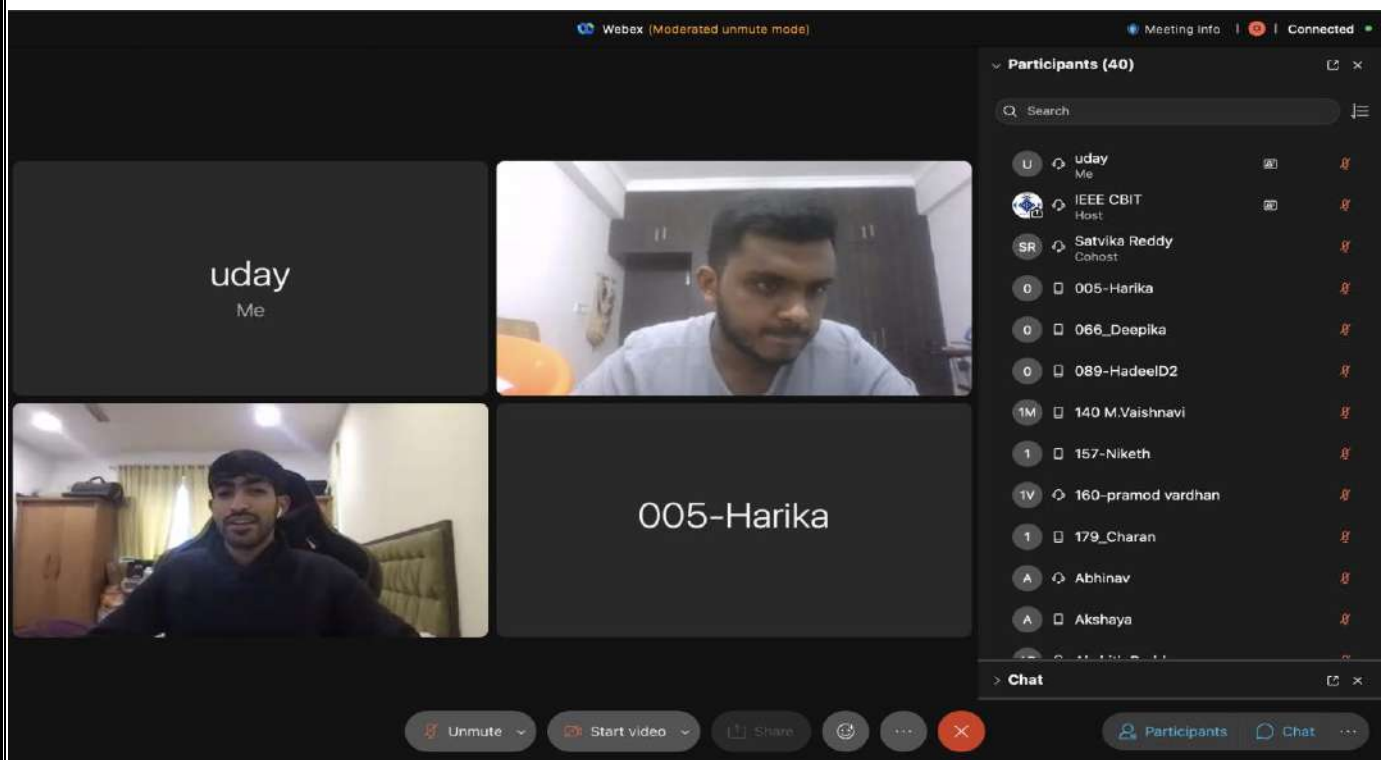

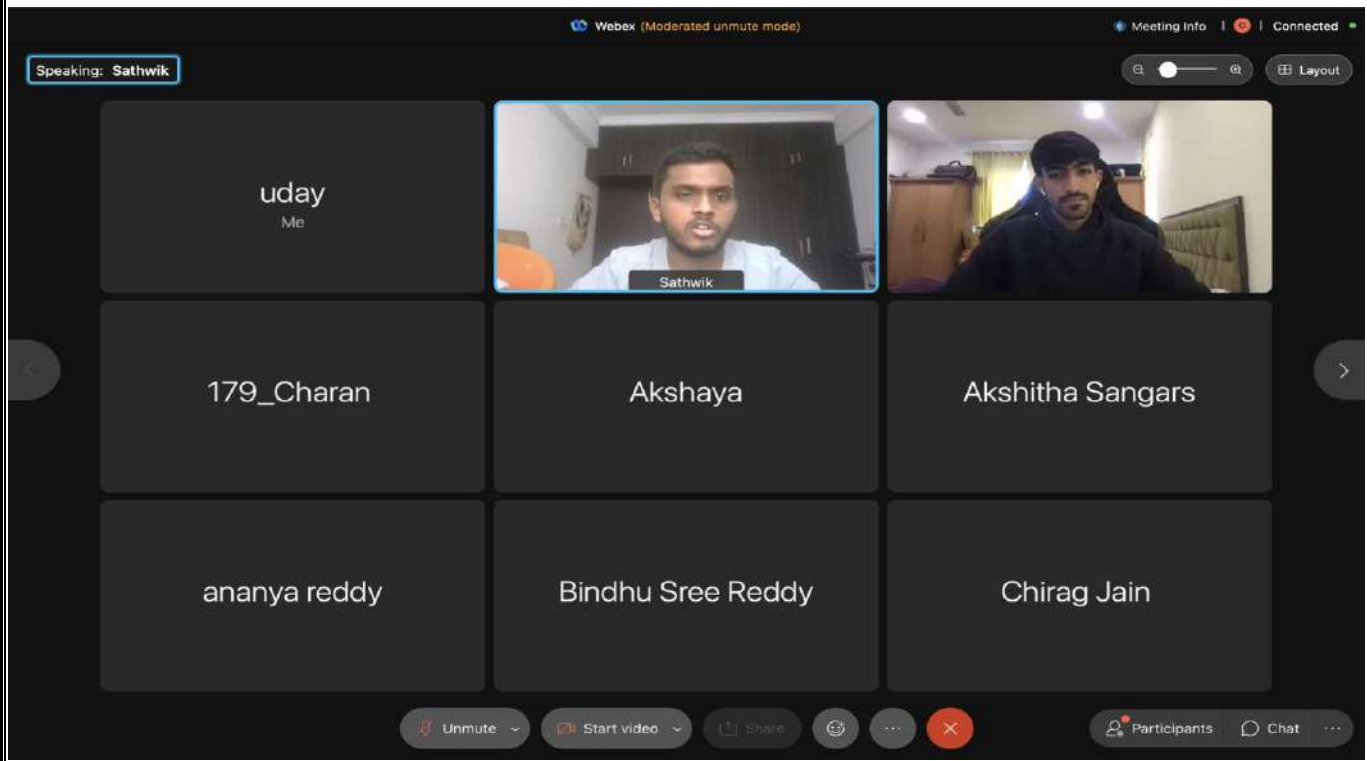

Speaker of the session, Hyder graduated from information technology and currently works as an IT resident at Google. He was the external relations manager for CBIT's open-source community. He has done internships in companies such as Focus Solutions and Cavale.AI as a front-end developer and has also participated in the Covid-19 tracker project. He was the Charge D'Affaires of CBIT MUN and has been a photographer for TED conferences. He completed many courses and obtained 9 professional certificates.

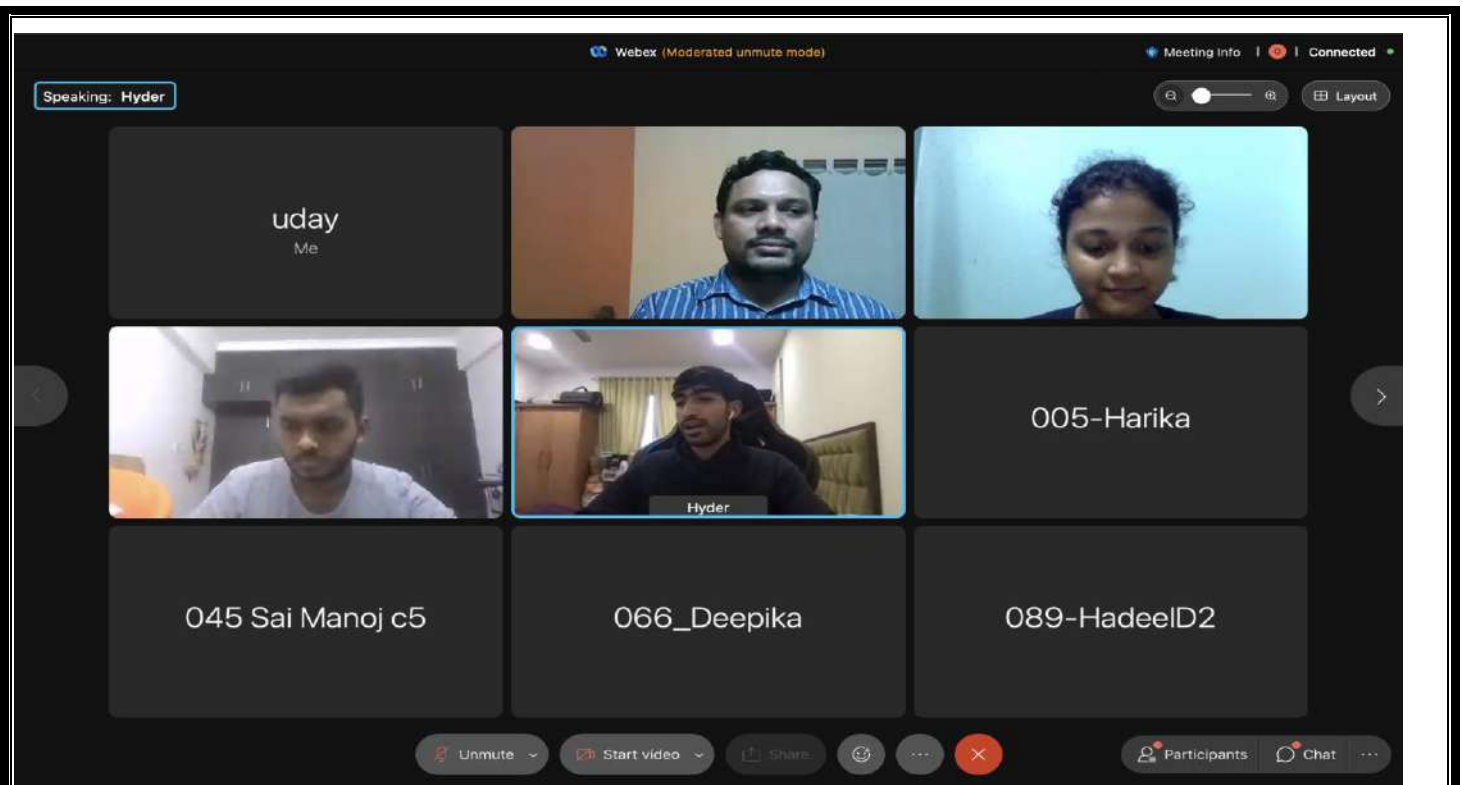

The event comprised of discussion of several topics, some of which are listed below:

- Regarding the roles and responsibilities of an IT resident at GOOGLE
- About the process of recruitment for the role i.e., Technical and HR interview process
- The speaker suggested to make yourself familiar with the coding platforms like leetcode and hacker rank to get your basics right and to improve your problem-solving skills.
- The keynoter stressed on evaluating/improving your knowledge regarding the computer networking, operating systems, data base management systems, and network troubleshooting should you want to apply for the internship/job role for IT resident.
- The speaker put forward the importance of the GitHub, LinkedIn and in the resume, briefed us to create a link for the projects.
- The speaker recommended to work on a project after you earn a certificate in the respective domain.

**Number of Participants:** We had over 100 registrations from students of different colleges and different branches. All through the session, we had about 60 participants who were eager to gain key insights from the speaker. The participants showed their interest towards getting their doubts clarified by the end of the session. Chat box overflowed with the questions.

## Pictures of the event:

**Feedback of the participants:** The participants found the entire session very educative. They got to know entire process of recruitment for big tech giants like google. They also found ways to get PPO from internship. They got to know how important innovative projects for recruitment.

## IEEE CBIT Student Branch (STB 31231)

### SEMINAR NOTICE

<b>Event</b>	<b>: Research Paper Writing</b>
<b>Guest Speaker</b>	<b>: Himamsu Marellapudi, CBIT Alumni</b>
<b>Platform</b>	<b>: Zoom</b>
<b>Date</b>	<b>: 15<sup>th</sup> August 2020</b>
<b>Time</b>	<b>: 10:00 am – 11:00 am</b>

### Abstract

With increasing awareness of the significance of Research in the past decade, we at IEEE understand the role that research can play in strengthening one's command on a subject. Regardless of the stream, research has always been the backbone of a product or a technology. Moreover, it gives an edge to students both in their university applications as well as their corporate career as it gives an account of one's in-depth knowledge in the corresponding area of interest. Thus, we bring to you an hour filled with all the information of basic tools one must master to write a research paper. This workshop also emphasises on the journey of the paper from being written and formatted to being presented and published too.

### About the Speaker

Himamsu Marellapudi is one of the most talented alumni of CBIT who passed out in the year 2020 with a degree in Electronics and Communications Engineering. With a knack in writing research papers, he has not only published one research paper but two during his college life, out of which one was presented in an IEEE conference and subsequently published by them. His first paper which was on **IoT Based Status Tracking and Controlling of Motor in Agricultural Farms and** was published on in the journal- **2018**

**All are Welcome**

## BRIEF REPORT ON A ONE-DAY WEBINAR

A webinar on “Research Paper Writing” was conducted by IEEE CBIT SB and ECE Dept. on 15<sup>th</sup> August 2020. About 50 participants from the institute. The event was a one-and-a-half-hour session, and the main purpose of this event was to learn the technical prowess needed and understand what it takes to master the skills required in the industry.

Mr. Himamsu, alumni of CBIT, has a Bachelor’s Degree in Electronics and Communication Engineering. He’s worked as the Robotics and Innovation club president and is known for his publications on IoT-based status Tracking and Controlling Motor in Agricultural Farms. He’s working as a Full Stack Web Developer in Micron Technologies. In this session, the participants were explained what all goes into publishing a Research Paper. The speaker walked all the participants through the whole process, starting from the basic outline of the idea to publishing the paper. How one should approach the concept, various resources, and platforms were the key takeaways.

## A Walk to Remember

By Ayushi Chaturvedi, *Journalist* ; Snigdha Talakoti, *Journalist*

**G**reetings freshers! May the commencement of this new academic year mark your doorway into discovering your likes and dislikes, refining your strengths, and preserving the eternal friendships and memories you will make here. While things are never the way we want them to be, this will be, and we assure you, a walk to remember.

The transition from high school to college is a huge leap and can be slightly intimidating, but once you familiarize yourself with it, you will cherish every bit of the journey that lies ahead. Engineering is a bridge that will turn your dreams into goals, light your spark and help you power through every obstacle that lies on the path.

CBIT has always strived to provide a holistic learning experience to its students and consequently holds an unparalleled placement record. The various opportunities provided each year will help one develop multidisciplinary proficiency and give them industry exposure. The professors edify students with their rich knowledge that aids them in understanding the working of the

world. The campus is an amalgamation of people coming from a multitude of backgrounds and is just the right place for individuals to interact and bond with each other. Networking widens your worldview and helps strengthen your connections with like-minded people. Above all, it helps you build friendships that are bound to last a lifetime.

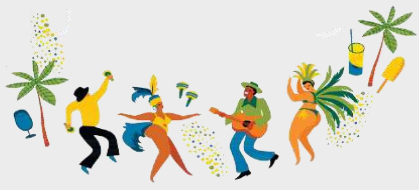

The next four years are going to be integral for you to learn, explore and build your acumen. Throughout these years, the college will offer you more than just a degree. It will give you a platform where you can pursue your passion and thrive at it. It is a space where you can envision and implement your ideas. The Research and Entrepreneurship hub of our college stands by the same motto and has helped thousands of students publish research papers, file patents and turn their ideas into successful startups. Our college elucidates that regardless of which path you choose to go on after graduation, striking a balance between hard and soft skills will always give you an edge over others. The vastly celebrated

clubs of our college organize a myriad of events throughout the year and being a part of them invariably enhances vision, shows direction and inculcates a sense of spirit and fraternity. Not to forget, the most memorable nights of every CBITian out there - the fests. The much-awaited cultural and technical fests - Shruthi and Sudhee are held in the first quarter of the year. This is when the campus looks at its finest best, filled with light, life and laughter. Aura, the sports fest is yet another occasion where both skilled as well as potential sportsmen participate and showcase their knack for the game. As Thomas Aquinas rightly said, "If the highest aim of a captain were to preserve his ship, he would keep it in port forever," your journey in college will be everything you make of it. Live for today, explore the unseen and make it all count. Finally, forge your own path to the finish line and never doubt the immense potential that you carry within.

Here's to a remarkable adventure that lies ahead. Welcome to the family!

## LETTER FROM THE PRESIDENT

**Sri. Subash Namburu– President**

It fills my heart with joy to welcome you, the freshers' batch of 2021, into CBIT. Every year, a new batch joins us with novel ambitions and goals, and we always look forward to guiding each student on their road to success and fulfilment, throughout their time here. It is indeed gratifying that the progress we have made so far toward our paramount ideal, the achievement of excellence and success in all aspects of education, has been prominent. We, at CBIT, have always focused our efforts on furnishing our students with the right tools, resources and prowess. We strive to provide all that we can to ensure a healthy and nurturing environment, for innovative minds.

You, the youth of today, are the citizens of tomorrow. With the advancements in modern technology and growing innovations, today's students have access to more resources, information, and tools than ever before in history. I have always believed in the infinite potential of a young mind, and in a rapidly globalizing society like ours, this is a more relevant belief than any other. To use the available resources, to contribute

to the world around you and to innovate for the simplification of human life, must be your chosen course of action. It is our responsibility, as an institute offering education in engineering, to register the modern-day association between technology and human advancement. One of the largest drivers of social change and development, as perceived by us, is technology, given the ingenious ideas of today that will improve the quality of global citizens as a whole. You are the torchbearers of that technology, and hence carry a great responsibility on your shoulders. I am convinced that you will fulfil this with great avidity.

I urge each and every one of you to take new paths, explore all ends, and do all in your power to turn your aspirations to fruition. It is said that actions speak louder than words. Indeed, setting a goal is a step closer to success, but the zeal to work on it is what we look for in you, because your skills will be measured in the future, in terms of how well they translate into action. The ability to articulate and communicate, as well as to work in a diverse team, and to be able to lead as well as work together, will all be necessary qualities to nurture as you prepare for your future. We realize their significance and hence seek to ensure that you have plenty of opportunities in your journey here to foster these diverse facets. I'm confident that all of you will fulfil your goals in the years to come, and raise the institute to new heights. I look forward to witnessing your achievements. My best wishes to you all.

## LETTER FROM THE PRINCIPAL

**Dr. P. Ravinder Reddy– Principal**

It gives me immense pleasure to welcome you all to CBIT. Being the new batch of 2021, you are assured to have ahead of you, an enriching experience throughout your time here. I welcome you with my best wishes for your journey with us.

CBIT is an institute acclaimed with prestige and respect and we have always prided ourselves in our dedicated commitment to the quality of our education and the attainment of brilliance in all facets of it. We are proud to be ranked 133rd in the NIRF (MHRD) rankings, 38th in THE WEEK and 2nd in Times Engineering rankings for placements last year and we only hope to do better this year. This fidelity is what stands behind all that our institute has achieved and helped maintain our calibre for many years now. It is said that the youth of the nation are the trustees of posterity. The country's growth and the economy will soon depend on you, the youth, a nation's most powerful resource. As the providers of education to such a crucial resource, we have upon us a huge responsibility, which we have been fulfilling with pride for several years.

Whether it is the placements, percentages or publications, any barometer will show our students' increasing achievement rates. This has been possible through a carefully scrutinised syllabus for each course as well as ever-advancing infrastructure. We have directed all our efforts into providing the support and requisite resources for an aspiring student, whether it is theoretical knowledge or practical experience that he/she seeks to gain. In your academic journey here, we assure you that we will leave no stone unturned in

guiding you with our expertise and resources, so that you may emerge triumphant in any path you choose. The institute's success, hence, rests ultimately on the shoulders of its students. I appreciate and acknowledge the hard work that you have all put into earning the place at CBIT, and hope that you translate the same into a potential to excel here too. As engineering students, it is essential to realise the importance of innovative thinking, critical analysis and research. We at CBIT, encourage students to come up with creative ideas and work on them. Innovation, incubation and start-up culture is strongly promoted in our college and we have facilities to support students in all their endeavours in this regard. I would like to assure you of an encouraging and supportive environment for your education here and wish you all the very best in pursuing it. I hope that your time here is a fulfilling, gratifying one, full of growth and development. You will accomplish every ascent with the great potential inside you. May you explore new opportunities, set novel goals, and achieve all you can in your four years here. All the very best for your journey.

