Maslo Consulting

ADI PAVAN

Internship Certificate

Dear Adi Pavan

This is to certify that Adi Pavan has successfully completed an internship with Maslo Consulting as an HR intern in the HR department from 05/10/2022 to 03/12/2022.

They have worked on "A Study on the Onboarding and Assimilation process of Startups" under the supervision and guidance of Rohit Eustachius, CEO during the internship.

Besides showing high comprehension capacity, and managing assignments with maximal efficiency he has also maintained a professional demeanor and showcased excellent moral character throughout.

I hereby certify his overall work as satisfactory to the best.

Wishing him the best of luck in his future endeavors.

Sincerely,

Rohit Eustachius
CEO - Maslo Consulting

Dear Madam,

Sub: Industrial Visit for B.E. Mechanical IV Sem Students of CBIT.

In the present scenario it is very important for the students to learn practical aspects of machines & equipments and also get familiarized with the functioning and manufacturing process involved in industries. The students learning should also keep in pace with the problems faced and changes taken place in the industries. So it is very important for the students to visit renowned industries where they will get opportunity to learn the practical aspects and contents beyond the syllabus.

Our students in CBIT are extremely interested to visit your esteemed industry. Hence we request you to kindly grant permission for our students to visit CMAC, India Private Limited on 15-07-2023. Please communicate the time suitable for our students to visit your industry. The total number of students going to visit the industry is 30. They will be coming in two batches to facilitate for better interaction. The list of students visiting your esteemed industry will be sent to you shortly.

Thanking you,

Yours Sincerely,

Dr. P. Prabhakar Reddy
HOD, MECH

Faculty of Mechanical Engineering Department, CBIT Hyderabad visited the National Small Industries Corporation (NSIC) Hyderabad on 31st October, 2023. General Manager NK Subramani and Deputy Manager Abdul Khader showed the facilities like CNC centre, 3D printing, R&AC centre , welding and fabrication and industry automation center. The CBIT faculty Dr. G. Laxmaiah, Dr. Solomon Raj, Dr. BVS Rao and Dr. Kiran Kumar Amireddy discussed possibilities of students internships, projects and collaborative works between NSIC and CBIT. Principal Prof. CV Narsimhulu and Mechanical Engineering Department HoD Prof. P. Prabhakar Reddy hailed the efforts.

News

Faculty of Mechanical Engineering Department, CBIT Hyderabad visited the National small industries corporation (NSIC) Hyderabad on 31st October, 2023. General Manager NK Subramani and Deputy Manager Abdul Khader showed the facilities like CNC centre, 3D printing, R&AC centre, welding and fabrication and industry automation center. The CBIT faculty Dr. G. Laxmaiah, Dr. Solomon Raj, Dr. BVS Rao and Dr. Kiran Kumar Amireddy discussed possibilities of students internships, projects and collaborative works between NSIC and CBIT. Principal Prof. CV Narsimhulu and Mechanical Engineering Department HoD prof. P. Prabhakar Reddy are hailed the efforts.

Learning Mission to IMGEOS (Integrated Multi Mission Ground Segment for Earth Observation Satellites), National Remote Sensing Centre (NRSC), Shadnagar

Real time satellite tracking was clearly viewed on the display in the control room. NRSC scientists clearly explained the working and how the data is received form the satellite and how it is processed. Six antennas were installed out which 4 were operating in X-band and 2 in S band. They informed about the different colours they can see and there interpretation for e.g., Blue – water, Red – Greenery, White patches – clouds or sand. Base stations are installed in Antarctica and Jodhpur and data is received from these stations. Satellites total coverage is around 3000 kms. Satellites are visible 4 times a day and can do 14 orbits in a day where the data of 10 orbits can be easily collected. All the data collected is processed and stored. Antenna allocation is done 3 minutes before the satellite is about to cross the region. Cassegrain Parabolic reflectors are used. Based on the look angels antenna will change the orientation. Under Data Ingest 30 physical parameters are recorded. It takes around 1hour 30 minutes to complete 1 orbit.

Antenna system was also visited. In RF chain, signal is down converted and images are extracted before modulation. The antenna lifetime is approximately 25 years. The separation between two antennas is around 180 meters. The reflectors are made of Aluminium which is electrically conductive and non-magnetic. The tracking pedestal is made of steel and the accuracy is 300 microns.

The data is available on two clouds. 1. IMGEOS is a private cloud with 35 TB memory and total cost is 6400 crores. 2. NRSC public cloud with 600 TB storage capacities with total cost of 192 crores.

 Dr KHV Durga Rao, Group Director, Disaster Management support group, NRSC, ISRO talked about various disasters (floods, cyclones, forest fires, earthquakes, landslides etc.,) that can be detected using the satellite images.

Post lunch there was live interaction with the Antarctica team. Bharathi research center with a team of 24 members was set up there. They receive 500 GB data through RADOMES.

