CIRCULAR

The **CBIT Open Source Community (COSC)**, in collaboration with the **Career Development Centre (CDC)**, is organizing **Global Open Source Awareness Session** to introduce students to various global open-source programs such as **Google Summer of Code (GSoC)**, Open Source Promotion Plan (OSPP), FOSSASIA initiatives, and other international contribution opportunities. These programs engage students in real-world open-source software development under the guidance of experienced mentors. Participants collaborate with global organizations, gain practical exposure to large-scale projects, and enhance their technical and professional skills. Several CBIT students have successfully contributed to such programs in recent years, bringing recognition to the institute.

The speakers for the session are **Md Muzaffar (160122748040)**, Department of Artificial Intelligence & Machine Learning (AIML), C4 (4/4), and **Mohammed Imaduddin (160122749053)**, Department of CSE – IoT, C5 (4/4), who have successfully contributed to international open-source programs. They will share their experiences, insights on the application process, and practical guidance to help students prepare effectively for such opportunities. **Interested students from II, IV, and VI semesters of all circuit branches are encouraged to participate. Class attendance will be provided** to all registered participants, and attendance records will be submitted to the respective departments.

Objectives:

- Introduce students to global open-source programs and their benefits.
- Explain the application and selection process.
- Share experiences and practical insights from past contributors.
- Encourage active participation in open-source development.

Date	2nd March 2026
Time	10:00am - 12:15pm
Venue	Assembly Hall

Student coordinators contact information:

Ch Pawan Mohit - CET(3/4) (9492532259)