## LETTER FROM THE FACULTY COORDINATOR

**Dr. Shirisha Deshpande– Faculty Coordinator**

I feel extremely happy and proud to witness the eighteenth edition of Transcendent's newsletter. Far from being just one academic unit among many, CBIT has long drawn together the interdisciplinary, scholarly culture and one such outcome is 'Transcendent', a forum for creative writers. It gives me immense pleasure to see the magnificent journey of what once started as a simple vision of a few. It is amazing

how the club provides an opportunity for students to hone their skills in the fields of writing, speaking and also in organizational aspects. These skills are very important as they help a person in all aspects of their life and are very important in this modern age. It's a moment of pride for me to be a part of Transcendent. The newsletter captures different events, activities, articles, and academic prowess of

teachers as well as students. The newsletter provides larger visibility and dimension to the college and the team has always strived hard to maintain the standards in hopes that it will encourage many more students to be writers.

Throughout my time with the club, I witnessed the potential of many writing enthusiasts and how they express themselves with beautiful words which are only limited by their imagination. It is very important to be inquisitive and creative to make yourself stand out in this competitive environment. Today's promising youth definitely sets an example of how creative one can get in any path of life. Through my delightful years of working alongside students, I witnessed how students grow and discover themselves through their experiences at Transcendent. Transcendent provides a perfect platform for students to master their innate talents and portray them as uniquely as possible. I hope that all of you will take some information and some inspiration from this brand-new edition of Transcendent.

I express my sincere appreciation to the editorial board and all the writers who contributed their generous time and effort to make this newsletter distinctively excellent. Wishing everybody success and good health.

## LETTER FROM TEAM TRANSCENDENT

It's that time of the year again! Orientation is of paramount importance for us at Transcendent for it gives us the opportunity to encapsulate highlights of the college, happenings of the world and much more in the newsletter. It is with utmost pride that we present to you the Volume 10 Issue 1 of our much anticipated biannual newsletter. It is replete with well-researched and resourceful articles covering a myriad of avenues. From finding your way in the world of employment to actually finding your way in the lanes of CBIT, it covers it all. Feature articles on research, entrepreneurship, establishing a start-up amongst others will give you a glimpse into the assortment of opportunities that are up for grabs. Leave nothing unexplored and you'll stumble upon what'll come to be known as your calling. Articles across departments will keep one au courant with the highlights of the past year and be sure to check out the cultural kingpins at CBIT.

Living through a global health crisis and witnessing the collateral damage over several aspects of life is no hunky dory situation. Navigating through career defining exams amidst this uncertainty only adds to the challenge. As the perseverance and hard work brings you to the onset of four beautiful, life-altering years at CBIT, it's safe to say that every challenge culminates in a better tomorrow.

For a club that revolves around writing, ironically we have no words to describe the family we've built over that past decade. It is bizarre how people with diverse personalities and skillsets bounded solely by the essence of a club can offer so much and get so much more in return.

It is only fair to attribute this solidarity and success of the club to the very craft of writing and journalism. For what else could empower you with the means to express, advocate, uncover and empower others in return. None of what we've achieved would've been possible without the support from our faculty coordinator, Dr. Shirisha Deshpande.

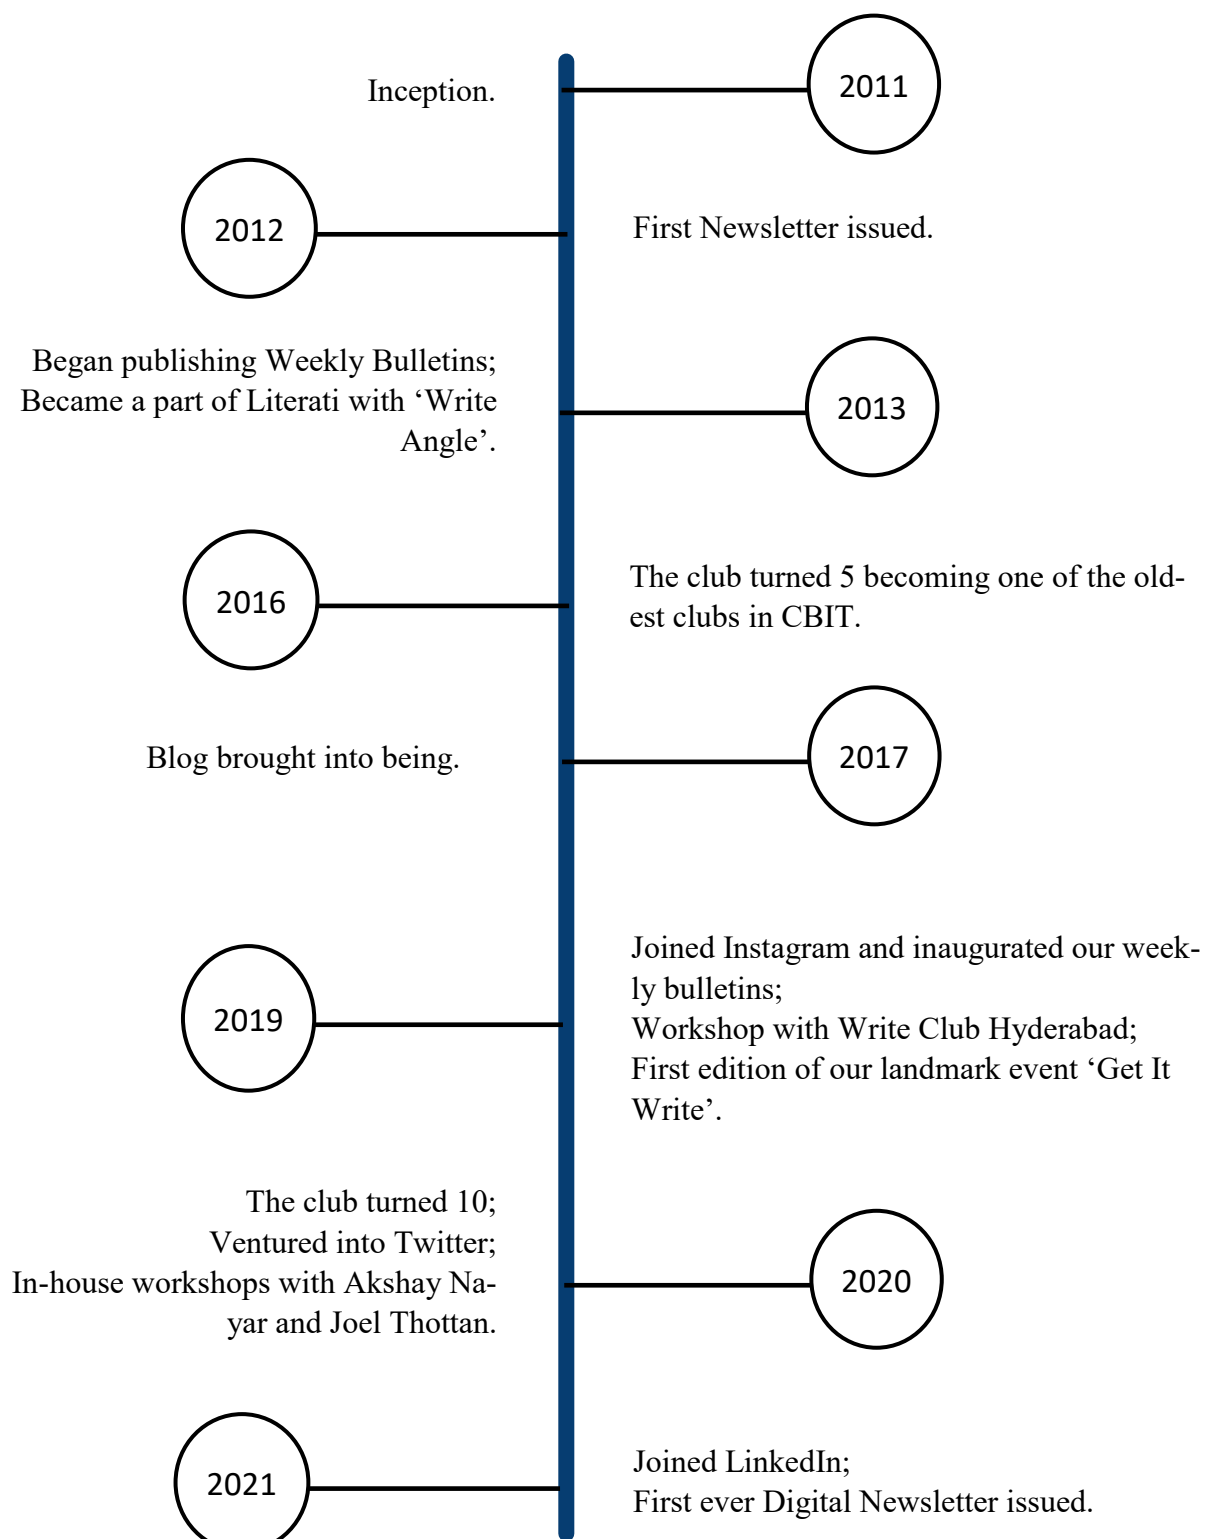

As we set out to celebrate these skills, we have published 13 editions of newsletters, over 150 weekly bulletins and numerous blog articles. In order to cultivate and foster new talent we have organized multiple events based on creative writing and journalistic fervour.

As the college gets rejuvenated with a fresh influx of vigour, tenacity and innovation, we can't help but reminisce about the years spent and the lessons learnt. We can't help but mention our exceptional Editors-in-Chief who've constantly been our sturdy pillars of motivation and guidance. The sixteen pages you hold is the result of extreme diligence put in by our adroit bunch of Journalists, Sub-Editors, Editors and the Design team. We're always open to any review and feedback. We hope this edition makes for a delightful read!

Wishing you the best of health and prosperity.

Team Transcendent.

## A WALK THROUGH THE SANDS OF TIME

# RESEARCH & ENTREPRENEURSHIP

The multi-crore state-of-the-art R&E hub of CBIT is the greatest manifestation of its long-standing objective to cultivate an atmosphere conducive to research and innovation in the campus. Established in 2018, the two wings of the hub, namely the Research and Development (R&D) and the Innovation and Incubation Centre (IIC) under the able guidance of Dr. A.D. Sarma and Dr. Umakanta Choudhury respectively, have been instrumental in fostering a culture of research and innovation among students and faculty alike by helping identify new areas of research, develop projects leading to publications, innovations acquiring patents and setting up of start-ups.

### Objectives:-

Standing tall with the 4 pillars- Inspire, Ideate, Innovate and Incubate, R&E hub strives to create an environment that breeds innovation and sustainability while keeping community service as a humane part of every idea. The R&E block is prudently designed to be a support system to nurture ideas in every stage of innovation and entrepreneurship. Whilst every college carries pride for its highest placement packages, CBIT has not only garnered the highest placements from top firms consistently, but it has also endured on a journey towards boosting entrepreneurship and innovation.

### Infrastructure:-

In order to encourage the 'Make In India' initiative by the Indian government, and persistently motivate the students to indulge in research and innovation, a 3D Innovation Lab has been established by Hexagon Capability India Pvt Ltd to a tune of 3 crore rupees. One of the most prominent drivers of budding entrepreneurship is the Atal Community Innovation Centre which encourages the spirit of design thinking while making sure "community service" is an integral part of innovation. This centre will focus on the unrecognized and unserved regions of the society with the potential to make a huge impact in their lives while helping the vibrant start-up ecosystem gain momentum in every part of

the society. Our college prides itself, rightfully so, as the MSME host institute. CBIT carries this crown with diligence as the main objective of this scheme is to promote and support the untapped creativity of individuals while also shedding light on the practical application of concepts to build the latest technologies in manufacturing as well as knowledge-based ventures. This scheme acts as the safe haven for even the smallest of creative ideas and enables you with means to shape them further making the world a better place. Although ideas can be broadly divided into these three categories, the institute encourages a multidisciplinary approach to a problem and collaborative work towards the greater good.

### Project in Focus:-

National Atmospheric Research Laboratory (NARL), an autonomous atmospheric research institute under the Department of Space (DOS), has initiated a major scientific project to study the impact of Urbanisation on Boundary Layer, Clouds and Rainfall. Hyderabad has been chosen as the test bed for this intense observational field campaign. As a part of the project, they are deploying several Atmospheric Weather Stations (AWS) at different locations in and around Hyderabad in reputed organizations such as in our very own CBIT, IIT-H, HCU and JNTUH.

## CLASSIFICATION OF PROJECTS

**Life Sciences** - This domain would include ideas pertaining to Math, Physics, Chemistry, Biotechnology and Chemical Engineering. One of the biggest achievements of the R&E hub and its diligent hard work is the Artificial Heart Project. Garnering attention like no other, this Indo-American artificial heart project aims to make a low-cost, fully functional heart for usage in India and is being collaborated on by several renowned universities across the country.

**Information Technology** - This domain includes ideas pertaining to Computer Science Engineering, Information Technology, Electrical Engineering, Electronics and Communication Engineering as well as its applications. We-Care, a multidisciplinary technology, made by the CSE department, monitors the heartbeat of a person and also helps send a geo-location in case of abnormal functioning of the heart. This device pushes the limits in tackling CVD (Cardiovascular diseases).

**Core Engineering** - This domain consists of ideas pertaining to Mechanical Engineering, Production Engineering and Civil Engineering. Projects which add to the mantle are 'Development of prosthetic arm' and 'BIO-VAM'. These projects focus on the need for an artificial arm for an amputee and the regeneration of sustainable energy from biomass respectively.

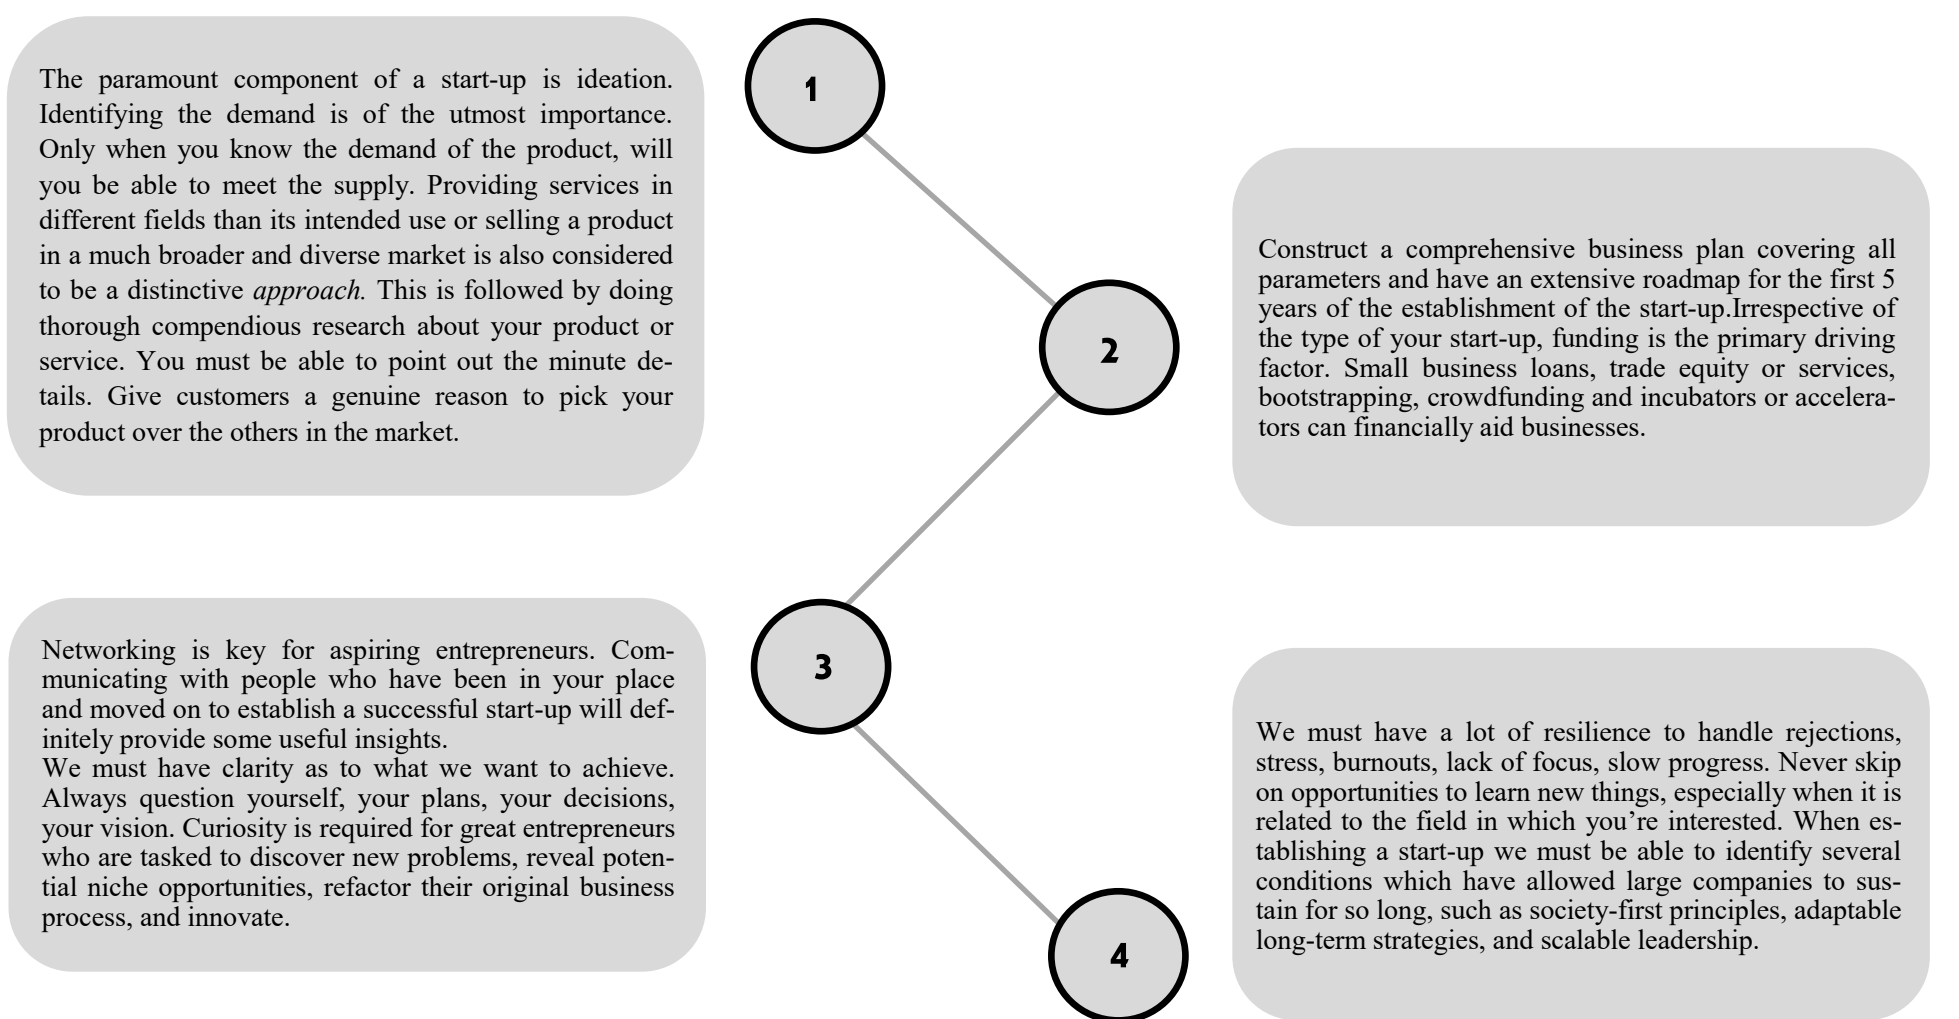

## HOW TO KICKSTART YOUR START-UP?

By Eswar Chava, *EEE-2, 4/4*

Entrepreneurship is a concept that cannot be taught or simply digested from books. A person can obviously learn some basic principles, but that's where it stops. The main concern here is that the practical rules for success are changing so swiftly that it's arduous to keep up with them. An entrepreneur is seen as an innovator with a source of new ideas, services and business procedures. The skills that one possesses mainly impacts their capability of es-

tablishing a start-up; passion for learning, using unique tactics to get filtered from competitors and noticing the rapid variations in the market as an opportunity rather than a problem. Dhirubhai Ambani, JRD Tata, Narayana Murthy, Shiv Nadar, Lakshmi Mittal and Azim Premji are some of the most prominent entrepreneurs in India. Their stories are inspiring and we can grasp a few qualities from them like

risk-taking, trustworthiness, critical and creative thinking, problem-solving capabilities and most importantly sales, branding. Establishing a start-up is undoubtedly a highly risky process, but it is equally; if not more, rewarding. A person must work hard with perseverance and determination in order to earn a place among the top entrepreneurs.