Later Directors and deputy directors gave brief overview of the work that is being done in NRSC.

Hexagon

Technology Day

The Hexagon Technology Day is conducted on 16-12-2022 in Hexagon company Gachibowli Dr Satyanarayana Murthy, Dr Trupthi and Ms. P Kiranmaie has attended the sessions for Technology Day in Hexagon from **IT Department CBIT**.

There are tech sessions conducted in different areas as Visualization/Digital reality, Artificial Intelligence, Security and Devops, Cloud Ecosystem and Modern software Engg. We opted for Artificial Intelligence

The program started with keynote by Dr. Burkhard Boeckem at 9.30 it was about how they emphasized on the visualization digital realty and AI techniques help to build a wireless scanner which is a product of Hexagon it is used to combine with Robot Technology and and many other advanced technologies

He believes in **Think-Innovate-Combine** and **Disrupt the innovation but you can't disrupt the thinking of the individual**

Hexagon connect

As we opted for AI the first session in AI is Hexagon connect by Kalyn Sims at 10.30 and the key points discussed are

- By using Hexagon connect they are making many advances used to predict accidents before happening
- Transportation research board conference
- Road way sensors, virtualization of map data, accident prediction results
- Crash prediction project
- Predictive analysis
- Public safety

AI Initiatives and Technologies

The second session is on AI initiatives and technologies by Bernd Reimann at 11.45 and the key points are:

- Pipe detection from GPR
- Mobile mapping with smart digital realties
- Predictive maintenance for mining values and machinery for this we use Decision making by AI the steps for predictive maintenance is

  Task Technology
  Algorithm
  +tools
  Applications

  For smart maintenance we have to check state of detect whether it is too frequent , too late or optimum

- To train the data set we have unsupervised ML we have steps of

Select proper set

Sliding window feature extraction and dimension reduction

Density estimation

Outlier detection

- For supervised learning we have cost and technical anamoly detector
- Acoustical quality inspection for industrial valves where neural networks are used for quantitative results the confusion matrix is used
- For the location through AI we have

Capture

Reality position

Geolocation

Feedback
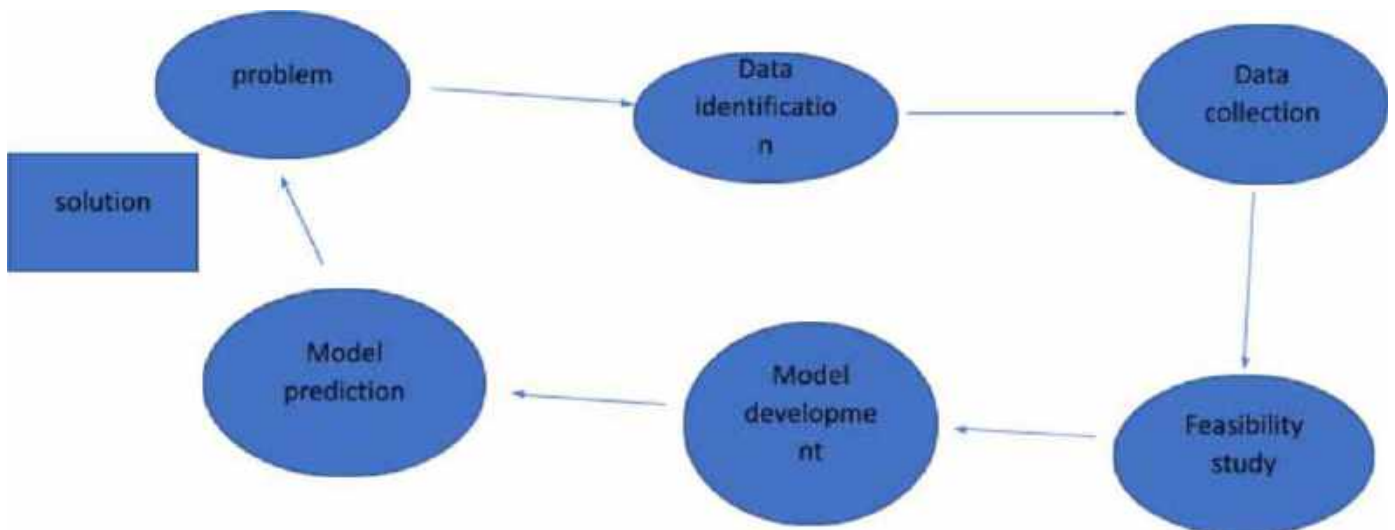

- Recent paper is in 2021 with motion state detection
- Sampling technique to find precision of data objects

AI in M365

The third session is on AI M 365 by Shirish koti and vipindeep vangala the keypoints discussed are:

- M365 is Microsoft 365 it is collaboration of all apps like outlook, word, excel, teams, ppt, people
- Meeting key feature where it detects time zone of a person and makes easy to set meeting to connect across the country
- We can conduct viva in clip boards by user points for viva it has features of topic extraction, acronym, definition mining and recommendations i.e. expert people, suggested people and suggested apps and pages
- 3 dimensions to build intelligence is,

Skilled knowledge extraction

Connecting digital world with graph

Recommendations and search

- Privacy scale performance legal fundamentals of extraction levels
- Anonymization and eyes off datasets, extraction models, rankers, and compliance
- Everything in M365 is connected and it results in graph by clear picturing of all aspects and everyone from institute can access the graph and extend it
- Extend M365 if by building experience by extending data with Microsoft graph with azure AI platform
- For references we can use
    MS AI blog
    0365 productivity site

Building AI Solutions with Computer vision

The next session is on Building AI Solutions with Computer vision by Pradnyil sranjay

CV overview ⟶ Building blocks ⟶ Application ⟶ Conclusion

- Solving CV problem using AI and AI is used to derive information
    from Digital image
    Videos
    Depth fields
- The main tasks of CV are manual filter and feature extraction
- What can we solve with AI with CV

- In classification and object detection we have

Image classification	classification and localization	detection
We use		
Traditional CNN	simplifies YOLO & R- CNN	YOLO & R- CNN

- To build blocks the steps
    are Tensors,
    neurons Layers
        Convolution: it applies on input feature map to produce output feature map
        Pooling: it is applied after convolution it has both max and average pooling it has
            Down sampling operation
            Parameter compatibility
            Gradient invariant
        Activation: it is nonlinear unlike convolution and pooling
            layers Gradient propagation
            Relu, software

Fully connected: it is flatten layer, predicts desired outputs from model I has deep network and dimensions of last layer has to match derived output

Optimizer: it is used to minimize loss

Challenges are initial starting point, parameter setup, high dimensional learning space

Optimizers used are fixed rate optimizer and aphine

Learning rate scheduler

NLP using Transformer model

The last session is on NLP using Transformer model by Ankan Sengupta and and Amruth muddana

NLP is used to translate unstructured words in to structured data. NLU and NLG are sub fields of NLP

- Who uses NLP
    Google
    Amazon, Alexa, Apple siri
    Social networks use NLP to detect hate speech
- History of AI
    1950-80 AI   1980-2000 ML   2000-2010 DL
    Major breakthroughs in NLP
        1954- George Town expo
        1972- Statistical model
        2001- NN
        2013- word embeddings
        2014- RNN, LSTM
        2016- DNC, SLING
        2017- transformer
        2018- BERT
- Raw text _____ text processing _____ learning internal representation
        Translation
        Stemming
        Stop word removals

- DL techniques RNN, LSTM
- ML techniques logistic regression, NLDA, naïve bayes
- Chatbot, hugging face website
- Future NLP
    NLG

Conversational AI
Dialogue generation

CERTIFICATE OF INTERNSHIP

This is to certify that **Mr. ADEPU VARUN SAI KRISHNA** student of **Chaitanya Bharathi Institute of Technology**, Hyderabad has successfully completed his Internship Program on **"Data Analysis using Python"** under the guidance and supervision of Mr. Kallepu Saketh Reddy, C.O.O, Codegnan IT Solutions Pvt Ltd, Vijayawada from **7th November 2022 to 10th January 2023 (120 Hours)**

As part of his internship, he has worked on different case studies related to **Python, APIs, Web Frameworks, Web Scraping, and Exploratory Data Analysis.**

He also has successfully completed a project on **"Best Streaming Services Analysis using Python"**.

During his Internship, We found him to be professional, knowledgeable, and result-oriented with a theoretical and practical understanding of design work requirements. He has a friendly, outgoing personality and works well as an individual or a member of a team as required by the management.

On behalf of the company, I take this opportunity to wish him all the very best in his future career endeavors and have a smooth life.

CERTIFICATE OF INTERNSHIP

This is to certify that Miss. **YAMANI BHAVITHA** student of Chaitanya Bharathi Institute of Technology, Hyderabad has successfully completed her Internship Program on "**Data Science using Python**" under the guidance and supervision of Mr. Kallepu Saketh Reddy, C.O.O, Codegnan IT Solutions Pvt Ltd, Vijayawada from **29th August 2022 to 5th November 2022 (120 Hours)**

As part of her internship, she has worked on different case studies related to **Python, Data Analysis, Machine Learning, Computer Vision & Deployment of Models.**

She also has successfully completed a project on "**Bank Marketing Analytics using Machine Learning**".

During her Internship, We found her to be professional, knowledgeable, and result-oriented with a theoretical and practical understanding of design work requirements. she has a friendly, outgoing personality and works well as an individual or a member of a team as required by the management.

On behalf of the company, I take this opportunity to wish her all the very best in her future career endeavors and have a smooth life.