# PLACE - MEANT FOR YOU

By Varshith Reddy, *Sub-Editor*; Nitin Kumar, *Journalist*; Sifath Singh, *Sub-Editor*; Adithi Reddi, *Journalist*; Umamah Fatima, *Sub-Editor*

Campus placements hold great importance for both students and educational institutes alike. CBIT's Career Development Centre plays an integral role in creating the illustrious placement record of our college. The centre facilitates training activities of the students and makes sure they get placed in the best companies. It guides students in planning their time, analysing their field of interest, building CVs, clearing screenings, and aching their interviews. Their work attracts a wide range of recruiters from all across the world. With the growing influence of the fourth industrial revolution, new technologies like artificial intelligence, machine learning, cloud-based computing, additive manufacturing, and robotics will continue to alter the employment land-

scape. In order to produce a higher number of engineers who are skilled in these technologies, CBIT has introduced new branches like CSE (Machine Learning), CSE (IoT, Cyber Security with Blockchain Technology) and AI & DS (Artificial Intelligence and Data Science). We often find students from the traditional branches of engineering feel insecure about jobs in their core field. Taking this into account, CBIT offers them an opportunity to pursue an undergraduate degree with honours or additional minor engineering. With this feather in the cap, students can opt for a job that excites them. Several students from the college are selected for internships, who then receive pre-placement offers (PPOs) from reputed companies.

## How is CBIT helping students stand toe-to-toe with all the emerging trends and technologies?

With the ever-accelerating digitalization and rapid changes in technologies and jobs, it is high time that institutes keep themselves abreast with the latest digital trends and create an effective placement strategy. Here are a few steps CBIT has taken to ensure optimal placements.

**NETWORKING:** CBIT, being the global brand it is, leverages on the already existing vast network to attract top global companies like Google, Microsoft, and Amazon for the campus recruitments. Additionally, the placement cell thrives towards creating new connections and nurturing the old ones.

**LIFE SKILLS:** To prepare the workforce for the future, you need more than technical skills to be successful. In the quest to strive towards 100% placements, CBIT has established exclusive Life Skill Labs for soft skills & technical skills that help students engage in meaningful interactions with industry experts.

**INTERNSHIPS AND WORKSHOPS:** To address the emerging needs of quality technical education, CBIT has organized top-notch conferences, seminars and webinars. On-campus internship opportunities are also available for grabs from reputed companies such as JP Morgan Chase, Salesforce, and Oracle to make sure the students are industry-ready when they graduate.

## Why CBIT is the best?

With the support of the staff and the students associated with the placement cell, CBIT guides students to provide a kickstart to their careers and bag their dream jobs. Despite the global pandemic, CBIT recorded 1210 offers for the ongoing 2020-21 Batch and stood tall with the highest number of placements (1228) in Telangana for the 5th consecutive year. CBIT is the preferred destination for all premium multinational companies like Microsoft, Amazon, ServiceNow, Goldman Sachs, Google, Deloitte etc. that visit our campus each year for the roles of Asso-

ciate Software Engineer, Software Development Engineer, Data Analyst Engineer amongst many others. For the first time in our 42 years of glorious history, 20 students were placed with a Rs 25 LPA package, 9 students in Amazon for a whopping package of Rs 33 LPA, and 35 students in JPMC for a package of Rs 14 LPA. Once again our claim of being the best in Telangana stands vindicated with our vibrant and successful alumni bearing a living testimony to it.

**RICHA KULKARNI**  
Batch of 2019

Secured AIR 134 in UPSC CSE. 2020.

It is a known fact that the UPSC exam is one of the toughest. That is true, but it is also something that anyone can accomplish with hard work, perseverance, and in my case, a bit of luck. I found the preparation extremely enjoyable because it let me learn so much. I'm sure anyone pursuing this will find the same. CBIT and Transcendent were crucial in this attempt, giving me maturity, curiosity, time management skills, and more. My best wishes to any future aspirants. My advice would be to enjoy college fully now and get every experience you can. Everything helps.

**ABHIJEET PURKAR**  
Batch of 2020

Placed as Supply Chain Executive at HUL, currently pursuing Masters in Information Systems Management from Carnegie Mellon University (CMU).

Had someone told me in 2016 during my first week at CBIT that I would get to head clubs like the Student Association and Transcendent. Or that after a year of working in a factory during the pandemic, I would go on to pursue a Masters in Data analytics, I would have said, "Yeah, the pandemic part does make sense." We all come to college with plans of our own and try to stick to them religiously. However, with the opportunities here at CBIT, you can always do better than you thought. My advice? Keep an open mind and take life as it comes to you!

**MEGHANA VISHWANATHULA**  
Batch of 2021

Received full-time employment offers from reputed companies like Goldman Sachs and Amazon.

My experience so far has brought me immense pride to be a part of such an esteemed institution. My mentors and seniors always made an effort to keep me informed about opportunities that would improve my skills. Events like workshops, coding contests and projects during college taught me effective collaboration. I worked as a teaching assistant at Smart Interviews and received offers from Goldman Sachs and Amazon. Being a member of an active club like Transcendent and being the Vice President and General Secretary of the Student Association has improved my communication and leadership skills, adding value to my resume.

**SATHWIK RAJ**  
Batch of 2017

Studied at IIM Bangalore, bagged a job at McKinsey & Company.

Since the beginning of my time in CBIT, I found MBA enticing for its requirement in leadership and management qualities. After securing 99.56 percentile in CAT, I got into IIM Bangalore which scored me a job at McKinsey & Company. CBIT played a prodigious role in my achievements. My time as Secretary General for CBITMUN in 2015 taught me how to work with large teams to achieve a collective goal. My time with Transcendent and Comunicando helped me with my work on a multi-billion dollar modernization initiative with teams spread across multiple geographies.

**RAKSHITHA YALAMANCHILI**  
Batch of 2021

Placed in Microsoft with a 48LPA package

CBIT has aided me in a multitude of avenues, be it building a rich resume as it pushed me to have a diverse skill-set or playing a major role in my Microsoft placement. I also received offers from JPMC. I was appointed as the president of COSC for a year during which we conducted several hackathons and workshops which improved my managerial skills and technical skills. I could build my resume through projects with real-time hands-on experience on bus tracking project (an interdisciplinary project which had members from every branch) with Kernel sphere.

**HIMANSHU KAPASHI**  
Batch of 2019

Co-Founder and CEO at Knowledge Units.

I always had the ambition to work on something by myself and CBIT helped pave my own path. I gained people management skills in college that have assisted me to this day. I am the Co-Founder and CEO at Knowledge Units, a Creative and Marketing Agency. We're registered with Start-Up India and marked as one of the fastest-growing industries. We deal with designing, developing, and strategizing a digital growth plan for a range of clients. We've successfully launched 10 businesses to the market, all thanks to the invaluable experiences being a CBITian taught me.

# THE CROSSROADS

By Shreya Teynampet, *Journalist*; Shreya Koka, *Sub-Editor*

## Masters

A Master's degree provides plenty of opportunities that can help you move your way up the professional ladder by letting you build the required competencies to have an edge above the rest.

## Entrepreneurship

Setting up one's own business, although a risky option, can be extremely profitable if done under the right guidance.

## Teaching

Teaching is a great way to give back to younger generations. Faculty jobs in colleges require an M.Tech or a PhD degree, both of which can be acquired after engineering.

## MBA

An MBA degree brings with it a multitude of skills necessary to shine in the professional world and will mark your entryway to jobs with high salaries and good roles.

## Mechanical

**1. Aerospace Engineer:** This profession can be rewarding for someone who is passionate about the core mechanical subjects.

**2. Automotive Engineer:** A mechanical graduate certainly would have gained a vast experience in building and manufacturing things which can be used in research and development of the automobile industry.

## ECE

**1. Electronic Design Engineer:** Complex knowledge of hardware systems, something that an ECE course ensures, can be put to use in several embedded systems, VLSI design projects.

**2. ISRO:** ISRO is the face of all the space and extraterrestrial research in our country. If you've got the vision to explore the stars and beyond, then ISRO is the perfect place for you.

## Civil

**1. CAD Technician:** A CAD technician makes use of the CAD software to create technical drawings and for creating various 2-D and 3-D models used by various architects and design engineers.

**2. Urban Planner:** Urban planners primarily analyze data and plan the development of land, sites and projects. This is currently one of the top-paying jobs for civil engineering graduates.

## EEE

**1. PSUs:** PSUs like BHEL, NTPC, ONGC, CIL offer jobs with high pay and additional perks like medical reimbursement, retirement benefits etc.

**2. EPC:** Engineering Procurement Construction is an up and coming field with great, novel opportunities for the electrical engineers.

## Campus placements

This is one of the most favoured career options for students, as it offers security and a guaranteed source of income even before you are handed your degree.

## Research

If you've ever been deeply immersed in a subject and found yourself asking questions nobody ever knew the answers to, research is probably your forte.

## Civil Service

If you aspire to serve the nation and bring about a change in the system, you can opt for the civil services. While it surely is a tough nut to crack, in the end, the hard work is sure to pay off like no other.

## Armed Force

The forces need qualified engineers for building, maintaining and managing the working of military equipment. So, if you're a patriot with a B.Tech degree, this is probably where you should be.

## CSE/IT

**1. Mobile Application Developer:** Experience in using Python, Java, C++ etc. can easily guarantee you this much sought-after job in the industry.

**2. Cyber Security Analyst:** This is another high-paying area in the IT industry. A cyber security analyst primarily helps in protecting organizations from cybercrime and hackers.

**3. Data Scientist:** The role of a data scientist is to organise, analyse and structure the data. This in turn requires in-depth knowledge of computer science and mathematics.

## Biotechnology

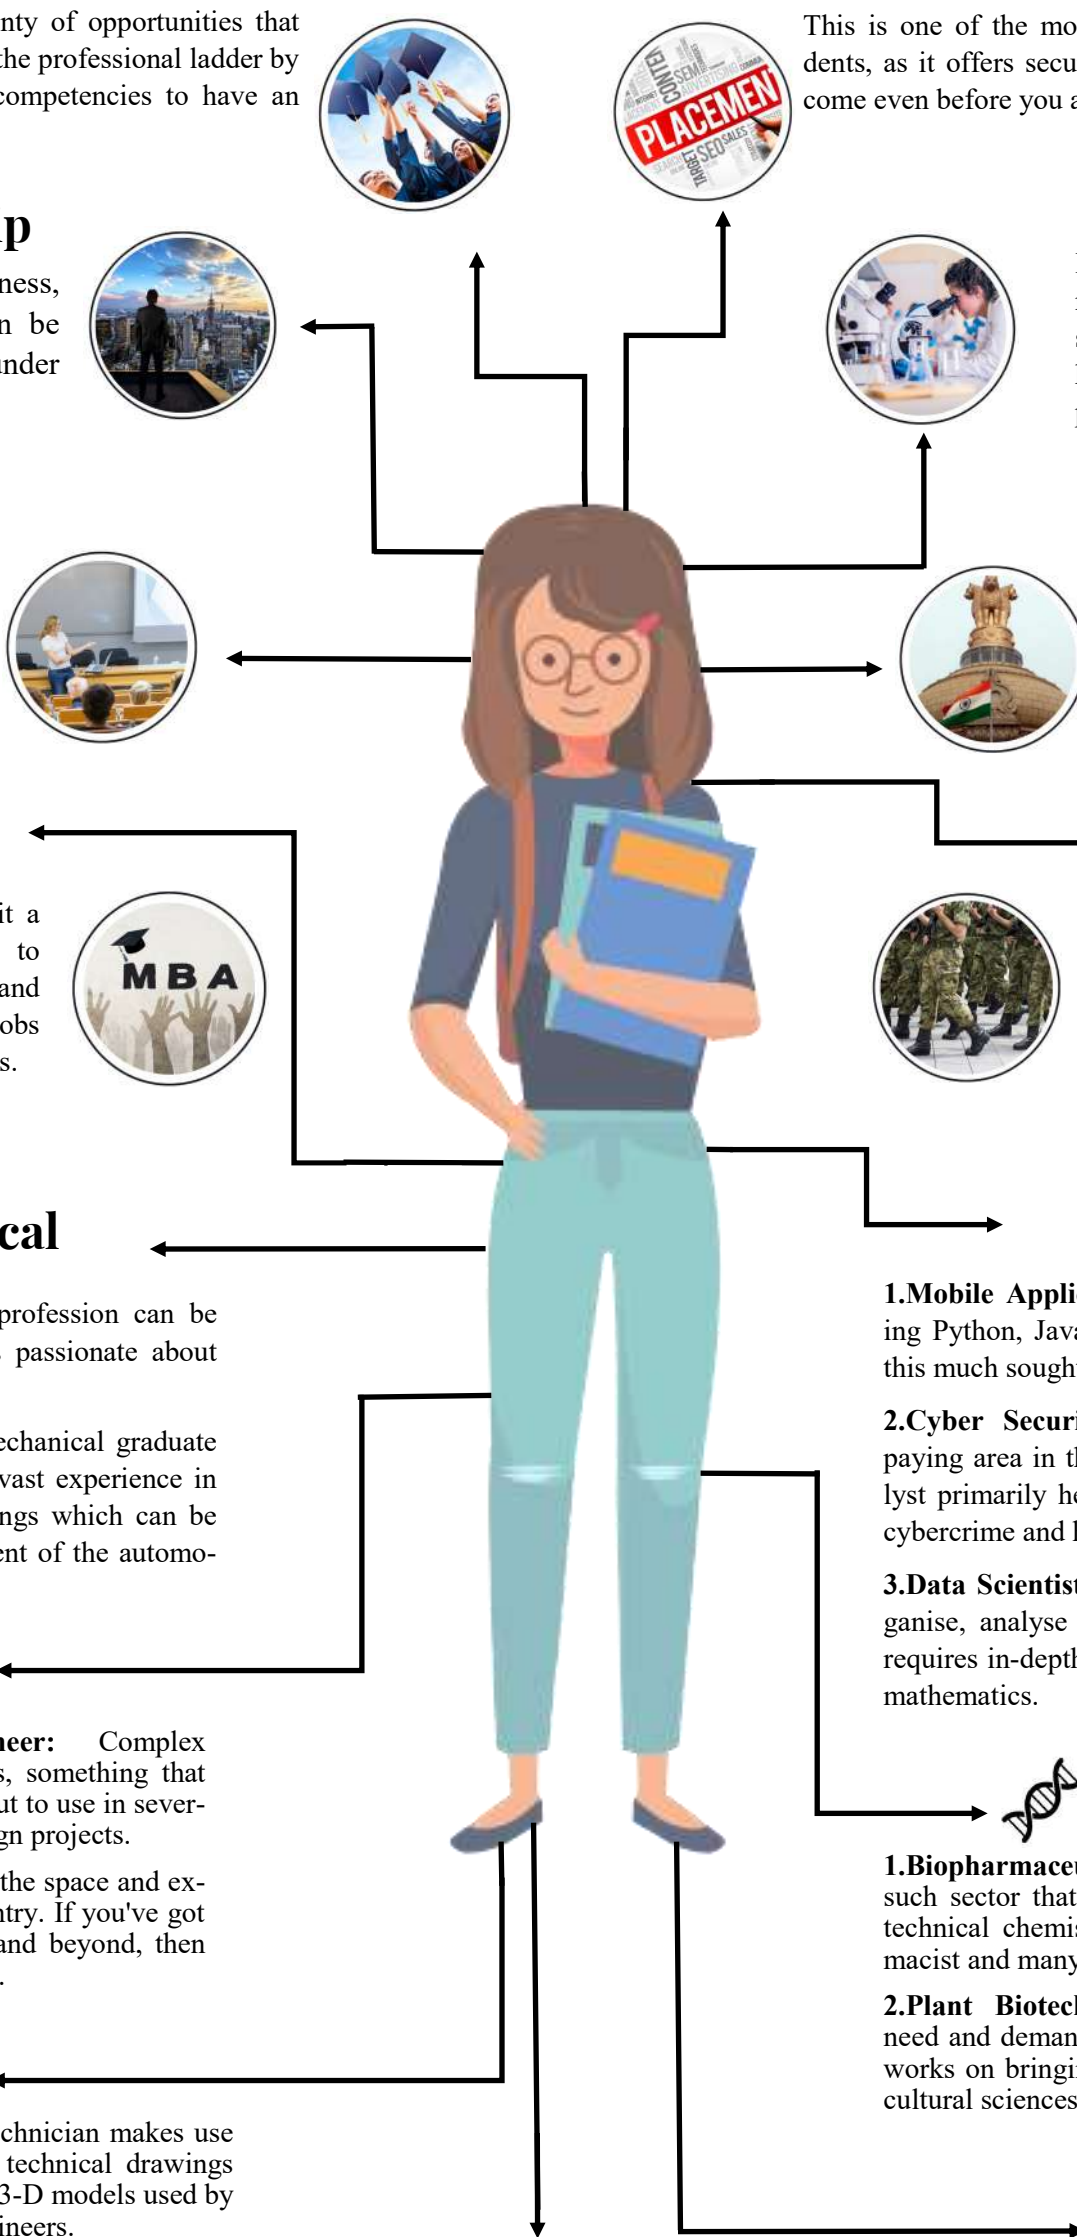

**1. Biopharmaceutics:** Pharmaceutical biology is one such sector that offers diverse job profiles like biotechnical chemist, medical scientist, academic pharmacist and many more.

**2. Plant Biotechnologists:** With the ever-growing need and demand for food security, a biotechnologist works on bringing forth new innovations in the agricultural sciences and crop production.

## Chemical

**1. Nuclear Engineer:** Nuclear engineers research and develop the processes, instruments and systems used to derive the benefits from nuclear energy and radiation.

**2. Material Scientist:** The role of a material scientist is an in-demand profession in various industries from textile to metallurgy today.

## NAKBA 2.0

By Laya Chalamchyla, *Journalist*

The clashes between Jews and the Arab countries date back to the 19th century. But these clashes escalated after the British withdrew from Palestine after failing to settle the constant unrest even with UN intervention. One of the major conflicts being the Al-Nakba, also popularly known as ‘The Catastrophe’. This war that happened in 1948 between Israel and other Arab countries helped Israel gain a considerable amount of territory. But they failed to reach an agreement even after the war, resulting in various clashes, a few of them being the Suez Crisis, Six-day war, Yom Kippur war, Lebanon war, Second Lebanon war, Gaza war and now the Israel-Palestine crisis. After these wars, Israel took control of the West Bank, East Jerusalem and the Gaza strip; these territo-

ries are known as the Green Line. The recent conflict, i.e., the Palestine-Israel conflict, was termed one of the deadliest. The war was between Israel and Hamas, a militant Palestine group present in Gaza. The attempted displacement of Palestinian families from East Jerusalem was one of the factors that sparked the conflict. The court's decision enraged Palestinians, who took to the streets to protest Israel's administration. The majority of the protests took place on the grounds of the Al-Aqsa Mosque. Israel police shut the Damascus Gate and the Al-Aqsa mosque in the Old City in an attempt to stop the protesters. Hamas, the militant group, reacted by launching an airstrike on southern Israel on 23rd April. Israel retaliated by launching its own rockets on many Hamas officers. The tussle extended well into May with both sides launching missiles. There were 200 casualties and a thousand people injured by the time there was a ceasefire on 20th May, putting an end to 11 days of war.

## RULES FOR THEE, BUT NOT FOR ME

By Fariyal Ajrad, *Editor*

The annual fundraising event for the Costume Institute Gala at the Metropolitan Museum of Fine Arts made its exultant return on 13th September, this year. Giving the guests a chance to reappraise America's identity and fashion, the theme was set as ‘In America: A Lexicon of Fashion’. While not everyone understood the assignment, many celebrities and designers paid homage to America's rich and iconic history. Designers and industry paragons explored vogue from late Hollywood to state-of-the-art costumes. One such dress that grabbed everyone's eyeballs, particularly the right-wing media, was Alexandria Ocasio-Cortez's (AOC) white gown. The New York Representative arrived in a bedazzling gown with a ‘Tax the Rich’ message in bold red graffiti on her polonaise. Her first attendance at the Olympics of the fashion world was heavily criticized. Many have perceived her idea as brazen hypocrisy. AOC, as a congresswoman, has addressed people about the evils of capitalism and materialism throughout her term. On the flip side, her turning up in a fiercely opulent event with a \$35K (minimum) per ticket, protesting about defunding the rich made her an epitome of irony. Although her motive was to speak about taxing the rich with the inch-perfect people who promote it, breaking the fourth wall backfired on her. She responded to the backlash from the Conservative critics as sexist and racist. Drawing a veil over the issue was again strongly condemned for relating the obvious denunciation with body-shaming. To this, AOC's patriotic fans responded that she had been invited to attend the Gala for free. She didn't have to pay for the dress either; it was borrowed from a Brooklyn designer- Brother Vellies. All in all, as Winston Churchill better quoted, ‘You don't make the poor rich by making the rich poorer’, it was simply a wrong stage for the wrong audience.

## BACK TO POWER AND RISE TO POWER

By Juwairiyah, *Journalist*

September 2021 has been a month of huge importance for both Canada and Russia, witnessing the election of Justin Trudeau to a third term as Canada's Prime Minister and the victory of Vladimir Putin's party in Russia's parliamentary elections. Trudeau will continue in office following the Liberals winning the third Mandate but has not won the majority he hoped for. He called for a snap election wanting to parlay his record in handling the pandemic into big winnings. Although having their support clawed by former foreign minister Maxime Bernier's far-right People's Party, Trudeau's main rival, the Conservative Party of O'Toole conceded defeat. Preliminary results with 98% of votes

counted showed that Trudeau's Liberals were leading in 158 seats, short of the 170 needed for a majority and one more than they had going into the campaign. While Trudeau failed to get a total majority, in Russia the parliamentary majority won by Putin's party has been marred by reports of fraud. With all the votes tallied, the electoral commission stated that United Russia had won 49.83% of the votes. It was also ahead in 198 seats of the 225 deputies apportioned by party lists. Following the win, there were reports of ballot stuffing and forced voting. As hundreds gathered in Moscow to protest against the parliamentary election results, President Putin praised the elections as ‘free and

fair’. Both the election results in Canada and Russia have given a way to a gripping few weeks ahead.

## THE MINORITY ISSUE

By Saloni Dayal, *Sub-Editor*

On August 15th, Taliban took over most of Afghanistan including Kabul. The new leaders have unequivocally stated that Sharia law will prevail. Following this, an increase in homophobic and misogynistic sentiments has been seen. Zabiullah Mujahid, an official spokesperson for Taliban, promised that they would honour women's rights within the norms of Islamic law. Feminists around the world have expressed their concerns about the plight of Afghan women. Their distress isn't completely groundless. The last time Taliban was in rule, they stripped women and girls of their fundamental human rights, basically confining them to their homes. The worry now is that the gender apartheid from

1996 will see a repeat. Many women have been fired from their workplaces and not allowed to enter universities. Talibani soldiers asked for a list of girls between the ages 15 and 45 in Badakhshan and Takhar so they could force them to ‘marry’ the fighters. Outside Kabul, many women have been instructed to not leave their houses without male relatives related by blood to accompany them. Taliban is extremely intolerant when it comes to homosexuals. They are considered immoral and un-Islamic. The LGBTQ+ community are scared for their lives. They can be arrested and even punished with the death penalty. Gay men have been thrown off tall buildings and had a series of inhumane punishments in-

cluding rape and public beatings imposed on them. In one reported incident, a gay man and a lesbian got married to prevent being killed. A lot of members of the community are trying to escape the country with the help of Immigration Equality but things seem bleak. If these incidents continue, it's only a matter of time before Afghanistan becomes a totalitarian state with no space for anyone who is not a straight cis man.

## ‘MAY BE THE FIRST, BUT WON'T BE THE LAST’

By Juwairiyah, *Journalist*

2020, marked as an eventful year, was dominated by the Coronavirus pandemic and the presidential elections in the US followed by the election of the first female, first Black, first Indian-American and the first Asian Vice President – Kamala Harris. Harris was picked by Joe Biden, the elected president, as his running mate in August months after she suspended her own presidential dreams. Soon after the

elections, the Vice President was challenged with meeting the expectations coming from people of colour in the US and the rest of the world. These expectations were particularly regarding her approach towards the Covid-19 crisis in India, a place her mother immigrated to the US from. Two months after the inauguration, President Joe Biden unveiled Vice President Kamala Harris' biggest assignment then. This assignment focused on stemming migration from Central America to the southern United States border. The former California Senator's top public focus after a little more than six months into her time in the office was voting rights. In her pursuit of providing voting rights at the centre stage, she held various meet-

ings with activists and local leaders across the country. In September this year, the Vice President was taken off the spotlight after spending the early part of summer taking heat over the large increase of migrants heading to the U.S.-Mexico border. The month also marked the first in-person meeting of Indian Prime Minister Narendra Modi and the highest-ranking Indian American in US history. Kamala Harris' vice presidency has at times seen some missteps and intense scrutiny but has also been exceptional in terms of power and prestige drawing more interest as the first woman of colour and otherwise to hold the job.

## EQUALITY IN DEFENCE

By Laya Chalamchyla, *Journalist*

India took a step toward eliminating gender bias on September 8th, 2021, when NDA's exam eligibility included women. NDA or National Defense Academy is an entrance exam conducted for admission to Army Navy and Air Force wings of NDA and Indian Naval Academy Course (INAC). At first, UPSC permitted just unmarried male applicants between the periods of 16.6-19 to show up for the NDA. Be that as it may, the criteria was assessed when a request was documented to permit women to show up for the test. The petition accused the defence academy of violating values of equality (Article 14), Article 16 (equal opportunities in matters of public employment), Article 19 (freedom to practise a profession), and non-discrimination (Article 15) in the Constitution of India. Following a comprehensive analysis of the petition, the Supreme Court consented to allow females to take the exam. Though the Supreme Court ordered the change to occur immediately, the government made a plea for additional time. The request was recorded on the grounds of not having sufficient opportunity and labour to set up another system and settle on the enlistment classes. Nonetheless, the appeal was dismissed by the court, which

claimed that the petition expressed genuine concern for the country and that the government should not delay in dealing with issues of gender discrimination. The judges further added that as there will be fewer candidates appearing for the exam, the centre will be able to accommodate them easily. Following this decision, UPSC postponed the NDA exams to November 2021 and opened applications for unmarried females.

## BLACK MONEY- DARKER OBLIVION

By Mukund Vishwanath, *Journalist*

Indian Prime Minister Narendra Modi's speech of 8th November 2016, while announcing the demonetization of some currency notes, was a historic moment against black money in India. Cracking down on the black market, the five hundred and thousand rupee notes hoarded by anti-national and anti-social elements merely became worthless pieces of paper. The government also passed a law, 'The Black Money (Undisclosed Foreign Income and Assets) and Imposition of Tax Act, 2015,' which would be a crucial step towards assessing foreign black money. Cut to 6 years later, the only piece of paper that remained worthless were the ones asking for transparency in data. The government had no official estimate of the black money stashed in Swiss banks for the last ten

years, Minister of State for Finance Pankaj Chaudhary told the Lok Sabha. Data from the Swiss National Bank shows that funds parked by Indian individuals and firms in Swiss banks rose to 2.55 billion Swiss francs (over Rs 20,700 crore) in 2020. The amount was the highest in 13 years and marked a jump of 183% from the figure reported in 2019.

Although not every penny in these fiduciaries is a result of black market corruption, the lack of data from the government boasts about curbing over 90% of the black money in circulation.

One of the most important aspects to keep in mind before concluding that the demonetization was a grand success is to remember that there exists no plan to curb the source of black money. Every day the government neglects data about the international flow of Indian black money in circulation. We move a step closer to darker oblivion of just how effective the demonetization was.

## NEW HANDS IN OLD POCKETS

By Varshith Reddy, *Sub-Editor*

Finance Minister, Nirmala Sitharaman, announced the Union Government's infrastructure asset monetization plan to fetch around Rs 6 lakh crore (\$81 billion) under the National Monetization Pipeline (NMP). The core idea of this program is to lease out the central government's assets over four years ending in 2024-25 and raise money. The government is looking to lease out brownfield projects and invest those proceedings in the greenfield projects.

With the government retaining the ownership of monetized assets, private players would be taking an operational risk. As the government sets up a four-year roadmap to describe this program, the investors might gain clarity and develop interest. However, its success will require careful and continuous monitoring of concerns raised by the private players as one can observe the regular shortfalls in the government's disinvestment collections. The trans-

actions are most likely to be structured in public-private partnerships. Studying the experiences of the private teams with PPPs, their comfort depends on multiple factors like regulatory framework, operational flexibility, etc. To make sure the plan works smoothly, some specialists have suggested that the government must address the concerns raised around PPPs. Consider the experience of Indian Railways when it invited private companies to run passenger trains. The response was not encouraging as only two players participated in the process including a government entity. Thus, how these agreements are structured will be crucial to their success as that will determine the extent of private sector participation.

## NOT SO 'UNITED' STATES

By Shreya T, *Journalist*

There are currently two epidemics causing death and destruction in the United States- coronavirus and racism. Believe it or not, they are similar; invisible to the naked eye, yet fatal, victims are often unaware they have been infected, both maim and kill innocents. Racism targets the weaker sections of the society, much like Covid-19 that exploits the vulnerability of the human body.

For a country promoting peace and solidarity, America remains unsafe for people of colour and diverse ethnicities. Each year, millions of lives are lost due to racism and police brutality. Numerous innocent African-Americans are victims of life-threatening hate crime that is evident in the dire state of systemic racism and race-targeted violence. Thousands of people are taking it to the streets and demanding to be seen, not as dangerous, but as people whose lives have value and deserve protection. The police killings of Eric Garner, Breonna Taylor, George Floyd, Elijah McClain, and others marked the rise of the 'Black Lives Matter Movement,' which plays a substantial role in fighting racism, anti-black violence, and police brutality. The BLM movement made calls for active police reform, a non-militarized police force, and greater police accountability.

While so many political leaders have expressed their support for the movement, Donald Trump was critical, notably citing isolated acts of violence and looting that accompanied such protests. He called the movement a 'symbol of hate', and claimed that the movement hurt the victimized community. Donald Trump's presidential term set back American racial progress by over a decade.

The fight against racism begins with being informed. Racism is picked up from surroundings and circumstances. However, this cannot be an excuse to justify bigotry. The citizenry must work towards unlearning racism and xenophobia. The fight against racism is not a story of African-Americans. It is a story of racial progress and the stubborn durability of racism in America.

## UNCAPPED KNEES OF DEMOCRACY

By Varshith Reddy, *Sub-Editor*

It has been 20 years since the Al-Qaeda terrorists brought down the Twin Towers, beginning a US-led international war on terror. Today's world may seem no safer. Studies estimated that there were 67 active terrorist groups in 2018, the most since 1980. So, did terrorists win?

Certainly not. Despite the Taliban's come back to Afghanistan, and also the persistence of ISIS, democracies haven't been thrown off track. No state that sponsors terrorism has been able to offer an improved life for its people. ISIS briefly controlled parts of Iraq and Syria, but it was short-lived, proving that violent movements can hardly provide good governance.

Of course, terror teams do retain the potential to disturb democracies and their violence has increased in the last 20 years. To counter this, some democracies have diluted a few of their core principles. Post 9/11, western governments altered their privacy laws and armed their security agencies with powers of predominant legal checks. India also followed an identical method with terrorism given as a justification for a few of its most Draconian laws. Parallely, widespread Islamophobia became an enabler for right-

-wing populism in the West and India. And then, there was the rise of China. Many argue that the US could have opposed China's entry to the WTO much stronger if it was not distracted by global terror. China went on to become an influential member of the worldwide economy and these days is in a position to adopt a transactional approach to the Taliban.

But it's clear that indulging terrorists as a state policy has disastrous consequences. Simply look at the basket case of Pakistan which followed such a strategy. Overall, 9/11 did change liberal democracies. However, terrorists could not throw any democracy astray.

## THE MET GALA- THEMED DAYS OF YORE

By Prasheetha Sharma, *Editor*

After a pandemic-induced interlude, 'The Costume Institute Gala', better known as the 'Met Gala,' finally, finally returned for 2021. So, what was this year's Met Gala theme? -"In America: A Lexicon of Fashion."

The gala is a major, glitzy, star-studded fundraising event, but its importance goes beyond dollars raised and social media impressions made. It is a grand exhibit of art as fashion and fashion as art, showing how both forms embrace cultural fabric and design. When talked about the Met Gala, the one very conventional notion pops the thought of glittery dresses in the minds of enthusiasts and admirers. There is so much more to the Met Gala that we do not already know. Predominantly, the Met Gala's splendid art and architecture became a cultural phenomenon attracting global attention rather than being known for what it is- a fundraiser.

The gala began as an annual fundraiser for the Costume Institute and did not happen in the Metropolitan Museum. The first event was organized by a fashion publicist and CFDA founder, Eleanor Lambert in 1948. The gala became more elaborate and of significance in the 1970s. Eventually, the art and decor of the Met Gala continued to become more and more

extravagant, often attempting to do better than the previous years. The Great Hall, Grand Staircase, and Charles Engelhard Court, where the dinner is held, allowed the event designer to express the year's theme on a large scale, thereby giving rise to an annual themed fundraiser, now called -The Met Gala. The guest list of the gala is a diverse mix of celebrities, designers, socialites, and politicians. A-list celebrities enthusiastically participate and interpret the dress code exquisitely.

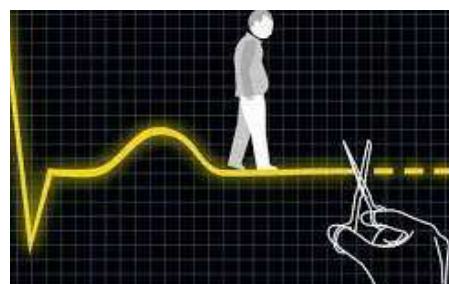

Now, what happens at the Met Gala is a secret and all celebrities abide by the no-phone policy. In keeping with the theme, all we look forward to is a range of talent represented by our favourite celebutante.

## DIVIDED BETWEEN MORALITY AND MORTALITY

By Mukund Vishwanath, *Journalist*

Often we come across the phrase- "Death is a part of one's destiny," however, this could not be true for pain and suffering. Euthanasia is the practice of ending the life of a terminally ill patient to limit the patient's suffering. There are four main types of euthanasia, i.e., active, passive, indirect, and physician-assisted suicide. Common arguments are that euthanasia gives too much power to doctors and will lead to less good care for the terminally ill. As studies from Greece show, although 48% of physicians favoured the legalization of euthanasia, only an insignificant percentage stated that they would perform it, especially physician-assisted suicide. The thin line which divides this debate between morality and mortality lies on the same plane as "Right to life" and "Death with dignity". The critics of euthanasia fail to understand that there is a big difference between living and staying alive. The former refers to the beauty of life, where the latter focuses on the pulse in one's veins. The vegetative state of a person suffering from chronic illnesses may leave them with a heart that pumps blood

and yet feel nothing but pain. The question of the right to die has become one of the most important in contemporary ethics as it lies in the belief that a person has the right to decide how they would like to return to the soil they were born in. On 9th March 2018, the Supreme Court of India legalized passive euthanasia through the withdrawal of life support to patients in a permanent vegetative state. The attitudes of physicians towards euthanasia are diverse, and therefore the Ministry of Health should provide guidelines for physicians dealing with situations where patients or their families request euthanasia.

## SPACE WAR - INEVITABLE FOR REAL?

By Aditya Bandike , *Editor*

Outer space is now a realistic new frontier, and it'll be the centrepiece of business interests that spawn the exploration and discoveries that await us in the infinite space. This is going to produce marvellous accomplishments for humankind in the century ahead, but it's all the more important to stay vigilant and mitigate adversaries at the same time. The possibility of a 'Space War' seems more likely than ever. US President Donald Trump declared space to be the new war-fighting domain and this understandably caused unrest. This followed the creation of the US Space Force and forged American dominance in outer space in late 2019. But the severity in the purpose of the organisation seems to be damping as it should. Any space war would have no clear winner. In a globally shared complex arena such as space, it is important that states abide by the guidelines and established practices. Human activity in space has been guided by the universally accepted principles embedded in the Outer Space Treaty, since the late sixties. This has ensured military conflict in space to never be a thing, and required the exploration and use of space only for the benefit and in the best interests of all countries. As demonstrated by missions so far, there are significant benefits when nations come together and cooperate. Enlightened leadership, guided by universally accepted laws and practices and a recognition that we share outer space as custodians for future generations, is the only conceivable way forward, leaving no practical reason to weaponize space.

## PHISHING ON DEMAND

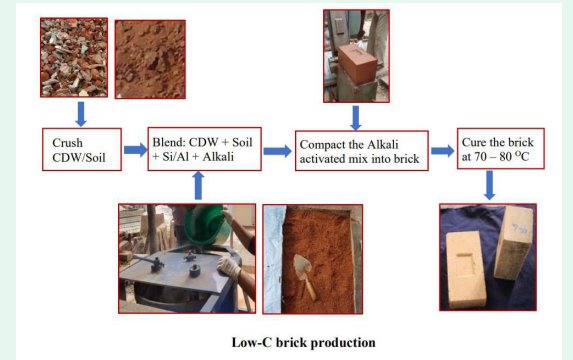

By Syeda Umamah Fatima, *Sub-Editor*

An often-unnoticed aspect of cybersecurity is that humans represent the weakest link in the chain. Phishing is a cyber-crime where targets are attacked by emails, telephone or text messages orchestrated by an attacker masquerading as legitimately reputable entities to lure individuals into providing sensitive data like personal information, banking details, passwords. This data is then used to access important accounts and can result in identity theft or financial loss. One of the barriers to the world of cybercrime was technical expertise. Initially, the scam had to be made from scratch. It involved a painstaking process of designing the scam, developing phishing emails, creating spoof websites and finally consuming and selling the harvested data. This led to the development of phishing kits, tools that allow scammers with minimal technical ability to create a convincing phish able to even dupe security-savvy individuals. These kits dramatically lower the barrier for cybergangs to conduct sophisticated phishing. Now equipped with these kits, scammers have shifted to Phishing as a Service (PhaaS). PhaaS is a game-changer as it removes a number of technical steps. Attackers simply pay an operator to develop and deploy the entire campaign. Recently, one such specific PhaaS organization, Bulletproof Link, was discovered selling phishing kits, email templates, hosting facilities and automating services at a relatively low cost. Just as many legitimate businesses outsource operations and services, so do cybercriminals. Cybercrime is now an industry in itself that has expanded to phishing campaigns which are extremely proficient in deceiving anyone.

## LOW-CARBON BRICKS

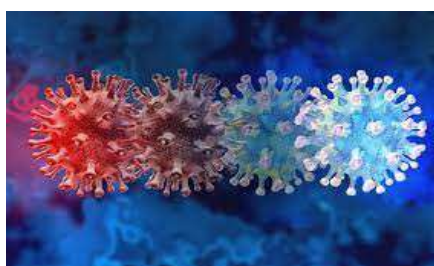

By Srimeghana Akella, *Journalist*

Bricks, the building blocks of any construction, are of different types, such as burnt clay bricks, concrete bricks, engineering bricks, fly ash bricks, sand-lime bricks, sun-dried bricks. Though these bricks are beneficial, they also come with few disadvantages. The high-temperature firing involved in manufacturing bricks consumes a lot of energy. Each brick weighs approximately around 2.27kg, which makes it difficult to transport as a bulk. A normal brick comprises a humongous amount of carbon, making its disposal quite problematic. Hence, as a solution to all these disadvantages, scientists have created a new type of brick called the Low-Carbon Brick. They made this using fly ash and furnace slag. The substances undergo Physico-chemical therapy along with construction demolition waste (CDW), making the manufacturing of these bricks more beneficial. It has 90% less amount of carbon compared to the normal brick types, making it easily disposable. It also doesn't require any high-temperature firing and is also lightweight, making it much better compared to other types. A recent article in The Hindu by IISC Bangalore stated that a startup has registered which will be functional in 6-7 months that will manufacture Low-Carbon Bricks. This will pave a new, much more eco-friendly path in the construction field.

## MUTATION THAT ONCE MUTED NATIONS, IS NOW THEIR SAVIOUR

By Ayushi Chaturvedi, *Journalist*

Once a virus enters your body, it attaches itself to one of your cells. If it can copy itself and hijack enough cells without being suppressed by your immune system, you get sick. Sometimes an error occurs during the virus' copy process and this is called a mutation. Usually, this does not significantly affect the functioning of the virus. But sometimes it may help the virus to enter our cells deftly. If these genetic errors are included during virus replication, they are passed on and eventually become a part of the normal viral genome. These mutations build up over time, and this is how we get new variants of a viral strain. During the second

wave of Covid-19 earlier this year, four variants were identified as variants of concern: alpha, beta, delta and gamma.

Using bioinformatics tools, researchers identified five specific mutations of the SARS-Cov-2 that are much more common in Delta Plus, including one mutation, K417N, which is present in all Delta Plus infections, but absent in almost all Delta cases. The viral mutations around the world are occurring rapidly. However, changes that occur in parts of the virus genome may not always alter the trait of the virus. Thus, mutations are more likely to weaken the natural power of the virus than to strengthen it in the time ahead, which means that the mutations may help curb the spread of Covid-19.

This phenomenon is called 'regression to the mean' where the genetic mutation that occurs in a virus with virulent behaviour will only help suppress the trait to a large extent.

times an error occurs during the virus' copy process and this is called a mutation. Usually, this does not significantly affect the functioning of the virus. But sometimes it may help the virus to enter our cells deftly. If these genetic errors are included during virus replication, they are passed on and eventually become a part of the normal viral genome. These mutations build up over time, and this is how we get new variants of a viral strain. During the second

## ENCRYPTION AS TOP POLICY OF PRIVACY FOR APPS

By Syeda Umamah, *Sub-Editor*

Secret messages have constantly piqued the curiosity of numerous individuals, but as sensitive data increases, the need for security and privacy has become crucial and so the science of concealing messages to introduce secrecy in information security was developed, cryptography, literally translating to hidden writing. The science of cryptography is not as enigmatic as you might think. For example, almost every newspaper today has the Daily Cryptogram, which is a word puzzle that involves unscrambling letters to find a hidden message. This example illustrates one important application of cryptography—the efficient and rapid transmittal of information— along with protecting and

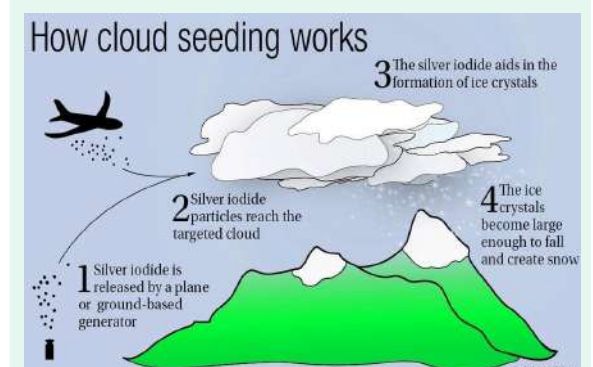

verifying data transmitted via information systems.

This science comprises 2 parts; Encryption is the process of taking plain text and scrambling it into an unreadable format — called "ciphertext." This helps protect the confidentiality of digital data either stored on computer systems or transmitted through a network like the internet. Decryption is the information translating back to its original form after the intended recipient accesses the message.

Taking into account the rapidly evolving hacking industry, encryption has to be prioritized as a policy of privacy. The enormous scale at which confidential data, of individuals and organizations, is being generated and transmitted requires that any software launched has to seriously take into consideration the privacy of its users, encryption being the most feasible option. It is the most efficient in dealing with internet privacy concerns and is also essential for the protection of lost or stolen devices.

## ARTIFICIALLY ALTERED CLOUDS

By Srimeghana Akella, *Journalist*

Precipitation is a process where clouds get heavier and start to fall on the earth as rain, snow, etc. It is one of the primary sources of water on earth. But natural precipitation doesn't occur equally in every place all over the world. In dry places such as the low-latitude regions, precipitation is really low and hence, sometimes can lead to droughts.

Scientists studied for a long time and came up with a solution for this, i.e., artificially altered clouds. This involves a process where particles of the same size as cloud droplets are released into the air, which alters microphysical processes within the cloud, which results in a change of precipitation as required. Few eco-friendly chemicals such as silver iodide, potassium iodide, and dry ice are used for this process. It has been done in several ways over the years. The chemicals are dispersed by aircraft or ground machines. Recently, UAE tried to use electric charge instead of chemicals and succeeded in producing their desired precipitation. The Great Coral Reef, which is the world's largest coral reef system, is in danger due to global warming. A recent experiment involving the dispersion of nano-sized droplets designed to brighten the clouds and block the sunlight has been performed. Though it technically didn't alter the clouds, scientists stated that there is hope for coral life if done in large amounts through this process.

## THE EMERGENCE OF WATTPAD

By Snigdha Talakoti, *Journalist*

Among the myriad of things Gen-Z has introduced to the field of literature and the entertainment industry, Wattpad stands for all things youth, books and digital media. Founded in 2006, Wattpad is a global community of writers and readers that attracts millions of visitors every year. While aspiring writers consider it an opportunity to become the next big thing, some use it as a space of solace, instant feedback and

experimentation. Wattpad also provides an extensive range of genres for its readers, fan fiction being its biggest contributor. This platform, in the words of creator Allen Lau, has revolutionized the discovery of content and the ability to connect with fellow readers and share stories. Given its big user database, data generated from these viewers is further used to test content, even offering the possibility that your story might get published or adapted into a movie! However, book readers also claim that it wrecks the value of literature and quality writing, due to its far-flung accessibility. Moreover, content written by young individuals can easily slip into glamorization of mental health and pornographic stories, making censorship difficult considering the bulk-quantities of media

pouring in. Though it took a little longer to take off, the website hit its prime a decade later and even further during the pandemic, the number of accounts rose by 50% and recorded a 30% increase in the reading time. Wattpad is a classic example to showcase the circulation of literature in today's world. Considering both its opportunities and obstacles, one thing that always stands true is that you can't carry 10 books but you can have over 3000 books on your phone, thanks to an app. Steve Jobs once said, "A storyteller sets the vision, values and agenda of an entire generation that is to come." Here's to Gen-Z, a generation driven by the roots of passion, diversity and authenticity.

## ALL-IN ON ONLINE CASINOS

By Adithi Reddi, *Journalist*

The exhilarated breathing, the anxious anticipation, the confident wagers and the huge profits are only some of the countless intoxicating attractions casinos have to offer. Recently, due to the rise in coronavirus cases, the imposition of lockdown caused the surge of online casinos and betting apps.

Online casinos came into play to liberate people from the exacerbating boredom which comes hand-in-hand with quarantining. Websites and apps like Pragmatic which is acknowledged for its slot machines and Evolution which is known for its games rose to the occasion. Websites like Betway, Dafabet, Bet365 (biggest) & 1XBet are acclaimed for their sports betting facilities. The only disadvantage to the high-stake players and serious gamblers is the money restrictions which vary with each website and app. The lingering question is, do these casinos have a future? The answer is yes for numerous reasons. One of the significant reasons for its growth is the fact that you can have all the recreation time without the hassle of reaching a destination and looking for open spots. Another salient feature contributing

to the development of online casinos is the bonuses they get for the amount of money they spend or win in each game that they play.

This industry has huge growth potential and has already seen a substantial increase since 2019. Even when the pandemic comes to an end, it will still be high in demand as you can have all the fun of casino games in the comfort of your own home while saving travel, food and drink expenses. Gambling although a compelling experience and played at the risk of getting addicted can be considered a leisure activity that young and old alike can enjoy.

## THE PANDEMIC'S SOCIAL FAD

By Yayaswini Polavarapu, *Sub-Editor*

"Are you on Clubhouse?" had become just another way of striking a conversation in the early months of the pandemic. The audio-based social app's distinctive elements and exclusivity factor had people even outside its user-base chatting about it. By December 2020, it had around 600,000 registered users. It had a multitude of reasons to account for its momentary rise. Not all platforms offered ease of access to celebrities like Clubhouse did with Mark Zuckerberg, Kevin Hart and Oprah just a room away. Legions of popular entrepreneurs and celebrities joined the community, post Elon Musk's promotional tweet about the app. With its concept of live audio, it provided a convenient and intimate way to listen to conversations without the constraint of looking presentable. The concept of moderated chat rooms helped maintain ordered and constructive conversations.

The app's exclusivity comes with its invite-only feature, viz. one may only join the app on receiving an invite from an existing user. Additionally, chat room conversations cannot be

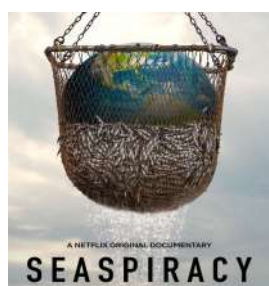

recorded, making them limited edition content. However, with the pandemic ebbing away, the app saw a fall in download numbers despite its unique features. Upon gaining enough users, who trotted similar content at different times, its exclusivity feature became redundant. Following Clubhouse's rise to fame, other platforms like Twitter's Spaces all made audio capability updates, making it even harder for Clubhouse to thrive amongst the competition.

Launch ready with new features however, whether the app will recoup its declining fame is yet to be seen.

## UNCOVERING CONSPIRA-SEAS

By Adithi Reddi, *Journalist*

Greedy is one of man's most minacious emotions. It is this greed that possesses him to claim vast oceans to himself. Seaspiracy, a documentary by Ali Tabrizi talks about how the avidity for money makes men do odious things to our planet. Following the dolphin massacre in Taiji, Ali fled to Hong Kong where he uncovered the sordid shark fin business. The steady decline in the number of sharks proves to be a great threat for us as eliminating the top predators causes the whole ecosystem to collapse, which inevitably will cause the earth to die. Ali's biggest discovery was that the cause for most sea mammal deaths was them being caught as fishing by-products. Sea Shepherd, an organisation contends that for every 8 tuna caught, 45 dolphins are caught as bycatch even though the vessel claims to be "dolphin-safe". Seaspiracy emphasises that 2.7 trillion fish are killed each year! In fact, the UN gave \$35 billion to eradicate world hunger, the exact amount that goes into the fishing business each year. It also highlights that 46% of the plastic in the Great Pacific Garbage Patch (a belt of garbage and debris accumulated in the Pacific Ocean) stems from fishing gear, with plastic straws accounting for 0.03% of it. Unequivocally, Seaspiracy is an eye-opening sensational documentary that caused quite a bit of dispute over some ideas and facts, where NGOs, sustainability labels and experts accused the film of misleading statements. The fishing industry involves governments, billion-dollar companies and NGOs who keep every terrible thing they've done under the radar and Seaspiracy probably only scratched the surface of important issues being withheld. As Sylvia Earle said, "Hold up a mirror and ask yourself what you are capable of doing, and what you really care about. Then take the initiative - don't wait for someone else to ask you to act".

## MARVEL AND THE FEARSOME PANDEMIC

By Shreya Bhattacharya, *Editor*

The Marvel cinematic franchise has kept its fans satisfied and entertained for many years. Since its official inception with Iron Man in 2008, the franchise has only grown, covering several Marvel superheroes, with their appropriate stories and timeline shifts. However, it is true that the franchise was impacted by Covid-19 in 2020, with nearly half the employees losing their

jobs. It left fans questioning how the Marvel universe would maintain continuity. With the pandemic disrupting the production of Marvel movies and television series, would the studio's carefully planned storylines be thrown out of whack?

Naturally, the pandemic did create a rare and unexpected MCU content vacuum. Black Widow was pushed back from November 2020 to May 2021—other films like Eternals were pushed to their own later date, marking 2020 as the first calendar year without an MCU theatrical release since 2009. However, they weren't held back completely and still managed to provide their fans with content worth streaming on Disney+/Hotstar. Wandavision, Loki, etc. were some popular fan favourites. Nielsen's latest report on the most viewed streaming television shows stated that the debut episode of Loki was viewed for 731 million minutes, making it the third most-viewed streaming show during the week of its premiere.

## BTS: BEHIND THE SCENES OF K-POP

By Shreya Bhattacharya, *Editor*

The K-pop universe is a community of musicians, singers, rappers and dancers, all coming together to give us a whole new genre of music - and putting Asia at the forefront of the musical world map. The forefront is what we fans enjoy- the tunes, beats, and wonderful dance moves. A place where language isn't what matters, but the passion we can feel through their musical ambience. But, that is all that we see, the only part we appreciate. The 'behind-the-scenes' of K-pop isn't as glamorous as we would expect, making it one of the darkest aspects of the entertainment industry. By signing artists when they're extremely young and impressionable, lured in by promises of fame and wealth, the K-pop industry secures total control over

their stars. A kind of grooming ensues from the beginning and ensures complete uniformity among a label's prospective stars. The scrutiny of managers and trainers contributes to the harmful standards that K-pop stars must live up to. Weekly weigh-ins are common to make sure that stars are not gaining weight, otherwise, their food would be rationed. Artists aren't allowed to see their families for months or years on end, go out in public, or meet their friends. They play the 'role' they're expected to and practice non-stop for 12-14 hours every day. In an equally harsh selection process, an aspiring artist could lose years of their youth training under these agencies, only to be rejected after a couple of poor scores in their periodic evaluations. While the world of K-pop does bring glamour, and provide us with incredible entertainment, we must never forget what the stars had to endure to ensure perfection for their fans, and here's hoping these talented artist's lives do get easier someday, and they get to enjoy their performances, without worrying about how efficient they need to be.

## THE BALL IS STILL IN THEIR COURT

By Shreya Koka, *Sub-Editor*

Mastery and pure dominance. The past two decades have witnessed nothing less in the world of tennis. Never before in tennis history have three names exuded such supremacy- Roger Federer, Rafael Nadal and Novak Djokovic. Named the 'Big Three', they have changed the dynamics of competition in the sport. Having lifted the Wimbledon this year, Djokovic joined the 'Fedal' party, equaling their record of 20 Grand Slam wins each. Since Federer's maiden title in 2003, the trio has collectively won 60 out of the 73 Grand Slams held. Although several next-gen players have posed a threat from time to time, the Big Three have been unstoppable in the majors. Tennis being an individual sport, they have each had their own path to greatness. Federer, with his effortless serves and born-to-play strokes, is arguably the

greatest grass-court player. On the other hand, Nadal's gruelling, whip-like topspin shots have gifted him a record 13 French Open titles, earning him the nickname 'The King of Clay'. The dominance of the hard-court game was mastered by Djokovic, especially at the Australian Open. Ten years ago, the scenario suggested Federer as the ultimate player-to-beat, followed closely by Nadal. Now, however, the idea of defeating Djokovic seems unfathomable given his mental strength and physical prowess. Pure statistics in terms of match head-to-head and most consecutive weeks at #1 favour Djokovic. However, experts argue that comparison between 3 different styles of domination in slightly different timelines, is meaningless. The race to 21 is certainly on and as to who will make history, only time will tell.

## 'GOLDEN' LINING FOR INDIA

By Shreya Koka, *Sub-Editor*

While the world saw a missed opportunity with the 2020 Tokyo Olympics being postponed, India saw an extra year to train. India bagged 7 medals, making it the nation's best-ever performance at the Olympics. Manipur's Mirabai Chanu kick-started India's campaign by bagging a silver in the 49 kg weightlifting event. Former Olympic silver medallist, P.V.Sindhu, put forth her best yet again and deservedly took home the bronze medal this edition. The badminton ace made a name for herself as the first Indian woman athlete ever, to win two medals at the games. Indian wrestlers as always, never fail to impress. Ravi Kumar Dahiya and Bajrang Punia fought tough battles to add a silver and a bronze respectively to the medal haul. Tokyo also witnessed the much-awaited revival of our national sport.

The men's hockey team clinched their first medal in 41 years after a nail-biting 5-4 win over Germany, in the bronze medal match. The women's team too, despite finishing at a heartbreaking 4th place, manifested a true Chak-De moment, winning India's hearts. The best, however, was saved for last. The penultimate day of the fortnight saw the birth of new hope and a legend. 23-year-old Neeraj Chopra weaved magic with a javelin in his hands. The belief in his eyes didn't go unnoticed as he heaved a massive 87.58m for the gold, India's first-ever in the athletics event. Crores of Indians were left teary-eyed as the national anthem played against the backdrop. Although Indian sport still has a long way to go, Tokyo has indeed proven to be a beacon of hope for its future.

## INDIA: EMERGING SUPERPOWER IN SPORTS?

By Tanya Kolanupaka, *Journalist*

Beary-eyed, millions of Indians watched as India played against West Indies at the 1983 World Cup, the win changing the face of cricket in the country forever. Fast forward to 2014, the change in sporting culture was apparent. The nation awaited many more sterling performances following the incredible run at the Commonwealth Games and the Asian Games. The Tokyo Olympics held this year did not disappoint fans either, with a medal haul from various events. Neeraj Chopra with his 87.58m javelin throw scripted history, winning a gold. Ravi Kumar Dahiya, Bajrang Punia and Deepak Punia emerged victorious in wrestling, making it India's second-most successful sport.

Indian athletes have also made a mark in sports like badminton, boxing, shooting, hockey, weightlifting and even golf. Brands across various categories have rolled out campaigns, celebrating the inspirational journey of these athletes. For years, cricketers, like film stars, have had enormous commercial appeal. With growing participation in international

sports, advertisers have multiple options. However, are they open to exploring sports beyond cricket? While cricket has a higher viewership, other disciplines are not far behind. Viewership for many other sports has seen a substantial spike. Live-streaming non-cricketing sporting events such as football has become a successful strategy for popular broadcasting networks. The most worshipped sport in India has always been cricket. The increasing fan following for other sports has resulted in a change in sporting culture, reflecting a broader interest in sporting disciplines across India in the last three years. This seems like a breath of fresh air and we are certainly up for it.

## LOVE ONE, RESPECT BOTH!

By R Nitin Kumar, *Journalist*

Cristiano Ronaldo versus Lionel Messi. "Who is the real GOAT?" is arguably the biggest conundrum the football fraternity has seen since its inception. Is it the Portuguese phenomenon or the Argentine magnifico? Is it even possible to be a football fan these days and love either Leo or Cristiano while admiring both? What is it about a European champion with 111 international goals that get you to slander him? What is it about a six-time Ballon d'Or winner with exceptional playmaking and goal-scoring exploits that makes you question his supremacy? You can always have favourites in the way Xavi, Iniesta and Zlatan identify as team Messi while Mbappe, Pele and Scholes, all side with team Ronaldo. The duo holds a total of 2012 appearances, 1531 goals, 542 assists, whopping 72 trophies, 11 Ballon d'Ors, 10 European Golden shoe and a legacy larger than life. Considering the sheer magnitude of numbers put forth by these two, fans generally agree that the two mavericks are a class apart. But must you still hate one purely because of your love for the other? After all, these two will arguably go down as the greatest to lace up a pair of football boots. Arguments notwithstanding, you cannot but appreciate the exceptional servants of the game who dominated world football for over 15 years and pushed each other to compete at the highest level. They are top tier, both as footballers and human beings. The void that will remain in this modern-day pantomime we call football will be beyond measure when they hang up their boots.

## HAMILTON VS VERSTAPPEN: SURVIVAL OF THE FASTEST

By Tanya Kolanupaka, *Journalist*

Formula 1! Where state-of-the-art machines lap the best tracks in the fastest time possible and driver mentalities resemble those of fighter pilots. When the 2021 season rolled out, it was obvious from pre-season testing that it was Red Bull and the Mercedes AMG F1 team in contention for the title. The Mercedes' seven-time world champion Lewis Hamilton and Red Bull's Max Verstappen, the youngest ever F1 racer. F1 fans around the world rejoiced at the prospect of a full-blown fight between the two drivers, in a seemingly unpredictable championship. Mercedes and Red Bull Honda have always been fierce rivals. After several years of dominance by Hamilton and Mercedes, will Verstappen be able to change that? The 22 race calendar and newly introduced sprint races are bound to ratchet up the pressure. The competition also took a dramatic turn with a series of controversies surrounding the rivals. The infamous crash at Silverstone saw Verstappen lose his 30 point lead. The Hamilton-Lewis crash at the Italian GP saw Verstappen's Red Bull land on top of Hamilton's Mercedes, sending both drivers out of the race. There have been many other flashpoints between the drivers who are separated by just two points, with Hamilton in the lead, post the Russian Grand Prix. The Turkish Grand Prix on the 10th of October will be a keenly watched event. The intense 2021 campaign should be fondly remembered for years to come.

## MANNA FOR CRICKET FANDOM!

By Sanjana Vijayan, *Editor*

The ICC T20 World Cup 2021 is all set to begin on October 17th, with the group stages followed by the Super 12. The draw for the cup, announced on July 16th, saw defending champions West Indies in group 1, along with Australia, South Africa and England. Meanwhile, inaugural champions India, are in group 2 alongside Pakistan, New Zealand and Afghanistan. Two more teams are set to join each group following the qualifying round, contested by Sri Lanka, Ireland, the Netherlands, Namibia, Bangladesh, Papua New Guinea, Oman and Scotland. The top two teams in each group of the Super 12 stage progress to the semi-finals, with the finals set to be played in Dubai on 14th November.

With barely a fortnight for the commencement of the tournament, there have been questions, hype, upsets and some bold predictions. Sri Lanka, the 2014 champions, saw a serious decline, missing the Super 12. Afghanistan on the other hand, leapfrogged over Sri Lanka and are expected to be the dark horses of Group 2. Considering the Rashid Khan led outfit were the only team to beat the West Indies in the previous edition of the ICC T20 World Cup, a few surprises from Group 2 may be ex-

pected. India, along with England, once again start an ICC World event as pre-tournament favourites. Current ODI champions, the English are expected to be front runners for the cup. Since the same venue saw substantial action in IPL in recent times, the men in blue have an upper hand, with every member in the squad conversant with playing conditions. MS Dhoni's return to cricket as the squad's mentor might be a game-changer.

With Kohli's side opening their campaign in a blockbuster encounter against Pakistan on the 24th of October, will the captain and his team end a 14-year wait for the ICC T20 World Cup trophy?

## AIR INDIA PRIVATIZATION

By Sifath Singh, *Sub-Editor*

The loss-making government-owned enterprise is finally set to take off onto the route of privatization. Tata Sons and SpiceJet were two of the most publicly recognized financial bidders and the former won back the carrier for Rs.18,000 crore. Surprisingly, this is not the first time the government has attempted to disinvest its stake in the national carrier. In 2018, 76 percent of the company's stake was up for sale. Unfortunately, it didn't attract any private players (possible reasons being the undisclosed debt). The government

made the deal more compelling this time round as 100 percent of ownership is up for stake. The books revealed a total debt of Rs 23,000 crores, which has gotten even worse during the pandemic with no profitable operation.

On the contrary, unions have opposed the action. Following these, Shri Hardeep S Puri, then minister of civil aviation, has made it clear that the company's fate is either privatization or shutting operations completely.

The government further plans to ease its fiscal burden by selling its holdings in BPCL (53 percent). This would roughly translate into a Rs 50,000 crore market valuation. Interestingly, LIC IPO will be a major contributor for the government to seal the Air India deal. The whole process is expected to reach completion by the end of the fiscal year.

## NUMBERS OFF THE ROOF!

By Aadish Sanghvi, *Editor*

As the Indian economy has been soaring high in the current markets, NIFTY and Sensex have shown unparalleled figures along the course of their bullish runs. NIFTY continues to travel up and appears to be heading to its next milestone that is 16000. It's smart to support at 15500-15600 and as long as that's not disrespected on a closing basis, the trend continues to stay bullish and traders will accumulate long positions for higher targets. Economists say that the market is completely joined to the economic process in long periods of 10-20 years, the same cannot be said for the short term. While the market is always forward-looking, in the short term it is driven by daily news flow, and the news around vaccination of 18 and above, shortage of vaccines, rise or fall in daily cases etc. are currently driving market movement. Given the fact that in the next 3-4 years the economy is expected to go back to 7-8% GDP growth rates, one can only guess the levels at which the Sensex would trade in three to four

years. The market's massive hope is on the vaccination drive. While infection and mortality are low among people who have been vaccinated, the market is optimistic that in two months' time when India would have vaccinated around 35-40 crore people, it will result in free travel and near opening up of the economy. There is a sense that it is a pain of one to two months and normalization will be faster. The hope is that the second quarter will be better and the festive season will be quite strong.

## BYJU'S, ON A ROLL

By Anushka Nalamati, *Journalist*

India's highest-valued startup, Byju's, is making strides in the Edtech sector. Established by Byju Raveendran and Divya Gokulnath in 2011, the company has come a long way and now boasts more than 100 million users. It is now expanding into international markets.

In June 2021, Byju's raised funds from UBS, global investment business Blackstone, Abu Dhabi state fund ADQ, Phoenix Rising, Eric Yuan and landed at a valuation of \$16.5 billion thus surpassing Paytm to become the highest valued startup in India and 11th in the world. Since then it has made rapid, successive acquisitions which include the higher education platform Great Learning, the test preparation provider Aakash Educational Services and more.

The largest Edtech company in the world says it views its acquisitions more as integrations. It has made 15 acquisitions so far and all of them have been complementary to Byju's, assisting it to achieve the standing it has today in the world. More recently, it has been in talks with investors to raise funds, bringing it to a valuation of \$21 billion.

There are plans for an IPO as early as the second quarter of next year scrapping the previous timeline of 18-24 months. Byju's can become a global leading company in the Edtech industry and this seems even more likely with China's crackdown on its for-profit Edtech startups.

## AN INTRODUCTION TO E-RUPI

By Sifath Singh, *Sub-Editor*

Prime Minister Narendra Modi announced a cashless instrument for digital payment called e-RUPI on 2nd August 2021. The contactless technology will aid in making Direct Benefit Transfer (DBT) more accessible and seamless. The National Payments Corporation of India (NPCI), which oversees the digital payments ecosystem in India, will be in charge of all services of e-RUPI.

e-RUPI is a digital voucher, which the beneficiary gets on their phone in the form of a QR code or an SMS. It will essentially work as a prepaid gift voucher that is redeemable at respective accepting centres. For example, if the government plans to provide a scholarship to a student, they are sent a voucher to their registered mobile number, which the student can use at specified institutions to avail the scholarship. This is very advantageous since it lets the government keep a record of usage of the money. It also ensures that the money is not used in any unintended form.

As of now, NPCI has partnered with 11 banks for e-RUPI transactions. The central government is already working on developing a central bank digital currency. The launch of e-RUPI will help in highlighting the persisting flaws in the present digital payment infrastructure.

e-RUPI will be backed by the Indian rupee, as an underlying asset, which separates it from virtual currencies in both functionality and specificity.

## RISES IN FUEL DETRIMENTAL TO ECONOMY

By Kundana Pooskur, *Journalist*

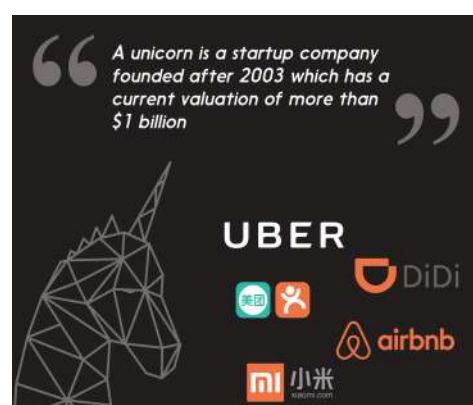

Fuel prices have skyrocketed across the country increasing over twenty-four times since May, eight times in June itself. According to the State bank of India, consistently high fuel prices have pushed inflation up in the country in the past few months. RBI has called out for a reduction in taxes on petrol and diesel by Central and State governments citing rising inflationary pressures and the threat of higher inflation and the economic impact of the second Covid-19 wave. Petrol prices have risen above Rs 100 per litre in more than six states. If fuel prices remain upraised, especially

diesel, it will lead to a rise in headline inflation. Even though inflation has eased over the past few months, higher fuel costs could again fuel inflation. In these circumstances, India's economy is expected to see a setback in recovery as it will directly affect the consumption levels among citizens. The government has blamed the record-high fuel prices on a spike in global crude prices and intimated that it wouldn't cut taxes and said that inflation wouldn't be influenced by high fuel prices. This gives food for thought because it's a regressive tax when consumers prioritize transportation over other aspects then it will get into generalized inflation. And inflation is, in a way, a kind of an additional tax on everybody. Now is the time to bring down taxes on diesel and petrol, which will also reduce the rate of inflation as fuel is an input cost into almost all as-

## THE RISE OF UNICORNS - STARTUP REVOLUTION OF 2021

By Kundana Pooskur, *Journalist*

India is on its way to becoming the world's fastest-growing ecosystem with 28 new unicorns in the first nine months of 2021, taking the total number of unicorns in the country to 66 which makes it the most number of unicorns and IPOs in its history. A unicorn is a private startup whose valuation is \$1 billion or more. 2021's unicorns include Grofers, fintech platform BharatPe, CoinDCX. The 66 unicorns in India have rendered a

revenue of over \$15 billion. From the year 2011 to 2014, there has only been one unicorn per year but these numbers increased down the line. More than anything else, this implies the start of investors' faith in the startup ecosystem of India which projects booming potential. Unicorns are crucial as they always stick by the country they're originated in, and they contribute significantly to the local economy through taxes and job creation. The government has put in the effort by taking initiative with 'Startup India' to acuminat the startup's ecosystem. Bengaluru has the most number of unicorns with over 1/3 of the country's unicorns headquartered in the south Indian city, followed by Delhi. We can expect further growth in technological startups in upcoming years with India's increased internet usage. There has also been an increase in B2B startups like Udaan compared with before when B2C startups dominated. However, the number could have been higher in India if some startups didn't leave the country to the US after achieving a certain benchmark or for better treatment.

## THE WAR'S NOT OVER...

By Sri Teja, CSE-3, 2/4

While US troops have officially announced an end to military operations in Afghanistan, this in no way has helped the country get back to normal. It has instead been instrumental in turning the nation into a warzone ruled by terrorists. Taliban militants, who still have close ties to Al-Qaeda and other terrorist groups, now control Afghanistan. There is no guarantee that Afghanistan won't revert to its prior status as a haven for terrorists aiming to harm the United States and its global partners. The Taliban craves recognition and money, and the US administration should strategically exert pressure on the group to form a proper government and ensure the protection of minorities' and women's rights. With Pakistan, China, Iran and Russia poised to build relations with the Taliban, the US must start a new phase with Afghanistan. Being one of the most significant Asian partners to Afghanistan over the last two decades, India can play a vital role in helping ease Afghanistan's refugee crisis. Afghans have been the second-largest refugee population fleeing to India after the Rohingyas, making up 37 per

cent of the total refugee population, according to the UNHCR. They have chosen India because of regional proximity and historically friendly ties between the two countries. India could immediately rationalize its immigration policy regarding thousands of Afghan refugees and asylum seekers. India should focus on the implementation of an Afghan-centric post-conflict development strategy. This would help restore state institutions, revive the economy, prevent territory usage for regional and global acts of terrorism and criminality and enable Afghanistan to realize its natural role as a land bridge between South Asia and Central Asia for global trade and investment.

## NEW GOVERNMENT IN LEBANON

By Prasannaganapati M Nayak, Mechanical FI, 2/4

Lebanon, a small country on the coasts of the Mediterranean Sea known for its rich archaeological heritage, is going through one of the worst financial crises in history leading to a new government taking charge of the country. To truly understand what is happening, we must travel back to 1990, just when the civil war had ended.

A second republic was established in Lebanon, with equal power distributed among the President, the Prime Minister and the Speaker of the parliament. Equal representation rights were given to Muslims and Christians. However, the friction between these communities led to foreign countries such as Iran and Saudi Arabia exert their religious influence in Lebanon over the years. Factors like improper governance, corruption and a sky-high unemployment rate led to the country's debt to GDP ratio becoming 174.32% in 2019.

The people of Lebanon as a consequence started the October revolution which was followed by the resignation of the Prime Minister. Hassan Diab was appointed as the

new Prime Minister to improve the situation in the country but his efforts were cut short by the Covid-19 pandemic. Furthermore, the Beirut blast led to the resignation of his government in 2020.

With hopes of making Lebanon a better place for its citizenry, Najib Mikati, has now been appointed as the new Prime Minister and is working towards ending the sectarian political system and government corruption, recovering stolen funds and providing fair tax and financial procedures to his people. The cabinet is also expected to come under massive international pressure to usher in economic reforms, ensure 2022 parliamentary elections take place as scheduled, and to restart negotiations with the International Monetary Fund.

## THE CRISIS OF DEMOCRACY IN MYANMAR: RESTORATION OR ANNIHILATION?

By D Asritha Reddy, CSE-3, 2/4

For the people of Myanmar, democracy has been a long-standing dream. Though the people of Myanmar espoused civilian rule in the 2015 elections, held after nearly 55 years of rule by its military junta, the idea of the country becoming a full-fledged democracy seemed to be a far-fetched one. The government structure predominantly continued to operate under the clutches of the armed forces by sidelining elected representatives. The landmark victory of the NDP led by Aung San Suu Kyi in the recent 2020 elections, threatened and questioned the long-wielded authority and political dominance of the military in the country. On February 1st, 2021, the military orchestrated a coup and declared a state emergency under the pretext of

voter fraud. The ensuing countrywide protests were suppressed by the military using brute force. According to Winston Churchill, "democracy is the worst form of government - except for all the others that have been tried." Though democracy isn't a panacea for all governance problems, it provides a space for discussion, debate, dissent, and inclusive decision-making. With the collapse of the partial democratic setup, the hope of transitioning into a fully functioning democracy has now been smashed. Grave human rights violations against minority groups like the Rohingyas, human rights activists, and media personnel in Myanmar will continue to haunt the world. Abuse of power by the military with complete impunity and zero accountability would endanger the rights of citizens and residents of Myanmar. International organizations coupled with like-minded pro-democratic countries must exert pressure on the junta through either diplomacy or sanctions to restore democracy. Due negligence by fellow countries in the name of realpolitik to safeguard their own parochial national interests would only lead to the annihilation of democratic values in Myanmar.

## GROWTH OF ESPORTS AND ITS PROMINENCE IN INDIA

By Sindhu Yamsani, CSE-1, 2/4

Of late, Esports has acquired widespread attention with the sector growing exponentially over the last decade with more developers and investors hopping into it. What began as a subset of the gaming business has now grown to the point of being its own sector. Esports is professional or semi-professional competitive gaming in an organized format (tournament or league) with a specific goal, such as winning a championship title or prize money. As a sport, it gained much popularity during the pandemic induced lockdowns witnessed in 2020 and 2021. As competitive video games continue to integrate into popular culture, global investors, brands, media outlets, and consumers are all paying attention to the rise in popularity of esports. The field has hit the stratosphere in large part because of live streaming and gaming. Video gaming-specific streaming platforms like Twitch and YouTube Gaming give fans a direct connection to the players and teams. India was previously absent from the esports scene until 2018 but the emergence of PUBG Mobile accelerated the Indian ecosystem, establishing the country as a significant worldwide market for esports. India

has been holding massive international and national esports events since 2018, the most notable of which being DreamHack Delhi, ESL One: Mumbai, COBX Masters to name a few. Though at a nascent stage, the esports market size in India has quickly scaled to INR 3 billion in FY2021, up from \$288.3K in FY2017 and is expected to reach INR 11 billion by FY2025. The esports industry is expected to grow at 46% CAGR over the next four years and streaming platforms will generate the largest chunk of esports revenues. With India's capabilities in mobile gaming recognised the world over, the country is sure to ultimately produce world-class esports athletes capable of competing at the topmost levels.

## LAMDA - GOOGLE'S NEXT BIG THING

By K. Sai Lakshmi Priya, CSE-5 (IOT,CS,BCT), 2/4

In mid 2020, OpenAI presented an all powerful language called GPT-3 (Generative Pre-Training Transformer version 3). This cutting edge technology aims to revolutionise the world of AI. LaMDA stands for 'language model for dialogue applications' and is based on transformer architecture. There is a crucial distinction between this system and other chatbots, which is the fact that LaMDA can also manage open-ended natural conversations. Google's VP for product management, Eli Collins and their senior research director Zoubin Ghahramani explained in their blog post, that since human conversations have distinctive chaotic features, by tackling such situations LaMDA can entirely revolutionize chatbot technology. A chatbot with these abilities could efficiently engage in natural conversations. LaMDA excels at detecting sensibilities, that is whether a sentence makes sense in the context of the conversation and can keep its responses relevant to the conversation. Some of the following features of LaMDA were demonstrated in a conference by Google CEO, Sundar Pichai- Specificity: The team asked LaMDA what they'd see if they visited Pluto. It answered: "You would get to see a massive canyon, some frozen icebergs, geysers, and some craters." LaMDA could have

said something like: "A nice view," or "Some land and the stars around me," but decided to be very specific in detailing Pluto's geology. This was possible only because LaMDA's AI was pre-trained with massive amounts of factual data. Factuality: The team asked if Pluto had had any visitors, to which the system replied: "I have had some. The most notable was New Horizons, the spacecraft that visited me." In 2006 NASA launched the New Horizons mission to explore Pluto and its moons. LaMDA got this fact right. Interesting: The team asked LaMDA what it wished people knew about Pluto, to which it responded: "I wish people knew I am not just a random ice ball. I am actually a beautiful planet." The interesting bit here is that LaMDA is appearing to convey emotion, which gives the conversation a deeper layer. Thus, LaMDA surely amounts to a never seen before technology.

## 2021 NBA PLAYOFFS

By B. Pravalika, CSE-3, 2/4

Missed watching the NBA Playoffs this year and don't have seemingly enough time to watch the highlights? No more worries as this article covers all the highlights of the playoffs right here!

This year, the NBA season was reduced to 72 games for each team and the start date of the playoffs was moved from its usual time in mid-April to May 22, 2021. The playoffs started off with gripping matches wherein 76ers won against Washington Wizards and Atlanta Hawks won against New York Knicks. After multiple knockdowns and drag-outs the Hawks lost their chance to get into the finals to the Bucks in the Eastern Conference.

Meanwhile, in the Western Conference, the first match was held between Utah Jazz and Memphis Grizzlies wherein Jazz won the match but later lost to the LA Clippers in Round 2. After all the incredible steals and

dunks and rebounds, the Phoenix Suns qualified for the finals. Consistently strong performances ensured that the Suns and Bucks entered the finals. The Suns led the way with their outstanding opening quarter but within a few moments the Bucks regained the lead and kept getting better leading to a tie at half-time. From joy to despair to exhilaration the match was totally worth watching and ended with a score of 105 vs 98 with the Milwaukee Bucks taking the NBA trophy home for the first time in 50 years with one of the most iconic performances.

# CBIT, MY STORY

By Malika Rani, 2021 Graduate

They say a part of you dies and is reborn every single day. To pen down the times that I have spent in this campus that unraveled new sides of me and shed the old ones is something I'm honored to do. When I recall the first day the gates were opened to this secondary abode that I would spend the next four years of my life, I remember being equal parts thrilled and jittery. A stream of questions running in my mind and I, running around the campus trying to navigate every nook and corner along the way.

Along the way, a crucial part of my time here would have to be finding my tribe. Friends who I now cherish and are the closest to me. Being a fresher meant bringing the best out of you in terms of academics. Besides that, it also entailed finding your place amidst the numerous avenues you can explore in college clubs. Time being a sneaky butterfly flew right by and I turned a senior. Second-year is the sweet spot where acquaintances and experiences grow. You feel daunted by the curriculum but also at ease because of the extracurriculars that keep you engaged.

Friends and professors with whom you share a bond keep you going. Being a part of clubs and organizing fests would have to

be the most cherished times. The energy and vibrancy of the campus are something I'd dearly miss.

The following years when thoughts about a career ahead loomed in my mind, uncertainty and existential crisis did follow suit and the pandemic had just hit. Adapting to the online mode, Virtual sessions, and distancing socially as well as emotionally took a toll but the only way out was through.

Looking back, I think a lot of us missed out on a lot of moments that we would've taken with us forever but thankfully, it all came to a pleasant end.

Those tiny moments of joy in this place where I walked leisurely amidst lanes laced with plumerias in monsoons, whiling time away with friends, would be indefinitely etched in my memory and nothing could ever replace that.

# THE FREE MARKET ISN'T REALLY FREE

By Shoieb Rahman, IT-2, 3/4

Shorting in the market refers to selling stocks before acquiring them with the aim to make a profit when the stock price falls. This was the very tactic Melvin Capital planned to utilize by predicting the fall of GameStop stocks. Their attempts, however, turned futile when one member of the popular subreddit r/wallstreetbets noticed the unbalanced percentage of short stocks. By January 2021, 140% of GameStop shares were being lent out. This now urged retail investors to buy up GameStop shares in bulk, driving the price higher, creating large losses for the hedge funds involved.

This unprecedented turn of events furied institutional investors to use their wealth and influence to manipulate the market and save their pockets. Robinhood, a free-trading application used by millions, heavily restricted the purchase of these shares by retail investors while allowing large hedge funds to continue their practices unhindered. Robinhood officially cited the volatility of the stocks which may lead to unwanted fluctuations in their SEC net capital obligations and cleaning

house deposits as a broker to be the sole reason for their actions. The general public however, did not accept these clarifications as class action lawsuits have since been filed against Robinhood for market manipulation. "The complexity of the issues alone suggests we are looking at years", says Sergio Campos, a professor at the University of Miami School of Law in regards to the timeline to hold the guilty accountable.

The GameStop saga revealed the underhanded practices of the stock market and raised the question; How free is the free market when those in power can manipulate the market at their will without any consequences?

# FUN TRIVIA FACTS

By Kundana Pooskur, Journalist

# FESTS OF CBIT

By Tanya Kolanupaka, *Journalist*

Anushka Nalamati, *Journalist*

## SHRUTHI: A Cultural Fiesta

Students hustling around the campus and decorations going on in full swing are a common sight during CBIT's most anticipated event - Shruthi. Amazing performances with captivating decor to compliment them makes this visual delight the most remarkable annual occasion for the college. Step into the campus and various food stalls offering mouth-watering food await you. But that is not all. CBIT has always been known for the enormous amount of talent it harbours. While Chaitanya Sam-skruthi ensures that no stone is left unturned in organising the fest, Chaitanya Chaaya that includes the film and photography clubs ensures no moment is left uncaptured and sees to it that you do not miss out on any of the great visual treats with their celebrated film fest. For all the music-lovers out there, Chaitanya Geethi and Vaadya have got you covered with prodigious singers rendering their melodious best throughout Shruthi. UDC, the dance community of CBIT delivers scintillating performances year after year. With expressions on point, their intriguing acts are thoroughly worth experiencing. The occasion is crafted with an eye for absolute detail which eventuates in providing flawlessly orchestrated events from start to finish. To top it off, the DJ evening is sure to bring you some great foot-tapping music. Want to know all the happenings on campus at one place? Transcendent's annual Newsletter will be your one stop shop, always at your disposal to help you with just that. Cherish these three days of extravagant entertainment packed with cultural, literary and sports events!

## SUDHEE: A Technical Wonderland

Which engineering college is complete without its own technical fest? Well, Sudhee holds the answer to that for CBIT. For two whole days of the technical spectacle, all nine departments belt out a symphony of witty events and presentations, giving us a peek into each fascinating branch of engineering and MBA. The campus is a medley of extraordinary ideas just waiting to be shared and endless competitions for us to experience. The branch wise flagship events that constitute Sudhee are Chemspark, Technical Ecstasy, Civilizations, Mechanica, Electret, Techeon and Yukthi, Synapse, Headstart, Neozion. Judging from the names themselves we can say that each department presents creative ideas and innovative research along with unique events to celebrate their specialisations. As you might have surmised by now, this fest is a chance for us engineers and MBA students to go out and share ideas we think are amazing and research that is ground-breaking.

## 'LIT' -ERATI

The literary wing of CBIT is known to conduct one of the most enthralling events on campus - Literati. The one-day festival, organised during Shruthi, is for all the literary enthusiasts out there. It is a full-fledged celebration with several contests lined up for the day including quizzes, discussions, debates, short film reviews etc. Language should not be a barrier when it comes to literature so Literati presents Hindi and Telugu events as well. Be it book reviews for the bibliophiles or creative writing events for the aesthetes, Literati has it all. With 11 editions of Literati yet and each one only getting more exhilarating with time, Chaitanya Saahithi which includes literary clubs like Transcendent and Communicando puts its best foot forward to ensure that the event is a resounding success. This multi-lingual and multi-disciplinary event is thus bound to keep you entertained. So, put on your thinking caps and party hats to participate and celebrate creativity in all forms.

## HOMECOMING : Sweet Home CBIT

Ever wondered about all the people who walked through the same lanes of this college as you and sat in all those classrooms before us? Where are they now and what are they doing? As you might have probably guessed by now, Homecoming is that time of the year when we celebrate all those who came here before us, our alumni. Hence the name, homecoming for this is when they come back to their home - CBIT! Organized by Chaitanya Smriti, homecoming boasts of a day filled with a series of fun and boisterous events. Our amazing alumni impart words of wisdom to us younger souls, sharing their invaluable experiences and knowledge. Some of the extraordinary achievers are also felicitated. The prodigal events aim to bring their memories rushing back and transport them to the good old days making them reminisce what CBIT was and will always mean to them.

## AURA: A Sports Carnival

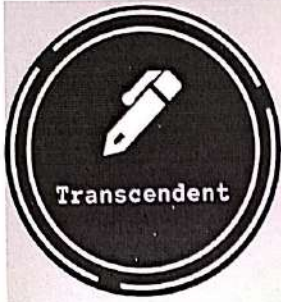

Every year, for a month, our campus transforms into a sporting arena to host a glorious celebration of athletics. Aura brings together students with a love for all things sporty, from various colleges all over Hyderabad and the college bustles with energy like never before. The entire student community comes together to celebrate the talent and heart of each player. Chaitanya Kreedha, the organizers of this annual event present a slew of different sports to take part in, ranging from indoor sports like table tennis, badminton and games like carrom and chess to basketball, volleyball, cricket, football and many more. Time stands testimony to Chaitanya Kreedha's success every year in ensuring that everyone is infused with the true spirit of sports in the thrilling one-month-long run-up to winning the prized trophy that's handed to the victorious branch during Shruthi.

# CBIT AT A GLANCE

From the ashes, a fire shall be woken,  
A light from the shadows shall spring.

# Resurgence

Humankind misses the future when they mistake the temporary for the timeless; and today, just about everything is temporary. The more we forget that there is another world to come and that world is a result of resurgence. Now and again, resurgence comes off as the supreme caliber of power. It lets you evade mediocrity, cognitive biases, simple errors and impels purpose. It is a truth universally acknowledged, that brings into your life, more power, more happiness, and joy. It helps us learn to contact and release temporary failure of judgement. Resurgence is the ticket to improvising; it is the source that invigorates realization, prowess, and prosperity. It is often interpreted as an apt analogy that is capable of emotional, traumatic renewal; the intrinsic capacity to learn and adapt. In the past year,

when consistently staying in touch with the teacher and batchmates was made more strenuous, students learned to adjust to the state of affairs and interact just as easily. This badges resurgence. It so happens that a person alone can use his/her ability, a vivid reason to declare that it is an awesome responsibility. This is the first stage of failure of negative action, the end of defeatism and despondency. We often find ourselves drunk on our own ideas. To sober up, we forget to take a step back every now and then to examine our quality in hindsight. From resurgence, we infer that choices are broader than the rock and the hard place, and open our eyes to other, superior alternatives. Resurgence marks 'rebirth', a peculiar notion, but still veracious. Just as quickly as the world unfolded and saw itself recover from a pandemic, normalcy became an element of revival. For instance, the myth of the phoenix bird sets a great illustration. It symbolizes resurrection and life after death. When the bird felt its death was near, every 500 to 1,461 years, it would build a nest of aromatic wood and set it on fire. The bird was then consumed by the flames. In due course, a new phoenix sprang forth from the pyre. As a powerful spiritual totem, the phoenix is the ultimate symbol of strength and renewal. Analogous to this was our comeback as we pushed through and espoused the causes and adapted to the new normal. One cannot rewrite the chapters of history but can strive to reinvent the present and shape the future. Resurgence will highlight renaissance and the pathway to fresh beginnings on the confident conviction that revival is universal.

## Team Transcendent

# Let's Push your first repository to GitHub

Source: The Daily Bug

Today, Git and GitHub have become a standard in the Tech industry. These tools are used to manage projects in a better way and primarily, increase the efficiency while collaborating on a project.

Alright! First we need to understand that Git and GitHub are two different tools, which serve different purposes.

### What is Git?

Git is an open source distributed Version Control System(VCS). Now, what is a VCS? A Version Control, records changes made to the files over time, and hence, it helps to maintain different versions of the files which helps the developers to refer to it at any point in time.

### What is GitHub?

GitHub is a place where all the developers can store their repositories. GitHub enables multiple developers to work on the same project while working from different places.

**A Small Tip!** If you're a student, GitHub gives GitHub student pack that enables you to maintain unlimited private repositories and allows you to host them on GitHub pages for free.

### Setting up Git and GitHub

The first step is to download and install all the latest Git version that suits your operating system. You can use this [link](https://git-scm.com/downloads). Once you've installed Git on your local machine, you will need to create a GitHub account where all your projects can be stored. Click on this [link](https://www.github.com) to go to GitHub.

After you have your GitHub account handy, you'll need to configure Git on your computer in order to work with your projects. To do that, right-click on your PC, open `git bash` and type the following commands. In a Mac/Linux machine you can directly proceed with the default terminal.

```
git config --global user.name "your GitHub username"
git config --global user.email "your GitHub email ID"
```

**Note:** The `--global` option links the username and email globally to all your current and future projects at once. Otherwise, you would have to configure your username and email every time you push your repository to GitHub.

### Creating your first git repository

Now that the configuration part is over, let's create our first repository on GitHub. Once you've logged on to GitHub you can click the `New` button to create a new repository. After clicking the `New` button, you will have to name your repository and then click the `Create Repository` button. **Tadaa!** You've now created your first git repository. Now, let's learn how to move your files into your GitHub Repo from your local machine.

### Create a repository on your Local Machine

Open a `New` folder on your local machine, move into that folder, right-click and open `git bash`. Inside the terminal type the following command.

```
git init
```

**Note:** Whenever I use the word `repository`, it refers to a `project folder` that you're working with.

Once you type the command you will see a message that says `Initialized an empty git repository in ...`. That means, the current folder is a local git repository. Now, you need to link this local repository on your computer with the repository that you have created previously on GitHub.

### Linking your local repo and GitHub Repo

You can link your local repository and the GitHub repository by using the following command.

```
git remote add origin <your repo url>
```

**Example:** `git remote add origin https://github.com/YourUsername/FirstRepo.git`

You can find the repository URL inside your repository as shown below if it's empty. In case, if you want to connect a repository that already has some data (like the `main` and `file`) then you can find the URL by clicking on the `Code` button available on the repo dashboard.

**Note:** Make sure that you're using the `https` url and not the `SSH` url!

Now let's make some changes to our repository and see if the changes are reflected on the GitHub repository or not.

You can check the status of your repository at any point in time using the `git status` command. Now, add a dummy text file to the repository. Then, type the `git status` command again in your `git` terminal. You'll see a message similar to the below one.

```
git status
On branch main
Untracked files:
  (use "git add" to track)
  dummy.txt

nothing added to commit but untracked files present (use "git add" to track)
```

This message means that the file is present in the folder but is not yet moved to the staging area. While using you'll need to understand that the files are moved to a place called the staging area before they are moved to GitHub.

To move the files to the staging area, use the following command

```
git add <filename>
git add . # - . adds move all the files
```

The `git add` command will move all the files to the staging area. Now, when you type the `git status` command again, you'll notice that file name changes to green color. It means that now your files are successfully moved to the staging area.

```
git status
On branch main
Changes to be committed:
  (use "git reset" to unstage)
  new file:   dummy.txt
```

Now your files are moved to the staging area which is one step before committing your files to your repository. Now you'll need to commit your changes that you've made to the repository.

To commit the changes made to your repository, you need to type the below command

```
git commit -m "your commit message"
```

The command will show changes made along with your commit message.

```
git status
On branch main
nothing to commit, working tree clean
```

Now when you check your repos on GitHub, you'll find that the repo is still empty or the same as before. To find the changes that you made to local repo on GitHub you'll have to type one final command as shown below.

```
git push origin master
```

When you break the command down you'll understand it better. The first argument `origin` is the name of the remote that we used along with the url in the beginning to link the repos. The second argument `master` is the name of the branch that you're currently working with. The default branch is set to `master`.

**Voila!** You pushed your first project to GitHub and how easy it was! Do give a clap if you liked the article.

I'll explain about branches, handling pull requests and merge conflicts while working with multiple people on a project in my coming article.

## Lifecycle in Android Architecture Components

Last updated: 03/06/2021

Read Discuss Practice Video Courses

Lifecycle is one of the [Android Architecture Components](#) which was released by Google to make it easier for all the Android developers. The Lifecycle is a class/interface which holds the information about the state of an activity/fragment and also contains other objects to observe this state by reacting back with it. The Lifecycle component is concerned with the Android Lifecycle events of a component such as an [Activity](#) or [Fragment](#). It has three main classes that we deal with:

1. Lifecycle
2. LifecycleOwner
3. LifecycleObserver

### 1. Lifecycle

Lifecycle is a process that tells us about the **Events** performed on an Activity/Fragment. We have a Lifecycle as a class that has two types of enumerations to track the components, State and Event. Event and State are used to determine the Lifecycle. Each event triggers its own state.

- onCreate()** Called when the activity is first created.
- onStart()** Called when the activity becomes visible to the user.
- onResume()** Called when the activity starts interacting with the user.
- onPause()** Called when the current activity is being paused and the previous activity is resumed.
- onStop()** Called when the activity is no longer visible to the user.
- onDestroy()** Called when the activity is destroyed by the system (either manually or by the system to conserve memory).
- onRestart()** Called when the activity has been stopped and is starting again.

With this Lifecycle Events, you can declare how your activity behaves when the user leaves and re-enters the activity.

**Example:** If you're watching a Youtube video, you might pause the video and turn off the network connection when the user switches to another app. When the user returns, you can reconnect to the network and allow the user to resume the video from the same spot.

### 2. LifecycleOwner

Every Activity has a lifecycle. This Activity with a Lifecycle Owner (any activity or fragment can be called a Lifecycle Owner). When an activity is initialized LifecycleOwner is the one that will be constructed initially. Any class that implements the **LifecycleOwner** interface indicates that it is an Android Lifecycle. For example, starting from Support Library 28.0.0, [Context](#), and [Activity](#) implement the **LifecycleOwner** interface. One can create custom LifecycleOwner components by implementing the interface and using a [LifecycleRegistry](#) to store their state.

### 3. LifecycleObserver

Lifecycle Observer, which observes the activity and keeps track of the lifecycle, and performs an action. The action performed by this Lifecycle Observer depends on the lifecycle of the Lifecycle Owner. Every Lifecycle observer has a lifecycle and based on the event or state of the lifecycle of the owner, the Lifecycle observer performs the action.

```

import androidx.lifecycle.*

public class MainActivity extends AppCompatActivity {

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        Log.d("Lifecycle", "onCreate invoked");
        lifecycle.addObserver(myObserver);
    }

    @Override
    protected void onStart() {
        Log.d("Lifecycle", "onStart invoked");
        lifecycle.addObserver(myObserver);
    }

    @Override
    protected void onResume() {
        Log.d("Lifecycle", "onResume invoked");
        lifecycle.addObserver(myObserver);
    }

    @Override
    protected void onPause() {
        Log.d("Lifecycle", "onPause invoked");
        lifecycle.addObserver(myObserver);
    }

    @Override
    protected void onStop() {
        Log.d("Lifecycle", "onStop invoked");
        lifecycle.addObserver(myObserver);
    }

    @Override
    protected void onDestroy() {
        Log.d("Lifecycle", "onDestroy invoked");
        lifecycle.removeObserver(myObserver);
    }

    @Override
    protected void onRestart() {
        Log.d("Lifecycle", "onRestart invoked");
        lifecycle.addObserver(myObserver);
    }
}

```

**Output:** You will not see any output in the emulator or device. This needs to open [Google Play Store](#).

Now run on the laptop. onCreate, onStart, and onResume methods are invoked. Now click on the HOME button. You will see on the onPause method is invoked. After a while, you will see onStop method is invoked.

Now run on the emulator. It is on the home. Now click on the center button to launch the app again. Now click on the app icon.

Now run on the tablet. onCreate, onStart and onResume methods are invoked. If you click on the emulator, the application is started again. Now click on the back button. Now you will see onPause method is invoked. After a while, you will see onStop and onDestroy methods are invoked.

# LETTER FROM TEAM TRANSCENDENT

Abiding by the theme we have implemented. It was 'Innovation' this year, we have made some fresh additions and changes to Transcendent in many facets. Starting with our exuberant Instagram page with an appealing wall, to conducting collaborative workshops and a string of online contests with many 'right-write' puns we have come a long way. Our motto was to extend our reach to all the writing enthusiasts out there and network with those of our ilk. It was delightful to have received spirited response to all the novel ideas

we as a team, have given our best shot at shaping our Transcendent to suit the best interest of its readers. We would be gratified if you all grab a copy of our newsletter and give it a read. Do go through our blog and follow us on social media, because Transcendent is as promising as its name suggests.

- TranscendentCBIT
- transcendent.cbit
- cbit.transcendent@gmail.com
- transcendentcbit.wordpress.com

## A NOTE FROM OUR FACULTY COORDINATOR

Far from being just one academic unit among many, CBIT has long drawn together the interdisciplinary, scholarly culture and one such outcome is 'Transcendent' a forum for creative writers. It's a moment of pride for me to be a part of Transcendent. The newsletter captures different events, activities, articles, and academic prowess of

teachers as well as students. The newsletter provides a larger visibility and dimension to the college and has always been striving hard to maintain the standards and hope that it will encourage many more students to be creative writers. I express my sincere appreciations to the editorial board and all the writers who contributed their generous time and effort to make this newsletter distinctively excellent.

## TRANSCENDENT X THE WRITE CLUB HYDERABAD

On 27th September, 2019, Transcendent conducted a 'Writing basics workshop' in collaboration with the Write Club Hyderabad in our college premises. The Write club is one of the largest running literature clubs based in Hyderabad. Their passion towards writing and their zeal to nurture budding writers can be seen in their weekly activities and meet-ups. The club's creative, descriptive, and intriguing methods of conducting workshops is what rivets the audience's attention to them. Their vision is to become a recognised entity for writers to reach out for support and cri-

tique. The workshop at CBIT was attended by 50+ enthusiastic participants who were trying to

WRITE CLUB  
HYDERABAD

find the right technique to write professionally. This was the first workshop of its kind conducted by Transcendent. Four brilliant

writers, including the founder of WCH- Ms. Sravanthi, were the speakers. They introduced the audience to simple yet crucial aspects of writing like imagery, structure, figures of speech, editing, writer's block and medium specific writing. With such versatile and application oriented agenda, they made sure that the workshop was a fun learning opportunity for the participants. Given the club's expertise, it'd be fair to conclude that everyone took something home with them. People walked out with tips and tricks to write impressively along with a highly credible certificate and fancy bookmarks!

## CHAPTER 2 - THE COLLEGE SAGA

Welcome aboard, freshers! It is a delight to have you on campus. To quote Brenda Peterson, 'Your life, is a book'. From an academic standpoint, you just penned your first chapter, 'The School Tale'; quite gloriously might I add, given that you've made it to CBIT. Enter into chapter 2, and the plot thickens!

To put it in a nutshell, College is an all rounded experience meant to enrich a student with experiences helping them grow

not only academically, but socially, emotionally and sometimes, culturally. The coveted campus of CBIT guarantees a versatile voyage. It could however be daunting, to set course on such a multidimensional pursuit. But once in CBIT, the only thing holding you

back from greatness is your own imagination. Apart from inculcating a sense of awareness and a passion for writing, Transcendent (newsletter and blog) strives to achieve inclusivity. This edition will certainly enthrall all the readers. For the jun-

iors exclusively however, there's a map on the final page guiding you through the college and a section on page 15 dedicated to our Awesome CBITians, with a hope that their stories will leave an indelible imprint. We would love to hear from all the freshers about their experiences at college. Find us on Facebook and Instagram. On a final note, soak in all the college experience while it lasts. Team Transcendent wishes you all the best!

## PRESIDENT'S MESSAGE

It fills my heart with joy to welcome you, the freshers' batch of 2019, into CBIT. Every year, a new batch joins us with novel ambitions and goals, and we are looking forward to guide each student on their road to success and fulfillment, throughout their time here.

It is indeed gratifying that the progress we have made so far toward our paramount ideal, the achievement of excellence and success in all aspects of education, has been prominent. We, in CBIT, have always focused our efforts into furnishing our students with the right tools, resources and prowess. We strive to provide all that we can to ensure a healthy and nurturing environment.

For innovative minds. With great enthusiasm, I look forward to the heights that we are sure to scale in the future, and I am pleased to know that we are en route to even more noteworthy accomplishments.

You, the youth of today, are the citizens of tomorrow. With the advancements in modern technology and growing innovations, today's students have access to more resources, infor-

mation, and tools than ever before in history. I have always believed in the infinite potential of a young mind, and in a rapidly globalizing society like ours, this is a more relevant belief than any other. To use the available resources, to contribute to the world around you and to innovate for the simplification of human life, must be your chosen course of action. It is our responsibility, as an institute offering education in engineering to register the modern day association between technology and human advancement. One of the largest drivers of social change and development, as perceived by us, is technology, given the ingenious ideas of today that will improve the quality of global citizens as a whole.

You are the torch bearers of that technology, and hence carry a great responsibility on your shoulders. I am convinced that you will fulfil this with great avility.

Innovation is one of the most important requisites of the scientific and technological community today, and as a premier institute in engineering, we bear the responsibility, and are equipped with

all the required resources, to lend our hand in fostering the march of innovation. Hence, I urge each and every one of you to take new paths, explore all ends, and do all in your power to turn your aspirations into fruition.

It is said that actions speak louder than words. Indeed, setting a goal is a step closer to success, but the zeal to work on it is what we look for in you, because

your skills will be measured in the future, in terms of how well they translate into action. As you pursue newer goals in technical brilliance, you must also focus on developing all-round ingenuity. The ability to articulate and communicate, as well as to work in a diverse team, and to be able to lead as well as work together, will all be necessary qualities to nurture as you

prepare for your future. We realize their significance and hence seek to ensure that you have plenty of opportunities in your journey here to foster these diverse facets. I'm confident that all of you will fulfil your goals in the years to come, and raise the institute to new heights. I look forward to witnessing your achievements. My best wishes to you all.

## TEAM TRANSCENDENT

# A MESSAGE FROM THE PRINCIPAL

It gives me immense pleasure to welcome you all to CBIT. Being the new batch of 2019, you are assured to have ahead of you, a rewarding and enriching experience throughout the duration of your time here. I welcome you with my best wishes for your journey with us.

CBIT is an institute acclaimed with prestige and respect and we have always prided ourselves in our dedicated commitment to the quality of our education and the attainment of brilliance in all facets of it. We are proud to be ranked 100 in the NIRF (MHRD) rankings this year and we only hope to do better this year. This fidelity is what stands behind all that our institute has achieved and helped maintain our calibre for many years now. It is said that the youth of the nation are the trustees of posterity. The country's growth and economy will soon depend on you youth, a nation's most powerful resource. As the providers of education to such a crucial resource, we have upon us a huge responsibility, which we have been fulfilling with pride over the course of several years.

Whether it is the placements, percentages or publications, any barometer will show our students' increasing achievement rates. This has been possible through carefully scrutinised syllabus for each course as well as ever-advancing infrastructure. We have directed all our efforts into providing the support and requisite resources for an aspiring student, whether it is theoretical knowledge or practical experience that he/she seeks to gain. In your academic journey here, we assure you that we will leave no stone unturned in guiding you with our expertise and resources, so that you may emerge triumphant in any path you choose.

The institute's success, hence, rests ultimately on the shoulders of its students. I appreciate and acknowledge the hard work that you have all put into

earning the place at CBIT, and hope that you translate the same into a potential to excel here too.

As engineering students, it is essential to realise the importance of innovative thinking, critical analysis and research. We at CBIT, encourage students to come up with creative ideas and work on them. Innovation, incubation and start-up culture is strongly promoted in our college and we have facilities to support students in all their endeavours in this regard. CBIT's

IIC ( Institute's innovation cell ) , a MHRD initiative, is active all throughout the year, providing platform for students to voice their ideas.

I would like to assure you an encouraging and supportive environment for your education here and wish you all the very best in pursuing it. I hope that your time here is a fulfilling, gratifying one, full of growth and development. You will accomplish your every climb with the great potential inside you. May you explore new opportunities, set novel goals, and achieve all you can in your four years here. All the very best for your journey.

# INNOVATION

"If you only do what you always did, you will only get what you always got."

ALEKSEY LEVIN

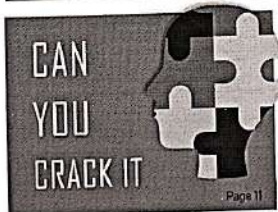

By ABHIJEEV PURKAR AND VAISHNAVI SUTHRAM, EDITORS-IN-CHIEF

More often than not, the word Innovation has fallaciously hinted at something wildly intricate. It paints a picture of extraordinary minds playing with theories of the unknown. Traditionally even, the word has implied rebellion. A nation that has seldom pushed us into the bounds of monotony, disconnecting us from our innate creative side. Innovation is as subjective as it gets. It could be interpreted differently by different people, but all great minds define it the same way. Simplicity. The greatest of ideas have also been simplistic. The menstrual cup is the best example. An affordable, reusable and eco-friendly invention and a boon for millions of women all across the globe is at the end of the day, just a simple silicone cup. The biggest drivers of innovation throughout history has been fearlessness. The courage to challenge the status quo. The boldness to ask relentlessly and the willingness to be misunderstood. The key trait that connects all distinguished innovators however, is the readiness for failure. Over 95% of all pilot products recorded in industrial history have all been failures. "There is no innovation and creativity without failure. Period." - Nikola Tesla. Knowledge drives innovation, innovation drives productivity and

productivity drives economic growth. Knowledge is the foundation. It instills unshakable belief in one's idea and without the belief, the idea can't survive. History has shown us that the best innovation doesn't come, by just giving people incentives, it comes when an environment is created where ideas can connect and thrive. India has realized the same in recent years as we press the pedal on the road to research and innovation. CBIT has also taken its first steps with the establishment of the R&E block that would usher in an era of Innovation in the college.

## In the Spirit of Integration

BY NIKHIL BOLLIMUNTHA & REENA KULKARNI

The dictionary defines integration as the organization of the constituent elements of an uneven state (with the exception only into a coordinated, homogeneous whole. Indeed, this is a different administration, cultural, comprehensive definition, but what does it really mean? No one idea springs to mind when one thinks of integration, and there would certainly be a diverse set of answers from different people.

Integration manifests itself in a variety of forms, ranging from a mathematical concept to the defining concept that maintains peace in a country. One of the first lessons children learn in Social Studies is the idea of national integration. Individuals are all unique and interesting, but to bind them together in the bonds of community is no easy task. Imagine, then, the process of cohesion that goes in creating a country. The challenge is to form a whole without taking away the essence of any of the parts. Various linguistic identities, religions and cultures can only co-exist peacefully when the process of integration takes place respectfully and harmoniously. Partition is a powerful force, but it alone cannot do this job. To be truly patriotic, people must be valued and respected as citizens. Only then can we promote our national identity, when our homogeneous population belongs to over a hundred cultures and speaks more than 22 (official) languages. When the British left this country there were over 500 princely states which acted independently and had the choice of not being a

Identity.

The significant role the institutions that a child attends throughout the course of their education cannot be neglected. It is vital that at the school level there exists a single curriculum throughout the whole country which gives some commonality to the students, while also teaching local, cultural practices. No matter how diverse the different fields of education in these institutions are, every institute should work on incorporating certain subjects or courses which bring together the different fields to a common platform. This leads to a better cross-field functionality and inculcates certain common characteristics in every student,

which acts as a binding agent wherever they go in the future.

Ultimately, there is no fine illustration of the concept than the human being. Our individual personalities are the most important factor for integration. Our experiences shape how we view the world, and our perception of the world each up shaping how we contribute to it. Every person's identity is a unique combination of the two big freedoms - nature and nurture i.e. the qualities we are born with, and those we acquire. No person is an island, and the societies we live in heavily influence who we end up becoming.

Rather than a task to be carried out once, integration is a constant and never-ending process. As our societies change and develop, they will face unprecedented challenges. The only way to ensure global co-operation and happiness is to embrace and bolster this critical process. It is also important for us as individuals to ensure that the values we hold in our personal lives and those we pass on to our future generations are in the spirit of integration and betterment of society. As the saying goes, "A chain is only as strong as its weakest link", and one weak link in a society can easily cause a chain reaction, leading to unrest and disorder. Ultimately, whether we are attempting to bring together a sports team or a country, every single person matters.

## Words from the President

It was a great delight to see my house beginning with energy of these budding CBITEans. Through the course of the interview, the students walked me down my memory lane.

We discussed my childhood and how it had an impact on my life. I recited some poems I had composed when I was young and explained the depth in their meanings. Time and again, I told them the importance of being an all-rounder. The cultural and literary activities during my childhood instilled a sense of discipline in me and helped me grow successfully in my fields of interests. My poetry helped me gain more knowledge and maintain my edge. These qualities made me competent. My personal suggestion to my readers would be to take up diverse activities outside of academics to solely

greater heights.

Starting from infancy, a child is always learning, and as accomplished human beings in the society, it is our responsibility to create an environment for children which gives them a sense of safety, curiosity and urge to learn. Incorporating such an environment in my opinion, is the due responsibility of the teacher. Being a teacher myself, I have always treated the profession as something more than just a job. My teacher from my fifth grade had a great impact on my life. From him I learnt invaluable lessons and I try my best to replicate them to my students.

It brings me great joy to see that 40 years of Sruthi have passed by gloriously and I cannot express how eager and excited I am to see this year's edition. Now that I look back, I see how much I have grown as a person working with this wonderful institution. From the interactive I've had with the students I can sense that the spirit is high for Sruthi this year and hope to see a great harvest for the first time back to the Chaitanya Bharathi Cultural Club and Communicando for their upcoming fest.

## NOTES FROM THE PRINCIPAL'S DESK

I am delighted to see another edition of our exclusive students newsletter 'Transcend'. It gives me immense pleasure to see the quality of writing become more refined and creative with each edition of the newsletter. I believe would like to congratulate the entire team and the respective board of Transcendent for successfully bringing out another edition of the college newsletter.

In conclusion, I take great pride in recognising the efforts of the students in bringing out such high quality articles and I wish them all the best in their future writing skills. Students not only

got to polish their writing skills but also learn about current advancements in varied fields like science and technology, sports, news and many more. Transcendent boosts the communication skills of students too, which is an important aspect that companies look at while recruiting students from colleges. As the principal, nothing gives me more joy than to see the overall development of CBITE. I believe this can be achieved by putting more focus into research and development. Transcendent can bridge the gap between law engineers and engineers, professionals and inspire students.

"IT'S TRUER TO SAY THAT MARTYRS CREATE FAITH MORE THAN FAITH CREATES MARTYRS." DEDICATED TO THE 42 JAWANS WHO WERE MARTYRED IN THE J&K'S PULWAMA TERROR ATTACK, TRANSCENDENT'S TEAM LIGHTS A LAMP TOWARDS THEIR IMMORTALITY AND SYMPATHISES WITH THEIR FAMILIES.

**LETTER FROM DEPUTIES**

With great zeal and enthusiasm, we present to you the much anticipated 'Small' Edition of Transcendent. We hope that the addition of new sections and a minor revamp in the layout would pack a semblance of fascination and enchantment. Bringing the readers new content with dynamic genres is something we work on with deliberation and we've always elated upon getting positive responses from them. The support we've had from our convener Mrs Sandhya Reddy along with the Editors in Chief has been relentless and our talented writers have never failed to impress all with their writing prowess. The Layout departments excellent skills and efforts has helped take this edition to a new level.

Writing is an art that is losing its lustre and as writers, we've always made attempts to bring alive the culture of writing, at least in the college. 'Transcendent blog' which was released earlier this year has had an overwhelming response from the college, highlighting the latent potential and interest in writing that direly needed a platform. Not only did CBITS writers contribute to the blog, we've had entries from IITs, MIT and other local Hyderabad colleges.

Although as CBITS very own newsletter and blog we urge the CBITians to keep extending their support. More so now, as Transcendent is currently out there on a larger platform with more audience. And to the first years aspiring to join Transcendent, we will have the recruitments right after the session re-opens after the semester exams and we know we'll find the right pack of talent to take the legacy forward.

We hope that the readers explore the new sections with great interest while also appreciating the standard sections and certainly message us on Facebook, Instagram or in person if they have something in mind that they would like in the newsletter in the upcoming editions!

transcendentcbit.wordpress.com

**TEAM TRANSCENDENT 2018-19**

**LETTER FROM THE EDITORS-IN-CHIEF**

Dear Reader,

Four years ago, when we were handed our first copy of Transcendent, we didn't know the values it held and all the hard work that went in bringing out that edition. Four years later, when we're on the other side, handing over this copy to the readers, there's a sense of pride and achievement in every glance that our articles get from our viewers. Transcendent to us isn't just a newsletter that's made possible because of articles written by students. Transcendent is a family, a family formed over numerous intellectual debates, disagreements and eventually, decisions. Transcendent to us, and numerous others, has acted as an empowering tool, which gave us a platform to express ourselves. If there's anything we have learnt rising through the ranks to the top, it is that being a part of a team is not about great writing and exceptional vocabulary, but about looking out for each other and having a sense of ownership towards the team and its members, taking responsibility and

accountability with each other, and helping everyone around you grow personally and professionally.

For all of us at Transcendent, it is very much a labour of love. The pleasure of creating something that is new, unique, and tangible is its own reward. In fact, the joy of creation is one of the purest joys in the world, and we are lucky to have experienced it. This year, the very talented team, spearheaded by the Deputy Editors-in-Chief, has made significant changes in the format and content of the newsletter. The Transcendent blog has also taken off as a result of their efforts. We are certain that they will only continue to make progress in the future. We hence have immense confidence in our juniors' ability to take the spirit forward, and scale newer and more exciting heights with it.

Our time at Transcendent, in all capacities, has been one of great personal growth as well. We often take for granted the various clubs and activities in college, but they are in fact

great opportunities to learn many important skills. Perhaps more importantly, they also equip you with some things that only such experiences can - such as the ability to think fast and make decisions under pressure, and the ability to arrive at compromises in a matter. These are all essential, no matter what course we take in the future.

This is our final address as part of this team, and the last piece we will ever write for Transcendent. It is, of course, a bittersweet time for us. We face a world of possibilities that we didn't even know existed, and are excited by what lies in wait. The feeling is tinged, however, with sadness for what we leave behind us. We hope that we have contributed to a legacy, and that our work has translated into something meaningful for you. The memories of our time at Transcendent will always be pleasant reminders of the value of hard work and co-operation. Signing off, we are,

Richa and Nikhil,  
Editors-in-Chief

**LETTER FROM THE CONVENER'S DESK**

It gives me immense joy to see another edition of Transcendent coming out this Shurthi. Being associated with this newsletter for the past seven years, I've seen it grow from a dream of an individual into a dedicated, hardworking family. Needless to say, I look towards

the future with hope and high expectations.

Over the years I've seen the college develop certain core values, integration being one of them. I have seen people from all walks of life coming together and bonding over a single common interest. Gradually, the world that we live in is slowly embracing and including people from all walks of life, who were earlier outcasted, into the mainstream. The world is slowly promoting inclusivity and integration. This indicates that our society is slowly but surely becoming more humane and sensitive and it is starting to put everyone on the same pedestal. Equality is prevailing and it is

helping the society grow. Especially a country, as diverse as India, has to adopt these practices and coexist with different kinds of people and communities. Our college, this year, has taken up the task of celebrating integration on all fronts by making it theme of Shurthi to which our Literary club is aligned.

I hope that all of you will take some information and is some inspiration, from this edition of Transcendent. The world is an ever-changing state of flux, and it is essential for students to keep up with it. The spirit of including and even respecting the differently abled people is the need of the hour.

## NoSQL The Next Gen Databases

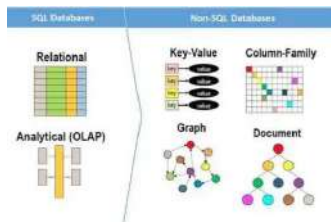

In the Database world, there are two main kingdoms SQL and NoSQL which are otherwise known as Relational and Non-Relational Databases. These databases differ on the basis they are built, stored and the type of information they store. SQL databases collect and organise data in a tabular format. SQL has been the heart of the database technology until now. Off-late, NoSQL has been gaining popularity and limelight as Tech giants like Facebook, Apple, Instagram and several startups have started implementing this technology into their projects.

NoSQL stands for "Not only SQL", which means the database can store the data in the format other than tables. Though NoSQL has existed since 1960s its true purpose is being served now, as it is very useful for Big data and Web applications.

### Why NoSQL and who is it for?

If you are dealing with large amounts of unstructured data, you may not have the luxury to organise it using the relational database with a clearly defined schema. Unstructured data includes Sensor data, location-based information, photos, online activity data etc. Trying to store and process this type of data is very difficult if it is done by a relational database and this is where NoSQL databases excel. With their schema-less design they can store data in document-oriented format such that all the information is not necessarily categorised but can be easily found in a single document.

### Types of NoSQL Databases:

- Key-value Database-** The simplest among the NoSQL databases, which stores the data in schema less way which contains indexed keys. Some of the key value databases are Cassandra, Azure, Riak.
- Column store-** In this type of database model the data tables are stored as Columns rather than rows providing higher performance. Hbase, HyperTable are popular column store databases.
- Document Database-** In this model each document has its own data with a unique key which can be used to retrieve that particular data. This type of database is great for managing the document oriented data. MongoDB is one of the popular databases used by the startups which is document oriented with JSON-like documents.
- Graph Database-** This type of database is used for representing interconnected data in a graphical format and it is capable of high complexity. Some of the graph databases are Polyglot, Neo4J.

If you are interested in learning or implementing the NoSQL database in your projects, I highly suggest you to get started with MongoDB first.

### **Swachhata Pakwada –2020**

#### **Elocution (Speech) competition –Report**

As per the directives of the **Ministry of Human Resource Development**, Govt. of India, The College as part of **Swachhta Pakhwada 2020** has conducted several events to promote Swachhata. And the department of Information Technology has organized an elocution (speech) event for students on **Swachhata** topic under Swachhata Pakwada – 2020 on **28<sup>th</sup> Jan 2020** from 1.00pm to 4.00pm in N-block. 42 students had registered for this event and 17 have participated in this event.

The coordinators for the event are Ms. A.Sirisha, Assistant Professor, Ms. B.Veera Jyothi , Assistant Professor and T.Satya Kiranmai, Assistant Professor of IT Department.

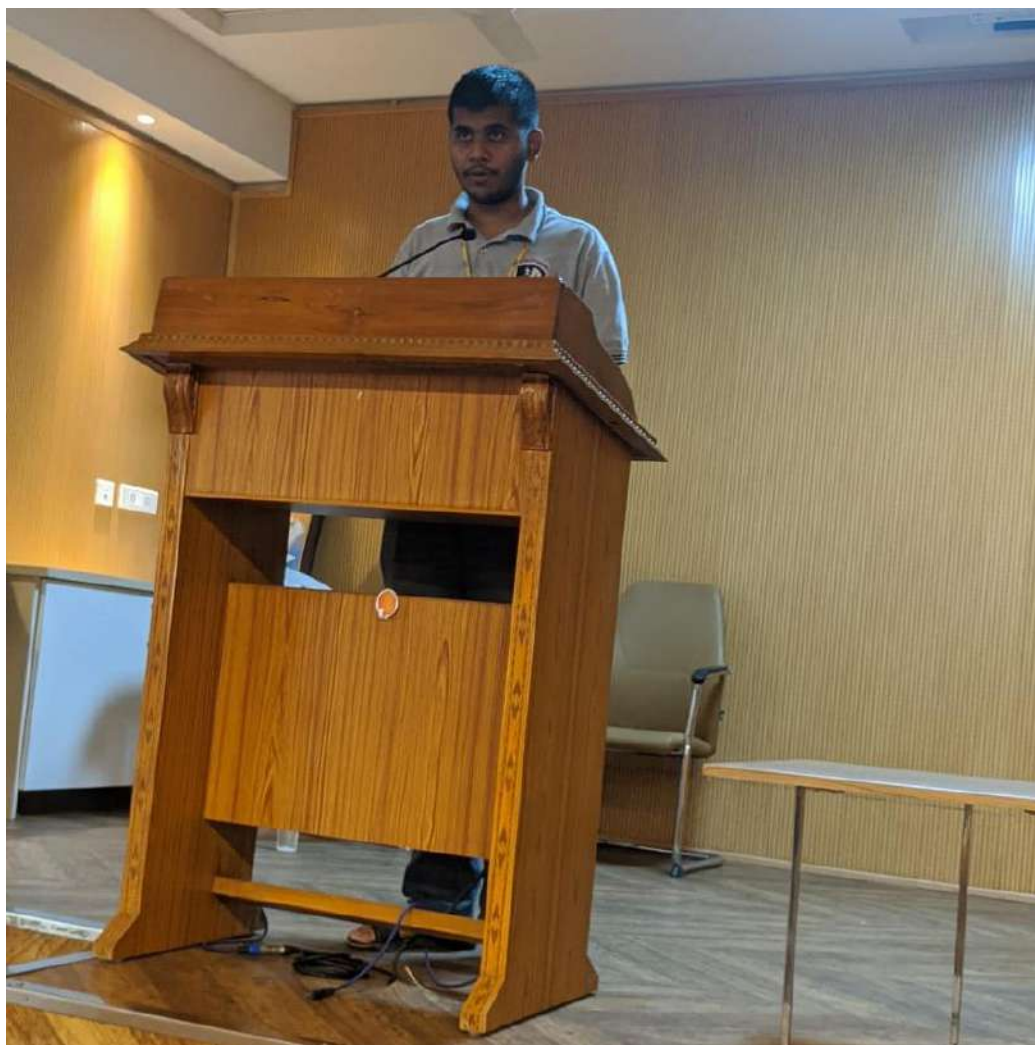

Three prizes are awarded. **Mr. Karthik Polu (160117732087) of Civil -VI Semester** has won the First prize, **Noorain Fathima (160118732065) of IT2-IV Semester** won the Second prize and **Khundhana Madurai (160117735005) of ECE1-VI Semester** has won the third prize.

The evaluation is done as per the details given below:

#### **Elocution – rules & guidelines:**

- The students can speak in any of the three languages: English, Hindi and Telugu
- Each student has given 5 min of time to speak about the topic.
- The evaluation is done for 15 Marks and Points are awarded based on the following criteria:
  - Content**
  - Relevance to topic, originality. **(5Marks)**
  - Exposition of the main theme (Conciseness & Clarity of message, anecdotes, illustrations) **(5Marks)**
  - Presentation (5Marks)**
  - Verbal Clarity (pronunciation of words, voice strength)
  - Presentation/Speaking Style (Gestures and expressions, Audience contact and voice modulation )
